PROFILE

Senior Project/Program manager and Agile Scrum Master proficient at supporting moderately and highly complex business processes while aligning creative and innovative solutions with ever evolving strategies. Known for possessing a broad understanding of technological trends and strategic direction, while consistently meeting project deadlines with solutions that dissolve root issues. Has shown a proven ability to cultivate positive relationships within digital, media, strategy, sports, engineering and consulting environments.

PROFESSIONAL EXPERIENCE

Appen

Houston, Texas

Senior Project Manager – A.I Data Collection Team

Nov 2024 - Present

- Led the overall service delivery and team management of generative AI solutions for Meta. AI Initiatives included projects related to data annotation, data sourcing, large language model, computer vision, and speech recognition.
- Built and managed a team of 100 proficient contributors to ensure they met or exceeded quality and productivity targets while communicating service level expectations. Provided guidance, feedback, and training to team members based on metric-driven performance data standards.
- Communicated directly with Meta using proper escalation procedures for both production-related questions and technical issues, while sharing trends and insights to help provide the client with the highest quality and quantity of data.
- Responsible for ensuring the productivity, quality, and production hour goals were met on a daily, weekly, and monthly basis to improve project profitability while presenting the described metrics in departmental project reviews and weekly business review meetings.
- Coordinated all technical activities as required for project delivery including technical set up, workflow design, quality assurance process design and project delivery itself via Appen or Meta project systems.
- Solicited and used input and feedback from the client, crowd, and internal stakeholders to help drive efficiencies and improve quality plans.

Conviva

New York City

Senior Technical Project Manager – Global Integration Services

Dec 2022 - Oct 2024

- Led the Global Services software integration engagement for accounts such as Major League Baseball, Fox Corporation, Univision Television Company, Sirius XM, and Warner Brothers Discovery. Served as the bridge between the client and the internal product, engineering, sales, and marketing teams.
- Worked with client teams to define AI alert roadmaps, vision, and strategy that aligned with overall long term product strategy of the account.
- Managed the Video and Ad Experience integration process that produced real time monitoring and analytics in a single workflow; provided clients with Live, Ad, Streaming, and performance improvement metrics used to identify areas of growth, productivity and profitability.
- Collaborated with senior management, QA, UX, product, and a diverse group of stakeholders to ensure coordination on iOS, Android, Roku, Fire TV, Tizen and Web service platforms, while bringing the product roadmap, strategy, and vision together for continuous improvement.
- Advised and guided cross-functional delivery teams within agile based environments while acting as a conduit to understand customer and user data; Used strong analytical and interpersonal communication skills that drove effective client solutions and quality of experience
- Managed all aspects of technical planning, SDK integration, scope, status updates, risk mitigation tracking, and validation build testing. Owned delivery of validation results and providing summary of issues discovered, impacted metrics, and next steps for corrective actions.

Accenture

Houston, Texas

Project Manager – Innovation Hub

Sept 2019-Oct 2021

- Delivery Lead/Project Manager for project teams based out of Accenture's Houston Innovation Hub. Managed a multidisciplinary team of designers, developers, and other technology experts who worked with clients to investigate, imagine and bring to life new ideas.
- Responsible for the creation and ongoing management of the project schedule, agile ceremonies, effective communication processes, meeting cadence and all ad-hoc activities within the project.
- Drove risk management and change management activities and processes when appropriate, as well as performed scope and stakeholder identification, project decomposition, and verification activities when necessary
- Proactively coached project resources to increase their effectiveness and velocity, while also providing feedback to management regarding employee performance and long-term career goals
- Ensured the scope of the project was understood by stakeholders while also demonstrating business savvy building client relationships

Hewlett-Packard Enterprise

Houston, Texas

Engineering Project Specialist II – Global Engineering Services, EG Supply Chain

Sept 2015-March 2018

- Agile Scrum Master for the Common Components division of Global Engineering Services, EG Supply Chain
- Coordinated multiple projects within a large-scale program involving one or more functions driving the engineering development and implementation process for products and/or service offerings
- Coordinated the activities of project teams; tracked progress against established plans and reported results to program manager
- Developed program communications, including creation of status reports and summaries, tracking escalations and resolutions of issues, coordinating stakeholder meetings and updates, and updating project and program plans
