EDUCATION

Pennsylvania State University, Master's in engineering management	August 2023- December 2024
Bachelors of Engineering in Electronics Engineering, Shri Ramdeobaba College of Engineering and Management, Nagpur, MH, India	August 2019- June 2022
Diploma in Electronics and Telecommunications, Government polytechnic Nagpur, MH, India	August 2016- May 2019

PROFESSIONAL EXPERIENCE

Webuls Technologies (Project Management Trainee)	February 2018 – July 2020
- Spearheaded the transition to Agile methodologies for a cross-functional team of 15, improving project completion rates by 20%. - Developed and maintained project schedules, milestones, and Gantt charts in MS Project, ensuring 95% on-time task completion. - Conducted weekly stand-ups and sprint retrospectives, increasing team efficiency by 30% and reducing overall project lead time.	
Project Silicon Valley (Operation Manager)	July 2020 – July 2021
- Played a key role in designing and implementing streamlined operational strategies to support a platform connecting 50+ small business groups, startups, and medium-sized enterprises. - Developed and monitored key performance indicators (KPIs) to measure the platform's impact on user success, achieving a 30% increase in user engagement over three months. - Introduced automation in onboarding and support processes, reducing response time for new users by 40%. - Curated and organized essential resources, including funding opportunities, mentorship programs, and networking events, enhancing platform utility for entrepreneurs.	
MY CAPTAIN (Marketing Head)	August 2021 – May 2022
- Achieved ₹256,000(USD 3500) in revenue in six months by implementing targeted digital marketing strategies, surpassing initial goals by 30%. - Recruited and led a diverse, PAN-India committee of over 50 members, fostering a collaborative environment focused on meeting revenue and engagement targets. - Orchestrated and shared best practices in lead generation and customer engagement, resulting in 100% of committee members meeting or exceeding their individual targets.	
Tech Mahindra (Associate Software Engineer)	May 2022 – June 2023
- Built an Employee Management System using Spring Boot, Hibernate, and PostgreSQL to manage records for over 500 employees, streamlining HR operations. - Designed and implemented a real-time analytics dashboard using React, JavaScript, and CSS for data visualization, resulting in a 25% improvement in management decision-making speed. - Devised CRUD functionality that reduced manual data entry time by 20%, enabling HR to process employee records 10% faster. - Deployed the application on a Linux server, reducing hosting costs by 15% while ensuring system scalability and 99.9% uptime.	

ACADEMIC PROJECTS

Optimizing Revenue and Efficiency for Spirit Airlines	August 2024- December 2024
- Leveraged real-time dynamic pricing adjustments, driving an increase in ancillary revenue streams by up to 15% through augmented service offerings. - Identified cost-saving measures through DEA analysis, leading to a 7% improvement in fuel efficiency and resource allocation. - Enhanced pricing strategies for better alignment with customer demand, contributing to a 10% increase in customer satisfaction scores as measured by post-flight surveys. - Integrated Monte Carlo simulations to forecast market and weather impacts, enhancing revenue predictability by reducing variance in revenue projections by 20%.	
IoT - Powered Smart Photovoltaic Charge Controller	February 2022- December 2022
- Engineered a prototype board with a microcontroller to control lead-acid battery charging, achieving a 25% faster charge cycle while ensuring 99.99% safe and complete charging processes. - Developed a real-time monitoring system that displayed critical metrics—solar voltage, battery consumption, and solar current—on a hardware display, increasing data accuracy by 30%. - Improved energy efficiency by 15% through optimized component integration, enhancing reliability and performance for renewable energy applications. - Presented a research paper in 4th International Conference on ICESC 2022 titled "IOT Powered Smart Photovoltaic Charge Controller", published in SSRG International Journal of Electrical and Electronics Engineering, vol. 10.	

TECHNICAL SKILLS

Programming: Java, C, C++, MySQL

Technological Skills - Internet of Things, Robotics, Embedded Systems, Digital Electronics, Systems on Chip, PCB Designing, Digital Communications, Analog Communications, Java, C, Cpp, MySQL, Multisim, Proteus, Arduino IDE, Visual Studio, Eagle, Excel, Precision Tree, Jira

Interpersonal Skills: Excellent Communication, Critical Thinking, Problem Solving, People Management, Strategic Management, Creativity and Innovative thinking, Negotiations, Marketing, Time Management, Digital Marketing, Public Relationship Management.
