PROFESSIONAL SUMMARY

- Data & Business Analyst with 10+ years of experience in software design, database architecture, business intelligence, and data analytics. Proficient in SQL, Python, Snowflake, and Azure Data Factory (ADF) for advanced data processing, visualization, and predictive analytics. Experienced in Tableau, Power BI, and SSIS for actionable insights and data-driven decision-making. Adept at optimizing business processes through ETL, data warehousing, and cloud analytics.
- Experience in SQL 2017/ 2016/2014/2012 /2008 R2 with an emphasis on design, development, automation, tuning, optimization, Performance and Security.
- Experience in analyzing business user requirements, analyzed data and designed software solutions in Tableau Desktop based on the requirements. Proficient in data storytelling, predictive analytics, and SQL-based insights generation to support business decisions.
- Experience in converting Legacy Reports to Tableau dashboards connecting to SQL server.
- Built and published interactive reports and dashboards using Tableau Desktop and Tableau Server.
- Expertise in Microsoft Integration Services like SSIS (Control Flow tasks, Data Flow tasks, Transformations, Database administration tasks).
- Proficient in SQL Server Integration Services like Package creation, Check Points Implementation, Dynamic Configuring of package, Logging, Custom script writing, Package deployment using Manifest, Implementing Transactions, and Package encryption.
- Explore data in a variety of ways and across multiple visualizations using Power BI.
- Expertise in creating reports in Power BI preview portal utilizing the SSAS Tabular via Analysis connector.
- Experience in publishing Power BI Desktop reports created in Report view to the Power BI service.
- Monitored and Tuned MS SQL Server databases with tools like Index Tuning Wizard, SQL Profiler, and Windows Performance Monitor for optimal Performance.
- Experience in creating Power BI Dashboards (Power View, Power Query, Power Pivot, Power Maps).
- Extensive experience in SQL Server 2016/2012/2008 Business Intelligence tools - SQL Server Integration Services (SSIS), SQL Server Reporting Services (SSRS), and SQL Server Analysis Services (SSAS).
- Experience working on Tableau (Desktop, Server, Reader), creating various Reports and Dashboards using different functionalities.
- Experience in Tableau Desktop, Power BI for data visualization, Reporting and Analysis; Cross tab, Scatter Plots, Geographic Map, Pie Charts and Bar Charts, Page Trails and Density Chart.
- Extensive experience in creating complex SSIS packages, creating jobs, Alerts and schedule SSIS Packages using SQL Agent, migrating the data from different legacy system to SQL using SSIS.
- Proficient in Design of ETL DTS Package for integrating data from heterogeneous sources (Excel, CSV, Oracle, flat file, Text Format Data).
- Handled various types of encryption and decryptions in SQL as per client requirements to secure data.
- Experienced in migrating Data from Excel, Flat file, Oracle to MS SQL Server using SQL Server Integration Services (SSIS) and expert in Creating, Configuring and Fine-tuning ETL workflows in SSIS.
- Hands on in Designing, maintaining and building Cubes, Dimensions, and Data source views, data mining Models, Deployment and Processing using SSAS.
- Created stored procedures for generating reports using SQL Server Reporting Services (SSRS), Crystal Reports.
- Good command in generating on demand and scheduled reports for business Analysis and Management decisions using SSRS 2016/2012/2008.
- Well versed in writing Parameterized Queries for generating Tabular reports, formatting report layout, Sub reports using Global Variables, Expressions, Functions, Sorting the data, defining data source and subtotals for the reports using SSRS.
- Developed Drill through and Drill down reports using Crystal Reports and SQL Server Reporting Services (SSRS).
- Developed Python script to for processing large data sets and also to extract data from different files.
- Worked with IT teams to analyze and improve ServiceNow workflows for Change and Problem Management.
- Built Python Modules to deliver specific formats of data.

