

Pulukollu Keerthana

Overland Park, Kansas | 9135966027 | Keerthi84890@gmail.com

Objective

Results-driven Robotic Process Automation (RPA) Developer with 3 years of experience in designing, developing, and deploying automation solutions using Automation Anywhere (v11 & A360), Microsoft Power Automate, and UiPath. Adept at streamlining business processes, reducing manual efforts, and improving operational efficiency across finance and supply chain domains. Expertise in end-to-end RPA project execution, including requirement analysis, bot development, testing, deployment, and production support.

Skills

- RPA Tools: Automation Anywhere (v11, A360), Microsoft Power Automate, UiPath
- Automation Development: Designing, developing, and deploying bots, production support
- Scripting & Databases: VBScript, SQL (SQL Server, MySQL)
- Process Automation: Web applications, Excel, SAP automation, OCR-based data extraction
- Cloud & DevOps: Microsoft Azure, Power Platform, Git, GitHub, Agile (Scrum)
- Integration Expertise: SAP, OpenText, SharePoint, MetaBots, TaskBots, Macros
- Strong analytical and problem-solving skills.
- Excellent communication skills for interacting with clients and cross-functional teams.
- Ability to work in a fast-paced, deadline-driven environment.

Key Abilities

Automation Governance & Compliance: Ensured RPA solutions adhered to industry standards and regulatory compliance, implementing secure and auditable automation workflows.

Scalability & Reusability: Designed reusable automation components and frameworks, enabling rapid deployment and scalability across multiple business functions.

AI & Intelligent Automation Integration: Integrated AI-powered OCR and machine learning models with RPA bots to enhance data extraction, validation, and decision-making capabilities.

Cross-Platform Integration: Automated end-to-end processes by seamlessly integrating UiPath and Automation Anywhere bots with ERP, CRM, and legacy systems.

Monitoring & Continuous Improvement: Established bot performance monitoring mechanisms, proactively identifying optimization opportunities to enhance automation efficiency.

Change Management & Adoption: Led change management initiatives, driving organization-wide RPA adoption and ensuring smooth transition to automated workflows.

Experience

RPA Developer | CNA Financial | Chicago, IL | Apr 2024 – Present

- Developed and deployed end-to-end automation solutions using UiPath, reducing manual effort and increasing process efficiency.
- Designed and implemented UiPath workflows to automate repetitive business processes, improving accuracy and reducing turnaround time.
- Created and managed Orchestrator-based automation, enabling centralized bot scheduling, monitoring, and performance tracking.
- Automated data extraction, validation, and processing from PDFs, emails, and web applications using UiPath's built-in activities.
- Integrated UiPath bots with SAP, Excel, Outlook, and databases, facilitating seamless data exchange across multiple enterprise systems.
- Developed custom activities and reusable components in UiPath, enhancing workflow efficiency and scalability.
- Conducted end-to-end testing and debugging of automation scripts to ensure high performance and compliance with business requirements.
- Built attended and unattended bots to handle different automation scenarios, optimizing user interactions and background process execution.
- Utilized AI-powered document understanding in UiPath to automate processing of structured and unstructured data.
- Collaborated with business analysts and stakeholders to analyze automation feasibility, define project scope, and implement cost-effective solutions.
- Implemented error handling, logging, and exception management within UiPath workflows to ensure stability and reliability.
- Designed robotic solutions for data migration and reconciliation, eliminating inconsistencies and ensuring data integrity.
- Automated web scraping and data aggregation using UiPath to collect insights from online sources and enterprise systems.
- Created and maintained UiPath libraries and templates, promoting reusability and standardization across automation projects.
- Provided training and mentorship to team members, sharing best practices in UiPath development and RPA deployment.
- Optimized existing UiPath workflows to improve execution speed, reduce resource consumption, and enhance overall efficiency.
- Integrated UiPath bots with APIs and third-party applications, enabling seamless automation of cross-platform processes.
- Conducted process discovery and documentation, identifying automation opportunities and defining structured implementation plans.
- Led UiPath COE (Center of Excellence) initiatives, promoting RPA adoption and governance across the organization.

RPA Consultant | Cognizant (CTS) | India | Apr 2021 – Apr 2023

- Performed comprehensive end-to-end testing of automated solutions to ensure high-quality performance and compliance with business standards.

- Engaged with stakeholders to develop automation strategies that improved workflow efficiency and data integrity.
- Built and deployed bots to manage large datasets from Excel, email, and databases, integrating them with SAP for real-time processing.
- Delivered hands-on training and support to colleagues and end-users, fostering best practices in RPA development and automation techniques.
- Debugged and fine-tuned VBScript within automation workflows to boost efficiency, reduce execution times, and ensure reliable bot operations.
- Utilized VBScript for automating complex processes, including system configurations, accessing hidden functions, and handling applications with limited RPA compatibility.
- Integrated VBScript with DLLs to develop advanced bots capable of executing complex business rules, handling exceptions, and improving automation reliability.
- Automated Excel-based workflows using Macros, seamlessly integrating them with RPA bots for enhanced reporting, data processing, and cross-system calculations.
- Managed bot performance tracking and optimization, ensuring automation solutions adapted to evolving business processes and requirements.
- Designed and deployed RPA solutions using Automation Anywhere v11 to automate inventory management, minimizing manual effort and enhancing process efficiency.
- Developed Meta Bots and Task Bots to streamline repetitive SAP tasks, such as processing material numbers and movement types, leading to significant time savings.
- Automated data flow between Excel, SAP, and email systems, improving data accuracy and reducing manual intervention.
- Partnered with business teams to define automation requirements, ensuring solutions aligned with key operational objectives.
- Created and maintained VBScript-based automation scripts to enhance bot functionality and enable seamless integration across various systems.
- Provided post-implementation support, continuously monitoring bot performance and optimizing workflows to maintain peak efficiency.
- Led internal knowledge-sharing initiatives, conducting training sessions on RPA tools, methodologies, and best practices.
- Worked closely with cross-functional teams to refine automation workflows, implementing enhancements and resolving issues promptly.

Education

University of Central Missouri | Masters in Computer Science | May 2023-Dec 2024

Panimalar Institute of Technology | Bachelors in Information Technology | June 2018 – May 2022

Certifications

- **Automation Anywhere v11 – Advanced & Masters Certified**
- **Automation Anywhere A360 – Advanced & Masters Certified**
- **DP900 – Microsoft Azure Data Fundamentals.**
- **PL300 – Power BI Data Analyst**
