Chicago, USA

Quality Assurance Engineer | ISTQB Certified

SUMMARY

Quality Assurance Engineer with over 5 years of experience testing Web and Mobile (iOS/Android) applications across logistics, e-commerce, retail, and payments domains. Skilled in developing comprehensive test documentation, including Test Plans, Test Cases, Checklists, and Defect Reports. Demonstrates in-depth knowledge of SDLC, STLC, Bug Life Cycle, and Defect Triage processes. Proactive self-starter with meticulous attention to detail, dedicated to enhancing end-user experiences and ensuring high-quality releases. An organized, positive, and collaborative team player committed to product improvement and effective communication within cross-functional teams

SKILLS

- Black/Grey/White box testing,
- Web/Desktop/Mobile testing
- ADB commands, Android Studio, XCode
- Performance, Security, Regression, Sanity, Smoke, User Acceptance, Accessibility testing
- Test design techniques
- Test documentation: Test plan, Test cases, Checklists, Bug reports
- Knowledge of SDLC, STLS
- Agile concepts knowledge (Scrum, Kanban)
- SQL (MySQL, SQLite)
- Tools: Jira, TestRail, Git/Github, Postman
- Web Understanding (Client-Server Architecture, HTML/CSS)
- OS: Windows, Linux, Mac OS
- JavaScript
- REST API (Postman)
- Chrome Devtools, Charles Proxy

EDUCATION

Master's degree in Computer Science
Lviv, Ukraine, 2013 - 2018

ADDITIONAL EDUCATION

- [QA Course at Mate Academy \(Manual QA\)](#)
- [SQL Basics Course at Mate Academy](#)
- [JavaScript Basics Course at Mate Academy](#)
- [Software Testing Introduction Self-paced Program at EPAM Ukraine](#)
- [The Fundamentals of Software Testing in QATestLab Training Center](#)

LANGUAGES

- English
- Ukrainian

EXPERIENCE

QA Engineer

CodeGeeks Solutions, New York, USA

October 2023 - Present

Project: CarGo Health logistics platform

- Create, execute, and maintain detailed, comprehensive, and well-structured test plans, test suites, and test cases
- Perform functional, regression, smoke, user acceptance(UAT), integration, E2E testing, run backend API testing utilizing Postman, Charles Proxy, verify output based on specification
- Review the Figma design of the landing page to understand the intended layout, user flow, and design elements
- Utilize Unix/Linux, adb commands daily
- Lead defect triaging and escalate issues as necessary
- Fill comprehensive defects reports and feature requests, and follow them up until completion using JIRA
- Work in an Agile environment, attend the weekly meetings to update on upcoming features and bugs and as a result, have helped decrease the communication gaps across teams
- Recreate complex customer and production-reported issues to determine root cause and verify the fix
- Close collaboration with product, design, and engineering teams in terms of reviewing requirements for new/existing features, defects discussion/reproducing, and finding how to resolve them
- Built a relationship with the Customer Support team in terms of reviewing customer feedback, analyzing known issues, and encountering potential workarounds
- Implemented a shift-left methodology, enabling QA Engineers to contribute actively at the earliest stages of SDLC for enhanced quality and efficiency

QA Analyst

Joyn.de, Germany

Sep, 2020 - Feb, 2023

Project: Owned testing for Web-based and Mobile streaming platforms for watching TV and movies on the European market

- Designed permission table and Requirements Traceability Matrix
- Developed, executed, and maintained Test Plans, Test suites, Test cases in TestRail
- Reported defects, feature enhancements to Jira
- Created well-structured and detailed test reports
- Utilized Android Studio, Genymotion
- Requirements reviewing with the Product Owner (Story refinement)
- Ran SQL queries for data validation
- Performed Accessibility testing: VoiceOver, Talk back