- Designed and developed OLAP Cubes with star schema and Dimensions using SSAS.
- Querying and manipulating multidimensional cube data through MDX Scripting.
- Expert in Tabular Modeling, Multi-Dimensional Cubes, DAX and MDX (SSAS).
- Expertise in Developing and Extending SSAS Cubes, Dimensions and data source views, SSAS-Data Mining Models and Deploying and processing SSAS objects.
- Extensively used performance monitor/SQL profiler to solve dead locks/long running queries.
- Experienced in Agile Methodologies like attending daily Scrums, maintaining User Stories and Burn down Charts, Backlog Grooming and Retrospective.

SKILLS

ETL Tools	SSIS, ETL/ELT Pipelines, Metadata Management
Data Visualization Tools	Tableau, Power BI, Einstein Analytics, SSRS, Report Builder, Microsoft Excel
Database	SQL, Oracle, DB2, Teradata, T-SQL, PL/SQL, Stored Procedures, Indexing
Methodologies	Agile (Scrum, SAFe), Waterfall, BPMN, UML, System Integration
Database GUI	Teradata, SQL Server, SQL Developer, DB2
Methodologies	Agile, Waterfall
Programming Languages	SQL, Python, R, PL/SQL, HTML, Core Java, Unix Shell Scripting, JavaScript
Software Packages	Microsoft Visio, Microsoft Visio, Jira, ServiceNow, Azure DevOps, SAP Business Objects
IDEs & Development Tools	SQL Server Management Studio, SQL Developer, Eclipse, PyCharm, Rational Rose
Operating Systems	Windows and Mac

WORK HISTORY

Kena Solutions Inc, Collierville, TN

JUN 2024 – Present

Sr.Data Business Analyst

- Managed and analyzed large datasets to generate actionable insights, improving operational efficiency. Built automated data pipelines using Snowflake and ADF, reducing manual reporting time by 40%.
- Built automated data pipelines using Snowflake & ADF, reducing manual reporting by 40%.
- Developed Tableau & Looker dashboards for data-driven decision-making, improving KPI tracking.
- Led cross-functional meetings to align AI & Data Strategy, optimizing workflows using Azure DevOps & Jira.
- Implemented big data processing using Apache Spark & Scala, enhancing analytical capabilities.
- Automated data validation & cleansing, improving data accuracy & reducing manual intervention by 30%.
- Managed intake requests for AI projects, identifying required information and prioritizing demands using Azure DevOps and Jira
- Developed and maintained dashboards using Tableau and Looker, ensuring data accuracy.
- Conducted in-depth analysis of key performance metrics, providing strategic recommendations.
- Facilitated cross-functional meetings with technical and non-technical partners to align project goals.
- Developed and optimized big data processing pipelines using Apache Spark and Scala for large-scale data analysis.
- Implemented Python-based ETL scripts for data ingestion, transformation, and analytics.
- Led the design and implementation of advanced data models, enabling predictive analytics and driving data-driven decision-making across departments.
- Built and optimized ETL pipelines using SQL and Python, improving data processing speed and ensuring high-quality data integration.
- Collaborated with cross-functional teams, including data engineers, product managers, and stakeholders, to define business requirements and translate them into technical solutions.
- Designed and developed interactive dashboards using Tableau and Looker, providing actionable insights and supporting executive-level reporting.
- Conducted complex data analysis to uncover trends, patterns, and actionable insights that informed strategic business decisions.

- Automated data validation and cleansing processes, enhancing data integrity and reducing manual intervention by 30%.
- Used Spark SQL to perform distributed data processing and analysis across large datasets
- Implemented data visualization best practices to create clear, user-friendly reports for both technical and non-technical stakeholders.
- Facilitated data governance practices by monitoring data security and compliance with organizational policies and external regulations.
- Delivered comprehensive data literacy training workshops for internal teams, improving organizational understanding of data-driven processes.
- Collaborated with IT teams to streamline data infrastructure and support the migration of legacy systems to a modern data architecture
- Led interactive training sessions to enhance data literacy within the organization.

