Visa :H4 EAD
Location: TX
Java Full Stack developer

PROFESSIONAL SUMMARY:

- Around 6 years of experience in IT Industry as a Java/J2EE Developer involving in Analysis, Design, testing of web based and client server multi-tier applications which use Java/J2EE technologies.
- Strong experience in utilizing Agile, Scrum, Waterfall and Test-Driven Development (TDD) methodologies.
- Experience in Object Oriented Analysis and Design (OOAD) using different design methodologies/process frameworks like SDLC and tools like UML, MS Visio, Rational Rose.
- Strong expertise using Java 8,11,17 features like Streams, Lambda expressions etc
- Expertise on AngularJS controllers, model objects, directives, factory, service resources and routings.
- Strong experience in building rich UI and RWD applications using ReactJS, AngularJS, NodeJS, JavaScript, HTML5, CSS3, Bootstrap, JSP, JSTL, JSON, Ajax and JQuery.
- Experience in developing application in Single Page (SPA) using various JavaScript frameworks such as AngularJS and ReactJS.
- Experience in Core Java concepts such as OOPS, Collections, Threading, generics, Exception handling, Multi-Threading, Execution services, concurrent utilities, File IO, Garbage Collection and Serialization.
- Well versed in MVC Model View Controller architecture using Spring and implementing JSTL JSP Standard tag library, custom tag development and tiles. Experience on YARN environment with Storm, Spark, Kafka and Avro
- Experience in JSP, Java Beans and Servlets for developing applications using MVC architecture.
- Good Exposure to Web/application servers such as Apache Tomcat, WebLogic, WebSphere.
- Experience in developing various UML designs like class diagrams, cases and sequence diagrams using Rational Rose.
- Strong experience with tools like Rational Rose rational, CVS project management and SVN.
- Experience in using IDEs like Eclipse, NetBeans and Spring Tool Suite STS.
- Extensive experience in code re-factoring, developing standards and mentoring the team
- Developed different Web components such as JSPs, Servlets, Custom Tag Handlers and business components such as Web Services. Used Kubernetes to orchestrate the deployment, scaling and management of Docker Containers.
- Hands on Experience in the design and development of SOA Architecture for publishing as well as consuming web services, development of Workflows for exposing Web services using SOAP and Restful.
- Strong work experience in Web based application development, Database programming, distributed computing, Server-side programming and Client Server computing in multi-threaded software systems using Java technologies.
- Experience in working with different operating systems like Windows and UNIX/Linux.
- Extensive experience in using IDEs like Eclipse, Spring Tool Suite and version control tools like SVN, Git.
- Strong experience in continuous integration and TDD Test Driven Development.
- Extensive experience working with AWS provided Solutions like EC2, ELB, VPC, Route 53, RDS, S3, IA CloudWatch.
- Hands on experience with build tools like ANT, Maven, Gradle and Involved in bug and issue tracking through JIRA.
- Hands on experience in implementation of PCF (Pivotal Cloud Foundry) and Expertise in unit-testing with tools like JUnit, Mockito, Spock, Integration testing tools like Selenium Web Driver, Cucumber.
- Good understanding of Pivotal cloud foundry (PCF) Architecture (Diego Architecture), PCF components and their functionalities.
- Experienced in using Pivotal Cloud Foundry (PCF) CLI for deploying applications and other CF management activities.

TECHNICAL SKILLS:

Languages	17/11/8/7, JavaScript, XML
Technologies	Java Servlets, JSP2.0, HTML5, AJAX, XHTML, DHTML, CSS3, Flash, Java Script2.0, Angular JS, Node JS, Ext JS,ReactJS, BootStrap4, JMS,Kafka, kotlin.
Tools and Framework	Spring 4.x, Spring MVC, Spring IOC, Spring Cloud, Struts 1.3/2.0, Hibernate, JSF, Spring Boot, Spring Security, Apache CXF, Groovy Grails, myBatis.
Scripting Languages	Java script, HTML5, CSS3, AJAX, XML, Angular 9/11/13
Databases & Clients	Oracle 8i/9i/10g/11g, DB2, MySQL 5.x, SQL Server 12.0
Version Control	Git, Bit-Bucket, CVS and SVN
Web Services	SOAP, JAX-RS, JAX-WS, WSDL, UDDI, JAXP, JAXB, Apache Axis
Web Servers	Apache Tomcat, JBoss, GlassFish Server, WebSphere 8.5
Methodologies	Rational Unified Process, Agile, Scrum, Test Driven Development

