

Priyanka Kondeti

Cloud Security/ Security Analyst

Plano, TX | priyankakondeti26@gmail.com | +1 469-573-0779 | [LinkedIn](#)

SUMMARY

- With 3 years of experience working as a **Security Risk Analyst, Cloud Security Engineer** and **AWS Security Engineer**
- In-depth knowledge of Cloud Computing Strategies (**IaaS, PaaS, SaaS**) & building, deploying in and maintaining the cloud environment.
- Worked on Enterprise Users **Single Sign On** through browser and through services with third party application hosted in enterprise or cloud using **Active Directory Federation Services**.
- Configured and supported **SAML 2.0** with various partners to create **SSO/FEDERATION** between our **Identity Provider** Landing page and **Service Provider's** Applications.
- In-Depth Knowledge with IAM principals (**Users, Groups, Roles, Policies**), Provided **Delegation** of Access between accounts using STS Assume Role Tokens Following hub and Spoke Model.
- Designed, Configured and managed public/private cloud infrastructures utilizing **Amazon Web Services (AWS) including EC2, Auto-Scaling, Elastic Load Balancer, S3, Cloud Front, RDS, VPC, Route53, Cloud Watch, Cloud Formation, IAM, Lambda, EBS, RDS, SNS, SQS**.
- Implemented **security standards** in the organization in accordance with **NIST guidelines**, and actively reviewed **ISO** and **SOC 2 reports** to ensure compliance and enhance the overall security posture.
- Conducted **security assessments** and **gap analyses** to identify vulnerabilities and recommend remediation measures.
- Implemented **defense in depth** and **incident response** strategies to protect networks, systems and data from cyber threats.
- Conducted regular reviews and updates of **runbooks and playbooks** to ensure standardized and efficient workflow.

TECHNICAL SKILLS

Cloud Security & Identity Management: AWS (Amazon Web Services), ADFS (Active Directory Federation Services), Identity Federation, SAML, OKTA Authentication, IAM (Identity and Access Management)

Programming & Scripting: Python, Bash, Shell Scripting, JavaScript, JSON

Cloud & Infrastructure Management: Terraform, Cloud Architecture Security, CI/CD Pipelines, Virtualization

Security & Risk Assessment: Risk Assessment, Risk Remediation, Data Access Control Measures, Data Classification, Security Policies, Compliance (ISO 27001, SOC2)

Threat Detection & Response: Incident Response, Penetration Testing, Vulnerability Management, Security Audits

Networking & Protocols: TCP/IP, Zero Trust Network Access, Access Control, WireShark

Security Tools & Automation: Splunk, Secrets Manager, ServiceNow, Automation Tools

PROFESSIONAL EXPERIENCE

Cloud Security Engineer

May 2023 - Current

Truist (Atlanta, GA)

- Worked on Enterprise Users **Single Sign On** through browser and through services with third party application hosted in enterprise or cloud using **Active Directory Federation Services**.
- Automated Pipeline of **Role Creation** that are used as Service Roles for **Cross-Account access**.
- Created and managed **IAM** roles through automation using **Terraform** to integrate into infrastructure.
- Configured and supported **SAML 2.0** with various partners to create **SSO/FEDERATION** between our **Identity Provider** Landing page and **Service Provider's** Applications.
- Automated Pipeline of Role Creation that are used as Service Roles for Cross-Account access.
- Used **IAM Access Analyzer** for access management and to identify the resources with elevated privileges.
- In-Depth Knowledge on **Terraform and IAM principals (Users, Groups, Roles, Policies)**, Provided **Delegation** of Access between accounts using STS Assume Role Tokens Following hub and Spoke Model.
- Designed **Secure architecture** in the cloud by identifying, designing, advising and implementing best security practices.
- Created and managed **IAM roles** through automation using **Terraform** to integrate into infrastructure. Worked with **different teams** to resolve the issues.
- Worked on developing **Permission Boundaries** based on roles like Network Admin's, Crypto Admin, WAF Admin and IAM Admin. Worked on **SCP's (Service Control Policies)** on the AWS organization level customizing account as per the permissions needed.
- Application Integration into the cloud Securely. Analyzed **Splunk** alerts and remediated those issues.
- Used **Secrets Manager** as a means of storage for secrets to use for authentication.
- Assisted in creating, setting up and maintaining **CI/CD solutions** by working with the development and Cloud Engineers team.
- Developed and maintained comprehensive **runbooks and playbooks** for **IAM procedures**.