First Horizon Bank-Memphis TN

Data Analyst/Business Analyst

JAN 2023 – MAY 2024

- Identified business improvement opportunities through data analysis and reporting.
- Used Tableau & R to create interactive reports and extract insights from data.
- Led data validation & transformation processes from source to target systems.
- Migrated data from Postgres to Snowflake for improved storage and performance.
- Developed predictive models in Python & SQL for loan risk assessment and forecasting.
- Worked on data exploration, data cleaning methods using R. Have used R packages such as pyrr, ggplot2 and plotly for data manipulation visualization and dplyr for data wrangling.
- Wrote SQL queries using Query Analyzer and Oracle for data manipulations.
- Worked on relational data base, ETL tables, staging processes, XML/COBOL files.
- Took the lead role in requirements definition, ETL specification, data modeling and implemented inventory management data warehouse.
- Worked with other business analyst to design, and document needs assessments, HIPAA gap analysis, workflow, data maps, business requirements, functional & reporting specifications, business rules, policies and procedures.
- Extensively worked with ETL tool Informatica and have development and enhancement along with, testing and migration of Informatica workflows and mappings.
- Translated business requirements into further development of the OLAP system. Presented to central development teams and assisted with ETL methodologies from the existing transaction logs.
- Involved in manual testing of ETL components, SQL, PL/SQL blocks
- Wrote Data loading stored procedures, functions using PL/SQL from Source systems into operational data storage.
- Used Rational Tools/MS Office Suite for creating use cases, workflows and sequence diagrams according to UML methodology thus defining the Data Process Models.
- Collaborate with team members to collect and analyse data from several different sources using Python programming.
- Developed SAS macro programs for creating daily monitoring reports.
- Worked extensively in Python development by decoding SAS scripts and migrating it to Python programming for several reports.
- Worked in Data migration from Postgres to Snowflake.
- Establish KPIs to measure the effectiveness of business decisions and translate Business Requirements into feasible technical solutions and provide clear acceptance criteria so that it helps him to write code effectively.
- Structure large datasets to find usable information to drive business decisions.
- Adopt Business cases into Live solutions by partnering closely with cross functioning groups and equip them with solutions.
- Create presentations and write and review reports based on recommendations and findings and present status to senior management.

Cognizant Technology Solutions, Hyderabad, India

Process Analyst

JUN 2021 – AUG 2022

- Designed and implemented process improvement frameworks that enhanced operational efficiency, resulting in a 20% reduction in turnaround time for key workflows.
- Analyzed IT Operations data using BI tools (Power BI & Tableau) to identify trends and improve incident response efficiency.
- Supported ServiceNow integration with BI dashboards, ensuring ITSM data was accurately reported for decision-making.
- Conducted in-depth root cause analysis to identify process inefficiencies, using data-driven insights to recommend actionable solutions.
- Led process mapping initiatives, using tools like BPMN to create detailed workflows and identify automation opportunities.
- Automated data validation workflows using Snowflake and Azure Data Factory (ADF).
- Collaborated with business stakeholders and technical teams to gather and analyze requirements, ensuring alignment with organizational goals.
- Developed and maintained performance metrics dashboards using Power BI, providing real-time insights into operational KPIs and process bottlenecks.
- Automated recurring manual tasks using Robotic Process Automation (RPA), enhancing productivity and reducing error rates by 25%.
- Conducted regular process audits to ensure adherence to compliance standards and optimize operational workflows.
- Facilitated cross-functional workshops to promote knowledge sharing and align process improvement initiatives across departments.
- Provided training sessions on process optimization tools and methodologies to internal teams, fostering a culture of continuous improvement.
- Authored detailed Standard Operating Procedures (SOPs) and process documentation to ensure consistency and regulatory compliance across all operations.

