

EXPERIENCE

Product Owner – Wells Fargo, San Francisco

Jan 2023 – May 2024

Merchant Onboarding Services – Document Generation, E-Sign as a service, Document Storage

- Defined and managed the product roadmap for a team of 6 SDE's and 4 QAE's, aligning with overall business objectives and client needs.
- Worked with CX team to provide requirements and approve figma designs. Defined document template logic and endpoints for the microservice to integrate with enterprise applications to provide seamless customer onboarding process for electronic sign and wet sign categories
- Presented planned features from quarterly releases and analyzed data flows between microservices that help identify potential dependencies with other microservices in the business.
- Handled escalations from the testing team, prioritizing them with the development team to ensure timely resolution.
- Led the quarterly release cycles by coordinating and managing engineering, template development engineers, and the QA team.
- Identified areas of Text-to-speech testing within templates generated by the microservice to ensure compliance with the American Disabilities Act, partnering with 3P audit teams to maintain compliance.

Lead Business Analyst - Broadridge

Nov 2018 – Jan 2022

Revport – Invoice, fee, data validation and reconciliation for Capital markets and Agent banks

- Hired, trained and led a geographically distributed team of 11 analysts. Team offered business solutions for clients by suggesting enhancements, process improvements, customize applications based on requirements and onboard clients with technical assistance
- Developed product road-map, allocated resources, delegated tasks based on SME, communicated deadlines across stakeholders, ran all agile ceremonies including planning, backlog maintenance, sprint review, and daily standup calls and ensured on-time delivery
- Established a 24-hour SLA rule for critical issues and achieved a track record of zero client escalations in post-production support
- Proposed and onboarded a generic framework to capture invoice details from various data formats of brokers. Accomplished a reduction of 50% development effort and contributed to an increase of ~\$2 million in revenue via new contracts
- Attained an ~66% reduction in daily post production tickets by leading an initiative to optimize error handling during data import
- Detected security vulnerabilities and process inconsistencies in data repository tool - Charging Condition Matrix (CCM). Proposed a multi-pronged solution and spearheaded an end-to-end effort to cut down resource effort by 40% during debugging and analysis
- Identified and automated data intensive workloads for top 5 clients (~5 million records) by authoring SQL queries and scalable shell scripts

Business Technology Analyst - Deloitte

Jul 2015 – Nov 2018

Deloitte Global Employer Services

- Headed design, development and deployment of data import feature for payroll tool – Global Advantage International Human Resources (GA IHR). Enabled more than 100 of Deloitte's internal and external clients to better input employee's onsite assignment data
- Worked directly with 5 biggest clients to gather requirements and developed use cases, BRD, FRD, process documents and wireframes
- Devised user stories, prioritized and finalized sprint items and handled scrum calls with peer product managers, development team (DAS), Infrastructure team (ITS) and database team. Finalized & signed off test case scenarios for QA team and tracked defects.
- Trained clients and engagement teams to avail features by holding training sessions and achieved a reduction of client's resource time by more than 70% in data entry and support (from 2 hours to less than 30 mins)
- Involved in contract negotiations with clients for add-on reporting services alongside the business team. Built custom reporting solutions using SQL Server Reporting Services (SSRS) based on client's requirement, assessed and modified triggers, functions, procedures, scheduled jobs
- Designed BRD and FRD to support 3rd party GA Utility services within GA IHR tool by conducting brainstorming sessions with clients, analyzing existing business documents & use cases and creating prototypes

Software Test Engineer - Infosys

Mar 2013 – Jun 2015

Retail E-commerce web application & POS systems

- Modified & improved test plans for newer features of payment portal to define new scope for tests, strategy and acceptance criteria
- Created and maintained Requirement Traceability Matrix (RTM), test case preparation, test execution and managing defect life cycle

SKILLS & TECHNOLOGIES

Product Management, Agile - Scrum Master, Release Management
Gap analysis & Process Modelling
Client management, implementation & onboarding

Database & Reporting: SQL Server, Oracle, SSRS, Tableau
Release Management: JIRA, TFS, Confluence, HP ALM, Service now
Others: MS Office, Visio, Putty, WinSCP, SOAP UI

EDUCATION

Bachelor of Engineering - Anna University, India

GPA: 8.2 / 10.0

May 2012
