[713-297-1108 | deamran@gmail.com | Lyndhurst, NJ, 07071]

EDUCATION

Bachelor in Science, Computer Science
University of Houston - Houston, Texas

12/2022

SKILLS

- Spring Framework
- Bash/UNIX
- Python, C++, Java, SQL
- Documentation writing
- Source and version control: git/github
- Agile methodology
- JUnit testing
- Code debugging

WORK EXPERIENCE

Java Programmer | Citibank - Rutherford, NJ

06/2023 - Current

- Increased application stability by identifying and resolving critical bugs through testing.
- Documented technical specifications clearly for future reference when troubleshooting complex issues or making modifications.
- Contributed to the development of risk-analysis software using Agile methodologies.
- Reduced software bugs by conducting thorough unit testing and collaborating with QA

Student Research Assistant | UT Health, SBMI - Houston, TX

06/2021 - 09/2021

Summarized data and provided analysis on academic articles using drug combination therapy to treat Alzheimer's disease/dementia.

- Examined articles from several academic journal databases
- Populated information into spreadsheet to create usable machine learning data
- Provided explanations on keyword criteria for drug synergy
- Collaborated with supervisor and graduate student on special case experimental drugs

PROJECTS

Air Quality Prediction Project | University of Houston

Created a Recurrent Neural Network to predict the air quality index for cities in the United States with Python using Google Colab

- Produced visuals with matplotlib and seaborn to highlight key trends in the data
 - Cleaned and prepared data using numpy and pandas
 - Partitioned data into time-based windows for training and testing
 - Evaluated results of LSTM for hyperparameter tuning
-