IDE & Containerization	Eclipse, Visual Studio, Apache Tomcat, Docker
Tools	Selenium, Cucumber, JUnit, Rational Rose, UML, Rational Clear case, CVS, Mocka, Karma.
Cloud Technologies	AWS-EC2, S3, VPC, Jenkins, Cloud Watch, PCF
Project Tools & Build Script	Jira, Bugzilla & Jenkins, Gradle, Maven
OS & Environment	Windows, Unix, Linux and Mac

PROFESSIONAL EXPERIENCE:

Encore Bank , Little Rock, AR
Senior Java Full Stack developer

Dec 2022 – Present

Responsibilities:

- Developed dynamic and browser compatible pages using HTML5, CSS3, JQuery, ReactJS and JavaScript.
- Implemented various screens for the front-end using ReactJS and various predefined components from NPM (Node Package Manager), Bower and Redux Library for dependency management.
- Created various template and data-driven form components using React Forms and defined module-level routing various components in the application using React-Router.
- Implemented new APIs using Restful Web Services using Spring Boot to interact with mobile application and client's legacy systems.
- Implemented Spring Rest Controller classes for request handling, Service classes for business logic, and DAO persistent layer classes using Hibernate ORM.
- Implemented Batch employments utilizing Spring Batch made different thing peruses, thing essayists and thing processors.
- Utilized AWS Lambda platform to upload data into AWS S3 buckets and to trigger other Lambda functions (EC2, MongoDB) focusing on high availability, fault tolerance, and auto-scaling).
- Worked on multiple AWS instances, set the Security Groups, Elastic Load Balancers (ELB) and AMIs, Auto scaling to design cost effective, fault tolerant, and highly available systems.
- Implemented authentication and authorization for the application using Spring Security and OAuth2.0.
- Developed API's and REST API proxy using APIGEE Edge for sending mobile notifications, implemented payment gateway on APIGEE Edge API Management platform.
- Used AWS CloudWatch in maintaining and monitoring production and corporate storage.
- Worked on Swagger API and auto-generated documentation for all REST calls.
- Designed and enhanced Kafka producers to stream the data from external Rest APIs to Kafka topics.
- Deployed Spring Boot based Microservices in Docker Container by using AWS Admin Console.
- Implemented Kubernetes manifests, helm charts for deployment of microservices into K8s clusters.
- Developed strategies & tools to create an efficient automated integration and release process using Jenkins.
- Used GitHub to maintain the version of the files, code merges and created new branch when new feature implementation starts.
- Used Maven for building and deploying the web application into Apache Tomcat.
- Wrote test cases using JUnit framework to validate the application flows in different scenarios.
- Extensively used Spring Tool Suite (STS) IDE for developing, debugging, integrating and deploying the application.
- Actively used the defect tracking tool JIRA to create and track the defects during QA phase of the project.

Environment: Java 17/11, Intel J, HTML5, CSS3, Bootstrap, JIRA, Hibernate, JavaScript, Spring Boot, React JS, Spring MVC, JMS, JMeter, Jenkins, Ext JS, Ant, Maven, Docker, SQL, Restful Web Services, jQuery, Insomnia, AWS, PCF, Kafka, Microservices, Selenium, Cucumber, Kotlin.

Spring Health, New York, NY
Java Full Stack Developer

Oct 2020 - Nov 2022

Responsibilities:

- Designed and developed presentation layer using JSP which acts as View in a distributed MVC architecture, which involves model components and controller components.
- Used Spring as application framework to build the service layer and implemented its core modules such as Spring Boot, Spring Core Container, Inversion of Control, Data Access and MVC.
- Used Log4j for logging, debugging, testing purposes and maintaining system state.
- Used JIRA tool for tracking new requirements, enhancements and bugs.
- Created Spring Controllers and integrated with Business Components and View Components.
- Configured Spring Security in the application to secure the method calls and RESTful web services.
- Authenticated Users and provided security to Restful web services using OAuth 2.0.
- Used Object/Relational mapping tool Hibernate and JPA to achieve object to database table persistency.
- Developed the UI using HTML, JSF, JQuery, CSS, and JavaScript and used Ajax to make calls to other services.