ICICI Bank Ltd, Hyderabad, India

APR 2018 – MAY 2021

Business Analyst

- Developed and aligned technology roadmaps to support key business objectives.
- Designed data visualizations and provided critical analysis, enhancing decision-making.
- Conducted cross-functional data analysis to generate insights for strategic planning.
- Led training sessions and developed documentation to improve analytical skills across the organization.
- Extracted, transformed, and analyzed financial datasets using SQL and Snowflake to optimize risk assessment strategies.
- Analyzed large financial datasets to identify trends, optimize risk management strategies, and support data-driven decision-making processes.
- Designed and developed interactive dashboards using Power BI and SQL Server, enabling real-time monitoring of financial KPIs and risk metrics.
- Collaborated with cross-functional teams, including finance, operations, and IT, to gather business requirements and develop actionable solutions.
- Conducted comprehensive financial forecasting and budgeting analysis to inform strategic planning and investment decisions.
- Implemented process improvements to streamline financial reporting workflows, reducing report generation time by 30%.
- Created and maintained detailed documentation, including business requirement documents (BRDs), functional specifications, and financial reports.
- Developed predictive models using Python and SQL to assess loan default risks, enhancing the bank's risk assessment capabilities.
- Worked closely with regulatory compliance teams to ensure adherence to RBI guidelines and internal audit requirements.
- Provided training and mentorship to junior analysts, fostering skill development in data analysis, reporting, and financial modeling.
- Monitored data usage trends and collaborated with stakeholders to enhance data governance.

Vizag Steel Plant Ltd., Visakhapatnam, India**FEB 2014– MAR 2018****Business Analyst**

- Served as liaison between the Business and Technology department.
- Involved in requirements gathering and system analysis to provide visibility to corporate customers.
- Developed Use Cases to outline the working of the application.
- Conducted JAD sessions to allow managers of different departments to communicate their perspectives with each other, resolve the issues, and come to an agreement quickly.
- Developed test plans and templates to be used by the project team with detailed screen layout regarding various types of corporate actions.
- Conducted specification reviews and walkthroughs with the designers, developers, and Executives.
- Used MS Visio to draw the diagrams required in the development efforts.
- Analyzed gaps in the requirement specifications, documented the information in detail, and provided feedback to the developers.
- Detail documentation of the business requirements and used Requisite Pro extensively for writing Business requirements.
- Facilitated Joint Requirement Planning (JRP) to reduce Scope creep and analyzed documents in requirements elicitation.
- Accountable for ensuring effective operations by identifying, evaluating, and coordinating development of system enhancements.
- Conducted User Acceptance Testing using the test cases before the release of Application.
- Uploaded the tested reports in Report Manager after successful testing.
- Actively involved in project meetings and Independent Verifications.
- Worked with the Project Manager on various Project Management activities like resources planning, Project status tracking, Deadlines, and Issues.

First Source Solutions Ltd, India**JUN 2013 – JAN 2014****Business Analyst Intern****Responsibilities:**

- Developed detailed product requirements and specifications.
- Conducted controlled brain-storming sessions with project focus groups
- Analyzed and prioritized user and business requirements as system requirements that must be included while developing the software
- Developed process / Sequence flow diagrams for application design specs and business process documentations with MS Visio along with deployment strategies and solutions design
- Facilitated all aspects of requirements management including elicitation and development of user requirements through final verification and validation of requirements with the customer
- Initiated and coordinated software development, interfaced between programmers and clients to translate functional specifications to business requirements
- Supported software development life cycle.
- Conducted customer research, competitive research and industry analysis, accessed and analyzed data, and conducted research to perform statistical analysis.
- Wrote Test Cases and developed strategies with Quality Assurance group to implement them.
- Extensive experience with User acceptance testing (UAT), System testing.
- Analyzed and prepared Performa Financial statements.
- Financial evaluation of the statements and balance sheets to find ways to reduce operating costs.
- Managed sales accounts by preparing and analyzing reports on sales and production and provided forecasts.
- Handled customer relations receiving and addressing client's feedback and complaints.

WORK HISTORY**Master of Science in Information Systems** – University of Memphis, Memphis, TN**Bachelors in business administration** – VELS University, Chennai, India
