Software Developer-IT Professional with experience in back-end programming languages in Front-end Angular and back-end in JAVA (8, 11, 17) and relational and non-relational databases. I have developed and implemented platforms for the banking and financial sector and large companies with millions of customers. The programs and projects I have led involved the development of APIs that respond quickly and efficiently to thousands of simultaneous user requests, while maintaining the performance of the platforms. My experience ranges from code development, through solution design and architecture, to managing teams of developers.

Objective: Seeking a professional opportunity that facilitates the advancement of my career as a software developer. Committed to leveraging my extensive experience and technological expertise to contribute significantly to companies' success. Dedicated to delivering efficient and effective results in software development, showcasing leadership skills, and ensuring the successful execution of projects, ranging from small-scale initiatives to large-scale endeavors. Eager to continually enhance my abilities in navigating software development and offering innovative solutions for software design, technology implementation, and results optimization.

Professional Experience:

Concession RUNT S.A.

Nov 2022 – Present

Senior Developer

Responsibilities:

- Designing solutions and architectures from Front-end to back-end and finally data base.
- Developing Rest services in Java and Angular that respond to a high demand for requests.
- Leading development team Juniors.

Movii - Moviiired

Nov 2021 – Oct 2022

Senior Developer

Responsibilities:

- Developing Rest services in Java and Angular that respond to a high demand for requests.
- Resolving bugs in the production environment quickly and efficiently.
- Implementing new technologies that allow the company to move forward.

Complement 360

Jul 2020 – Oct 2021

Senior Developer

Responsibilities:

- Developing Rest and Soap services for integrations with AZURE and AWS platforms.
- Integrating with legacy developments and Mahindra core.

INACTION SAS

Nov 2019 – June 2020

Mid-level Developer

Responsibilities:

- Developing Java services for integrations with fiduciary platforms.
- Developing in PL/SQL on oracle databases.
- Developing with Forms and Reports and Sentences SQL.

Bank of Bogota

Oct 2018 – Oct 2019

Junior Developer

Responsibilities:

- Integrating Rest and Soap services with legacy platforms.
- Front-end services integration with in-house platforms.

College Education:

Francisco José De Caldas District University. Bogotá, Colombia.
Systems-Engineering, bachelor's degree.

Jan, 2010 – Sept 2017

Other Studies:

- APIXCLOUD TRAINING – Microservices Architectural
- CODEBYTES COURSES – Hexagonal Architecture
- UDEMY - Kubernetes and Docker
- UDEMY – ANGULAR-JAVA-PATTERN PORTS AND ADAPTERS
- PLATZY – JAVA – ANGULAR – JUNIT – GIT

Systems Skills:

Programming languages: Java (6, 8, 17) EE, Spring Framework (Spring Boot, Spring MVC, Spring JPA), Hibernate. RESTful	Building Tools: Maven, Gradel and Xml	Cloud Services: Azure & AWS: DevOps, GIT, Pipelines
Database: Oracle, MySQL, Microsoft SQL, MongoDB, Postgres	Repositories: GIT, GitHub, GitLab, Azure	Front-End: Angular (17), Html, CSS, TypeScript

Professional Skills & Soft Skills

Professional Skills: • Methodologies: Scrum, Waterfall, RAD, XP. • Docker, Kubernetes & manifest configuration. • PL/SQL, Store procedures, Query SQL. • Orchestrate microservices, developments in environments Unix & Linux. • Kafka, RabbitMQ.	Soft Skills: • Leading development teams. • Implementing Design Patterns • Design, implement and run Microservices • Design, implement and run development architectures
--	--

Special Projects

- RUNT: SSIS Project. I have been working on a service indicator monitoring system, as a technical leader and as a Senior Developer, with technologies such as: JAVA 17, Angular, JUNIT, GIT Repository, AZURE-DEVOPS, Kafka, ETL, SOLID principles and design patterns; Achieving small response times with high volume of data and responding to a high demand of requests.
- MOVII : I worked as a Senior Developer, with REST-API and SOAP services, JAVA 17 & JAVA 8, Angular, JUNIT, GIT, AZURE-DEVOPS; I applied hexagonal architecture, SOLID principles, and design patterns. This project is used by citizens of Colombia, as a digital solution of personal money management in a digital wallet called Movii.
- Bank of Bogota: Migration of legacy software, I worked as a Junior Developer, developing REST-API and SOAP services in JAVA 8 and Apache containers, we migrated old services to microservices. The results have impacted millions of people associated to Bogota bank in Colombia.
