

ROHITH BODDULA

Senior Full Stack Java Developer | Microservices | React.js | AWS/Azure Cloud | Kafka | DevOps & CI/CD

Phone: 321-300-5757 | Email: rohith.b9866@gmail.com

Linked IN: <https://www.linkedin.com/in/rohith-boddula-456a5b227/>

Carrier Objective

Experienced Senior Full Stack Java Developer with 12+ years of hands-on expertise in designing, developing, modernizing, and deploying scalable web-based applications using Java/J2EE technologies, Spring Boot microservices, React.js, Angular, and cloud-native architectures. Proficient in Core Java 17, Spring Cloud, Hibernate, JPA, RESTful APIs, Kafka, AWS, Azure, Docker, Kubernetes, CI/CD pipelines, and Agile/Scrum methodologies. Skilled in full-stack development, including frontend (React.js, Angular 11, TypeScript), backend (Spring Boot, Microservices, Event-Driven Architecture), and DevOps practices. Experienced in leveraging AI tools like GitHub Copilot for efficient coding, performance tuning, security protocols (SAML, JWT, OAuth), and migrating monolithic apps to microservices. Seeking to contribute to mission-critical applications, digital transformations, and high-performance systems in a dynamic team environment.

Professional Summary

- Experienced in implementing Enterprise Applications with each phase of Software Development Life Cycle (SDLC) including Requirements gathering, Analysis, Design, Reviews, Coding, Unit, and Integration Testing.
- Designed & developed several multi-tiers Web based, Standalone, Distributed, Client-Server and Multithreaded applications using Object Oriented Analysis and Design (OOAD) concepts and Service Oriented Architecture (SOA) mostly in cross-platform environments.
- Senior Full Stack Java Developer with 12+ years of experience in designing, developing, and modernizing enterprise-grade web and cloud applications.
- Expertise in Core Java (8–17), J2EE, Spring Boot, Spring Cloud, and Microservices architecture for scalable, secure, and high-performance solutions.
- Strong hands-on development in front-end frameworks including React.js, Angular 11+, TypeScript, JavaScript (ES6+), HTML5, and CSS3.
- Proficient in building RESTful and SOAP APIs, integrating with distributed systems, and implementing event-driven architecture using Kafka, JMS, and RabbitMQ.
- I am skilled in cloud-native application development with AWS (EC2, EKS, Lambda, S3, CloudFormation) and Azure (Event Hub, App Services, Spring Apps).
- Experience with containerization and orchestration using Docker, Kubernetes, and Terraform (IaC).
- Solid background in database design and development using Oracle, PostgreSQL, MongoDB, Cassandra, and DynamoDB with expertise in SQL performance tuning.
- Strong knowledge of CI/CD pipelines and DevOps practices using Jenkins, GitHub Actions, Maven, Gradle, Ansible, and Nexus.
- Experienced in implementing enterprise security with OAuth2, JWT, and SAML along with Spring Security and Fortify integration.
- Proficient in automated testing and quality engineering with JUnit, Mockito, Selenium, Cypress, JMeter, and Cucumber.
- Hands-on exposure to GitHub Copilot and AI-assisted coding practices for accelerating development and improving code quality.
- Familiar with monitoring and observability tools including ELK Stack, Splunk, Datadog, CloudWatch, and Dynatrace.
- Strong understanding of design patterns, domain-driven design (DDD), event sourcing, and enterprise architecture best practices.
- Proven experience in Agile/Scrum environments, leading sprint planning, mentoring junior developers, and collaborating with cross-functional teams.
- Recognized for delivering mission-critical applications with high availability, security, and reliability in financial, healthcare, and enterprise domains. Expertise in using Oracle SQL Developer GUI (Graphical User Interface) tool for database development, browse database objects, implement, and edit SQL as well PL/SQL statements.
- Managed Amazon Web Services like EC2, S3 bucket, ELB, Auto-Scaling, SNS, SQS, AMI, IAM, Dynamo DB, Elastic search, Virtual Private Cloud (VPC) through AWS Console and API Integration.
- Excellent in deploying the applications in AWS as EC2 instances and creating snapshots for the data that must be stored in AWS S3. Good understanding of NoSQL databases like Mongo DB and Cassandra.

- Experience in building web applications using Spring Framework features like MVC (Model View Controller), AOP (Aspect Oriented Programming), AspectJ, IOC (Inversion of Control), DAO (Data Access Object) and template classes. Good knowledge and experience in writing queries for SQL, Oracle 10g/11g/12C/18C.
- Implemented SOA architecture with web services using SOAP, WSDL, UDDI and XML. Worked on Web Services testing using Selenium IDE, Selenium RC Server, Selenium Grid/Web Driver Testing, SOAPUI and Testing.