- Developing a presentation layer using Spring MVC and various web technologies like HTML5, Angular and CSS and implementing a business/service layer using Spring CORE, DI and AOP.
- Developing persistence layer with Hibernate with JPA standards to interact and perform CRUD operations with OracleDB2 database.
- Created Angular13 components, implemented interpolation, input variables, Bootstrapping, Ng For, Ngif, Router Outlet, binding the events, decorators.
- Used RxJS catch library and catch functions to handle error handling in Angular11 Application.
- Created Angular components like Controller, Directives, Services and Forms to collect the input from the User.
- Used Angular13 for Client-side validations while rendering JSON validation errors in the backend.
- Developed Angular13 Template driven forms and Model driven forms builder by using Ng Model.
- Involved in developing Responsive UI pages using jQuery, Angular 11 using Ajax calls for UI interactions.
- Created multiple reusable UI Directives by defining AngularJS Directives, Attaching Event Listeners, Controllers and updating DOM elements.
- Implemented Microservice Architecture with Spring Boot based RESTful services and consumed SOAP based Web Services.
- Used Spring Batch for scheduling and maintenance of batch jobs.
- Defined AWS Security Groups which acted as virtual firewalls that controlled the traffic allowed reaching one or more AWS EC2 instances.
- Used Spring Kafka framework to publish and consumer messages into/from Kafka Cluster.
- Created and configured EC2 instances on Amazon Web Services (AWS) for establishing clusters on cloud, and configured the storage on S3 buckets.
- Scheduled the build process for software applications and staging it to QA, UAT and production environments.
- Implemented CI/CD pipelines using Jenkins and build and deploy the applications.
- Utilized Source Control Management Systems GIT to track and manage changes to code.
- Deployed web application components on Tomcat server for development and test environments.
- Used Maven as a build tool and retrieved all the dependencies required for the application.
- Used Eclipse Integrated Development Environment for coding, debugging, and testing application modules.
- Wrote & executed various SQL Queries and PL/SQL programs to retrieve the data from the database Oracle.
- Developed test cases using JUnit for unit testing as well as integration testing.
- Participated in daily scrum meetings and reviews with sprint deliveries as part of Agile development environment.

Environment: Java 11/8, Spring, Hibernate, Amazon Web Services (AWS), Angular11/13, HTML5, CSS3, Ajax, JavaScript, JQuery, Bootstrap, JSP, JPA, SOAP, Restful Web Services, OAuth 2.0, Maven, Jenkins, GIT, Apache Tomcat, Oracle, Eclipse IDE, Junit, Log4j, Jira

Lexington National Insurance, Baltimore, MD

Dec 2018 – Sep 2020

Java Full Stack developer

Responsibilities:

- Transformed wireframes and visual designs into compelling production user experiences using JavaScript library React JS as well as HTML5 and CSS3 for a Web application.
- Used SASS for CSS generation for the web pages and spring templates in ES6 for dynamic binding on the web pages.
- Implemented Angular 7 techniques like Lazy loading and pipe transformations of data including adding extra token at the time of Authentication of restful services to third party API calls.
- Molded complete application into a responsive layout that is adaptable on all the screens using Media Queries and Bootstrap.
- Developed and Integrated of REST APIs and services using Fetch API.
- Optimized application by systematically arranging components and reusing the components.
- Debugged the application using Firebug to traverse the documents and manipulated the Nodes using DOM and DOM Functions using Firefox and IE Developer Toolbar for IE.
- Responsible to generate an Application Log file and monitoring the archived in application log folder.
- Appreciated for boosting product marketing and brand development by introducing new layouts.
- Experience working with various application servers using glass fish.
- Implemented the concepts of Angular 7 Templates, directives, Routing and navigation, Components, Services, and Data binding to deliver a scalable code for SPA.
- Used Spring Framework for bean instantiation, annotations, controllers, request mapping to handle the web service request and response. Developed micro-services using Spring MVC and Spring Boot.
- Implemented RESTful Web service for distributed systems using the Jersey framework to retrieve data from the client side.
- Used Hibernate to develop a proper data flow by generating a mapping document for persistence classes.
- Created deployment package and solely responsible to deploy the project on Development, QA server.
- Used core java for application development along with spring, Hibernate, Restful web services, Cassandra, and JMS.
- Inspected and maintained version control using Git branching strategy.

- Used Jasmine and Log4j for testing the JavaScript functionality and Karma for running the tests.
- Responsible to maintain the unit test case using the Jest snapshots.

Environment: HTML5, CSS3, JavaScript, TypeScript, AJAX, jQuery, JSON, DOM, XML, XHTML, W3C, Responsive Web Design, React, Redux, Angular7/9, Ext.js, Bootstrap, Node.js, Express.js, Java, Spring MVC, Junit, Spring Boot, Log4j, Spring Data, Maven, WebSphere, Oracle, MongoDB, Jasmine, Karma, Git, JIRA, Jest, Glassfish.

Education :-

Masters of Business Administration Marketing and Business Analytics

New Horizon College of Engineering 2016-2018, Bengaluru, India.

Bachelor of Engineering Telecommunication Engineering

Bangalore Institute of Technology 2012-2016, Bengaluru, India.
