

Prem Nidamanuri

Full Stack Java Developer

premnidamanuri99@gmail.com | Austin, TX | (361)833-8405
www.linkedin.com/in/prem-nidamanuri

OBJECTIVE

Seeking a **Java Developer** role where I can leverage expertise in Java, Spring Boot, Microservices, and AWS Cloud to build secure, scalable, and high-performance applications.

PROFESSIONAL SUMMARY

- Full Stack Java Developer with **5+ years of experience** in banking, telecom, and healthcare domains.
- Proficient in **Java (8–17), Spring Boot, Spring Security, Hibernate/JPA, REST APIs, and Microservices**.
- Skilled in **AWS Cloud (EC2, S3, Lambda, Elastic Beanstalk)**, containerization with **Docker & Kubernetes**, and **CI/CD automation** using Jenkins.
- Strong experience with **SQL/NoSQL databases** (MySQL, PostgreSQL, Oracle, MongoDB, Cassandra) for query optimization and data integrity.
- Adept at implementing **multithreading, concurrency APIs, and performance tuning** for high-throughput applications.
- Hands-on with **JUnit, Mockito, ELK Stack, and SonarQube** to ensure quality, monitoring, and compliance.
- Experienced in **Agile/Scrum** environments, collaborating with product owners, QA, and DevOps teams for sprint delivery.
- Committed to writing **secure, scalable, and maintainable code** following best practices and OWASP guidelines.

TECHNICAL SKILLS

Languages:	Java (8–17), JavaScript, SQL, HTML5, CSS, Shell Scripting
Frameworks & Libraries:	Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, REST APIs, Microservices, React.js, Angular, JSP, Thymeleaf
Databases:	MySQL, PostgreSQL, Oracle, MongoDB, Cassandra
Cloud & DevOps:	AWS (EC2, S3, Lambda, Elastic Beanstalk), Docker, Kubernetes, Jenkins, Maven, Git
Testing & Monitoring:	JUnit, Mockito, SonarQube, JMeter, ELK Stack
Tools:	Jira, Confluence, Agile/Scrum

CERTIFICATIONS

AWS Certified Developer – Associate
Spring Professional Certification – VMware
Spring Professional Certification – VMware

PROFESSIONAL EXPERIENCE

BANK OF AMERICA

Full Stack Java Developer

Jul 2023 - Present
Dallas, TX

- Designed and deployed **REST APIs** with Java 11+, Spring Boot, and Spring Security (OAuth2).
- Migrated monolithic services to **AWS Cloud (EC2, S3, Elastic Beanstalk)**, improving uptime and scalability.
- Implemented **microservices architecture**, enabling modular design and faster releases.
- Developed **UI features using React.js** integrated with Spring Boot APIs, enhancing user experience for digital banking customers.
- Containerized applications using **Docker & Kubernetes**, cutting deployment cycles by 40%.
- Automated CI/CD pipelines with Jenkins, reducing release time and errors.
- Optimized **multithreaded data pipelines** with Streams API, improving transaction throughput.
- Achieved **90%+ test coverage** with JUnit and Mockito, strengthening production reliability.

- Enhanced storage performance by integrating **Cassandra with AWS S3** for large-scale datasets.
- Collaborated with UI/UX designers, QA, and DevOps teams in **Agile sprints**, ensuring full-stack delivery.
- Built event-driven microservices with **Kafka** and **RabbitMQ**, improving real-time transaction processing.
- Optimized performance with **Redis** caching and **database** indexing, reducing **API** latency.
- Improved observability using **SonarQube**, **Dynatrace**, and **Logscale**, ensuring reliable deployments.

Technologies Used: Java 11+, Spring Boot, Spring Security, OAuth2, REST APIs, Microservices, React.js, AWS (EC2, S3, Elastic Beanstalk), Docker, Kubernetes, Jenkins, Maven, Cassandra, SQL, NoSQL, JUnit, Mockito, Agile, Jira, Confluence.

CHARTER COMMUNICATIONS

Oct 2020 - Jul 2022

Software Developer

St. Louis, MO

- Developed backend services in **Java 8/11, Spring Boot, and Hibernate** for customer-facing applications.
- Built and maintained **REST APIs and microservices** supporting provisioning and diagnostics workflows.
- Contributed to **UI enhancements using Angular and JavaScript**, ensuring seamless integration with backend APIs.
- Optimized **SQL queries and Hibernate ORM**, reducing data access times by 35%.
- Implemented **Spring Batch jobs** for asynchronous tasks and reporting.
- Deployed Dockerized services and integrated **Kubernetes clusters** for scaling across environments.
- Monitored production with **ELK Stack**, enabling proactive performance tuning.
- Participated in **Agile ceremonies**, sprint planning, and cross-team collaboration for full-stack feature delivery.
- Integrated **IoT** data services with **Embedded Java** and **RabbitMQ**, enabling real-time diagnostics.
- Built monitoring dashboards in **Grafana** and **Dynatrace**, improving SLA performance.
- Leveraged **AWS Lambda** for serverless workflows, cutting costs and boosting efficiency.

Technologies Used: Java 8/11, Spring Boot, Hibernate, JPA, REST APIs, Microservices, Angular, JavaScript, SQL, MySQL, Spring Batch, Docker, Kubernetes, ELK Stack, Agile, Jira, Confluence.

OPTUM

Jun 2019 - Sep 2020

Application Development Associate

Eden, MN

- Developed backend modules using **Java, Spring MVC, Spring Security**, and Hibernate.
- Designed **REST APIs** for clinician onboarding/training platforms and integrated them with front-end dashboards.
- Built **UI components using JSP, Thymeleaf, and JavaScript**, ensuring responsiveness and better user workflows.
- Improved SQL-heavy operations by adopting **Hibernate ORM**, boosting performance by 20%.
- Configured **authentication and role-based access control** for admin and clinician portals.
- Automated tasks and deployments with **Linux shell scripting**, ensuring smooth releases.
- Conducted **unit and integration testing** with JUnit/Mockito to improve feature stability.
- Worked in **Agile teams**, delivering end-to-end features from database through backend to user-facing components.
- Secured apps with AES-256 and JWT, ensuring HIPAA compliance.
- Implemented async pipelines using **Kafka** and **IBM MQ**, reducing onboarding delays.
- Built CI/CD pipelines with **Jenkins, Docker**, and **Terraform**, enabling zero-downtime releases.

Technologies Used: Java, Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, REST APIs, JSP, Thymeleaf, JavaScript, MySQL, Linux Shell Scripting, JUnit, Mockito, Agile, Jira, Confluence.

EDUCATION

MS in Computer Science | **Texas A&M University, Corpus Christi**

OTHER NOTABLE PROJECTS

➤ Smart Expense Tracker | Java, Spring Boot, React.js, MySQL, AWS

Developed a full-stack expense tracking application with user authentication, REST APIs for transaction

management, and a responsive React.js front-end. Deployed on AWS with MySQL backend, enabling real-time expense insights and reports.

➤ **Nirvana App | XML, Java, Android Studio**

Built a mental health app using Java and Android Studio, integrating cloud-based storage and real-time data synchronization with Google Cloud and Firebase.

➤ **Community Housing Assistant App | XML, Java, Git, Android Studio**

Engineered a recommendation system using Java, integrated with cloud-based backends and optimized for low-latency responses on Google Cloud.