Education

- Bachelor of Technology in Electrical and Electronics Engineering from JNTUH, India.
- Master's in Computer Information Systems from New England College, USA.

Technical Skills

Programming Languages	Java (8–17), JavaScript (ES6+), TypeScript, Python (intermediate – backend scripting), Shell/Bash, PL/SQL
Frameworks & Libraries	Spring Boot, Spring Cloud, Hibernate, JPA, React.js (Hooks, Redux, Context API), Node.js (Express.js), Redux Toolkit, Bootstrap, jQuery
Web Technologies	HTML5, CSS3, JavaScript (ES6+), RESTful APIs, JSON, AJAX, Responsive Design, WebSocket, Secure API Design
Cloud Platforms	AWS (Lambda, API Gateway, DynamoDB, S3, CloudFormation, CloudWatch, ECS, SNS, SQS, IAM), Azure (Event Hub, App Services), GCP (Cloud Run)
DevOps & CI/CD	Git, GitHub, Jenkins, ESLint, Husky (pre-commit hooks), Docker, AWS (S3, CloudFront, Lambda), CI/CD Pipelines
Databases	MongoDB (NoSQL), Oracle (12C/19C), PostgreSQL, MySQL, SQL/PL-SQL (Stored Procedures, Query Optimization, Performance Tuning)
Messaging & Streaming	Apache Kafka, RabbitMQ, JMS, Kafka Streams, Kafka Connect, Event-Driven Architecture, WebSocket, BullMQ
Testing Tools	JUnit, Mockito, PowerMock, Selenium WebDriver, Playwright, Cypress, Cucumber, Jest, Jasmine, Karma, JMeter, LoadRunner, Postman, SOAP UI, WireMock
Security	Spring Security, OAuth2, JWT, SAML, SSL/TLS, Certificate Management, Encryption (AES, HTTPS), Vulnerability Scanning, Threat Mitigation, Application Security, Cybersecurity & Information Security (6–7 years)
Monitoring & Observability	ELK Stack (Elasticsearch, Logstash, Kibana), Datadog, Splunk, Dynatrace, Prometheus, Grafana, AWS CloudWatch, Nagios
Version Control & Collaboration	Git, GitHub, GitLab, Bitbucket, SVN, JIRA, Confluence, Azure DevOps, JBoss, Apache Tomcat, WebLogic, WebSphere
Design Patterns & Practices	Full Stack Web Application Development, RESTful API Design, Microservices Architecture, Secure Coding, Test-Driven Development (TDD), Agile/Scrum, SDLC Best Practices, Code Review & Documentation
AI/ML Tools	LangChain (prompt orchestration, retrieval-augmented generation), OpenAI API (integration for intelligent features)
Other Tools & Utilities	Git, GitHub, Bitbucket, JIRA, Confluence, Jenkins, Docker, AWS (EC2, S3, Lambda, CloudWatch), Remote Collaboration & Cross-Team Communication

Work Experience

Client: Rx Savings, Overland Park, Kansas

Mar 2024 to till now.

Sr. Full Stack Java Developer

Responsibilities:

- Designed and deployed cloud-native microservices using Java 17, Spring Boot, Spring Cloud, Docker, and Kubernetes on AWS and Azure (EKS/AKS).
- Built responsive UIs with React.js, Angular 11+, and TypeScript, integrating with RESTful APIs and GraphQL for dynamic user experiences.
- Developed and integrated RESTful web services using Spring Boot, Hibernate, and MyBatis for backend communication.