Security Risk Analyst LinkedIn (Bay Area, CA)	Nov 2022 - Apr 2023
- As a Security risk analyst, assisted in incident response planning and participated in incident response activities, providing expertise in assessing and mitigating security risks during cyber incidents. - Evaluated the security risk with various SaaS applications. Worked and examined the data encryption, authentication mechanisms, access control and the application architecture. Identified the vulnerabilities with SaaS applications and assess the impact on security. This involves reviewing penetration testing, ISO 27001, SOC2 and the security policies. - Worked on vendor risk management by evaluating the security posture of SaaS vendors and assessing the risk associated with the third-party providers. Continuous monitored the security of SaaS applications and create the Issues to remediate the risk by interacting with the vendors and the business owners. - Conducted regular audits to analyze the security controls and security policies. - Developed strategies for risk mitigation associated by using SaaS solutions by identifying security risks to mitigate them.	

Computer Forensics Teaching Assistance University of North Texas (Denton, TX)	Sep 2022 - Dec 2022
- Collaborated with Students and Professor to create a revised lesson plan. - Assist faculty in conducting lectures and laboratory sessions. - Assisted students in evidence collection, preservation and analysis procedure. - Guided in documented findings and prepared reports. - Proficient in digital forensic tools such as EnCase and FTK. - Strong understanding of File system, Operating system and Network protocols. - Excellent Communication and interpersonal skills for effective engagement and support. - Skilled in preservation and chain of custody procedures. Improved 15% of Student grades by guiding them in labs, projects, course work and clearing doubts.	

Security Analyst PNG Cyber (Houston, TX)	May 2022 - Aug 2022
- Analyzed, monitored and investigated the cases on Business Email Compromise and Ransomware using Axiom tool, log analysis and filtering data. - Created assessment Reports for the client and explained them the risk and mitigation plan. - Collaborated with cross-functional teams to create runbooks to specific incident types, data breaches, malware infections and insider threat. - Developed test plans and edited tools by using Python to improve the accuracy. - Implemented Access Control techniques for the Client and reduced the risk by 20%. Scanned and Troubleshooted through different vulnerabilities, managed and suggested Prevention techniques for the client as a threat and incident response. - Collaborated with IT team to implement defense in depth and Zero Trust Network Access to enforce granular access control and reduce the attack surface.	

PROJECTS & PAPER PUBLICATIONS	
Fake Account Detection using Machine Learning.	
Published and Written paper in Springer, ICECMSN 2020 Proceedings available in online https://www.springer.com/gp/book/9789811552571. Applied this method on Twitter datasets that can be applied on all online social networks.	
Extracting Forensic Data from a device using Bulk Extractor.	
Published paper in Springer, ICSES 2020 conference proceedings are available online https://www.springer.com/gp/book/97898113343542. Described the techniques to extract the forensic data and obtained the accurate results.	

CERTIFICATIONS	
AWS Certified Cloud Practitioner. Certified AWS Security Specialist. Certified Ethical Hacker.	

EDUCATION	
University of North Texas, Denton, TX (USA)	Jan 2021- Dec 2022
Master’s in Cybersecurity GPA: 3.91/4	
K L University, Andhra Pradesh (India)	Jul 2016- May2020
Bachelor’s in Computer Science & Engineering GPA: 9.0/10