- Implemented Core Java multi-threading using Executor framework to enhance processing efficiency in concurrent modules.
- Designed and developed dynamic front-end features using Angular 11+ and jQuery for responsive, user-centric interfaces.
- Integrated JSP, AJAX, and XML/XSLT for rendering and transforming server-side data in legacy modules.
- Optimized SQL queries, stored procedures, and indexes in Oracle 19C for improved application performance.
- Deployed web applications on JBoss and Apache Tomcat servers, ensuring scalability and load balancing.
- Converted a monolithic app to microservices architecture using Spring Boot using 12-factor app methodology. Deployed, Scaled, Configured, wrote manifest file for various Microservices in PCF.
- Developed REST controllers using Spring Data REST to serve the UI with required JSON data.
- Developed REST exception handling controller advice to respond to bad requests and server-side exceptions.
- • Designed and developed full-stack web applications using Java (Spring Boot) and React.js, integrating RESTful APIs for seamless data flow.
- • Built responsive, accessible, and high-performing user interfaces using React.js, Hooks, and Redux.
- • Developed secure, scalable server-side services and APIs in Java, implementing business logic, caching, and transaction management.
- • Managed data storage and persistence using MongoDB (NoSQL) and Oracle SQL/PL-SQL for relational modules.
- • Created optimized queries, stored procedures, and indexes to enhance performance and reliability.
- • Collaborated remotely with cross-functional teams in Agile sprints to design and deliver new features end-to-end.
- • Troubleshoot and resolved complex full-stack issues, ensuring production stability and scalability.
- • Authored detailed technical documentation for APIs, data models, and architectural components.
- Knowledge of Kafka's distributed architecture and its components such as brokers, producers, consumers, and topics.
- Extensively worked in Test Driven Development (TDD) framework using JUnit.
- Designed and developed the application using agile methodology and followed Test Driven Development (TDD), Scrum.
- Designed and developed CXF service endpoint interfaces, representing web service operations and contracts, improving code organization and maintainability.
- Deployed spring boot application on AWS Elastic Beanstalk.
- Used Spring Constructor Dependency Injection for injecting the object dependencies.
- Worked in Integration Systems Such as Apache Camel and Spring Integration.
- Developed story/task by following TDD/BDD and Pair programming concepts.
- Providing daily status in scrum meetings with the client. Mentored new team members on effective usage of the blend of Spring Boot /JPA and Java 11.
- Developed CI/CD system with Jenkins on Kubernetes environment, utilized Kubernetes and Docker for the runtime environment for the CI/CD system to build, Test and Deploy.
- Fixed the bugs in the existing application by tracking in JIRA.

Environment: Java 1.8, Apache Camel, Tomcat server, log4j, GIT (Stash), Source Tree, Webflow, Devcenter, Jersey REST web services, Maven, SOAP UI, Eclipse Luna 4.4, Junit, XML, Jason, Cassandra, Jenkins, Glu, Jira, DB2, putty, React JS, FileZilla, Junit4.

Client: Raymond James Financial, Sarasota, FL
Feb 2024

April 2022 to

Full Stack Java Developer

Responsibilities:

- Migrated legacy monolithic applications to modern microservices architecture using Spring Boot, Spring Cloud, and containerized deployments on AWS.
- Developed scalable front-end solutions using React.js, Angular 11+, Redux, and TypeScript, ensuring cross-browser and mobile responsiveness.
- Automated CI/CD pipelines with Jenkins, GitHub Actions, and Terraform for seamless deployments and environment provisioning.
- Built and enhanced full-stack Java applications using Spring MVC, Hibernate, and MyBatis for high-performance data persistence.
- Developed reusable UI components using Angular and jQuery to modernize legacy JSP-based pages.
- Created AJAX-driven features for seamless client-server communication and dynamic content updates.
- Designed stored procedures and optimized SQL queries for Oracle 12C to support real-time transactions.

- Configured and deployed microservices and legacy apps on JBoss and Apache servers with performance tuning.
- Collaborated in Agile sprints, participating in code reviews and mentoring junior team members on full-stack best practices.
- Integrated SQL and NoSQL databases (PostgreSQL, MongoDB) for efficient data processing and storage.
- Worked with cloud platforms (AWS) to deploy applications and services with CloudFormation, Lambda, and S3.
- Led code reviews and mentoring sessions for junior developers, fostering a collaborative environment for knowledge sharing.
- Engaged with cross-functional teams to ensure product requirements were met and technical challenges were resolved.
- Knowledge of Azure Active Directory (Azure AD) for identity and access management (IAM) in the cloud.
- Experience with Azure DevOps for CI/CD pipelines, source code management, and application lifecycle management.
- Familiarity with Spring Data JPA annotations such as `@Entity`, `@Table`, `@Column`, and `@OneToMany` for mapping Java objects to database tables.
- Engineered enterprise-level Java backend services using Spring Boot and Hibernate integrated with React.js frontends.
- Built and maintained RESTful APIs and microservices consumed by React applications for financial data analytics.
- Implemented MongoDB and SQL/PL-SQL queries, stored procedures, and triggers to optimize database performance.
- Participated in all phases of the SDLC, from requirements and design to coding, testing, deployment, and documentation.
- Conducted peer code reviews, mentored junior developers, and enforced secure coding practices.
- Collaborated effectively with distributed teams in a remote setup, ensuring consistent communication and delivery.
- Debugged and optimized application performance across frontend and backend components.
- Knowledge of Kafka Connect API for integrating Kafka with other data sources such as databases, messaging systems, and/or file systems.
- Created a microservices architecture using Spring Cloud in STS for a distributed application that processed and analyzed large amounts of data.
- Designing and developing Restful API and services using best practices to interact within the Microservices and with the front end. Using spring MVC and spring rest.
- Experienced in implementing Microservices, Service Oriented Architecture (SOA) with XML based Web Services (SOAP/WSDL) using Top Down and Bottom-Up approach.

Environment: Java 17, Spring framework, Spring Boot, Spring Security, JWT, OAuth, Spring Batch, Node.js, Typescript, JSP, Servlets, XML, XSLT, Log4j, AJAX, Eclipse, HTML, CSS, Web Services (SOAP and WSDL), Bootstrap, Eclipse, Jenkins, GitHub, Tomcat Oracle, SOAP and Restful, XML, XSD, TDD, MongoDB, UNIX, Windows XP, AWS Services, Jenkins, Active MQ.

Client: Global Foundries, New York, USA.

Oct 2020 to Mar 2022

Full Stack Java Developer

Responsibilities:

- Designed and implemented event-driven microservices with Spring Boot, Kafka, and RabbitMQ to handle high-throughput data pipelines.
- Developed front-end components using Angular 7–11, TypeScript, and Bootstrap for interactive dashboards and responsive applications.
- Leveraged Azure services (App Services, Event Hub, Redis Cache) for building cloud-native, scalable enterprise applications.
- Automated infrastructure provisioning using Terraform and Ansible, reducing deployment errors and improving release cycles.
- Created unit and integration tests using JUnit, Mockito, and Selenium to ensure quality within Agile CI/CD pipelines.
- Enhanced performance tuning by optimizing Oracle SQL queries and monitoring JVM performance with Dynatrace and JProfiler.
- Implemented Microservices Architecture with Spring Boot based services interacting through a combination of REST and SOAP.
- Implemented Micro services using Spring Batch, Spring Boot, and Spring Security.
- Built full-stack solutions using Java, Spring Boot, Hibernate, React.js, and REST/GraphQL APIs.
- Developed event-driven workflows using Kafka (7 years) and RabbitMQ for real-time system messaging.
- Deployed microservices to AWS ECS and EKS clusters for improved performance and fault tolerance.

- Applied encryption standards, API authentication, and role-based access control (RBAC) for information security compliance.
- Conducted code scanning, log analysis, and risk mitigation aligned with cybersecurity best practices.
- Utilized PostgreSQL and MongoDB for hybrid data storage, ensuring scalability and fault tolerance.
- Used Maven building tool for creating EAR file to be deployed in application servers. It is also used for dependency management of code in application.
- Implemented Continuous Integration and Continuous Delivery (CI & CD) Process stack using Devops tools like Jenkins.
- Used Swagger as medium for modifying the web services URL to feed the input to UI.
- Used Post Man to test the web service calls.
- Used Subversion as version control system and Tortoise client for SVN.
- Configured log4j to enable/disable logging in application.

Environment: Java 1.8, J2EE, SOAP and REST, Bootstrap 4.0, JSP, JMS, Hibernate 4.0, Servlets, Spring 3.0, Agile Methodology, EJB 3.0, WebLogic 10g, JDBC, Java Script, Eclipse, HTML5, CSS3, XML, UML, MySQL, PL/SQL, Oracle 10g, TDD, Microservices, Maven, Unix.

Client: Goldman Sachs – UT.

June 2018 to Sep 2020

Java Developer

Responsibilities:

- Built distributed Spring Boot microservices deployed on AWS EC2 and EKS with Docker and Kubernetes for scalable processing.
- Developed Kafka producers and consumers for event sourcing and near real-time financial data processing.
- Implemented RESTful APIs secured with Spring Security, OAuth2, and JWT, integrated with external banking services.
- Migrated business-critical workflows from monolithic systems to microservices, reducing latency and improving system resilience.
- Automated build and deployment pipelines with Jenkins, Maven, and SonarQube for continuous integration and delivery.
- Designed event-driven, cloud-native services using Java Spring Boot, Kafka, and AWS Lambda to process secure financial transactions.
- Built REST and GraphQL APIs for client integrations with strict authentication (OAuth2, JWT) and encryption policies.
- Participated in cybersecurity audits and implemented secure coding practices per ISO 27001 and NIST standards.
- Deployed distributed applications via AWS CloudFormation and automated CI/CD workflows using Jenkins and GitHub Actions.
- Collaborated with InfoSec teams to implement application monitoring, intrusion detection, and vulnerability management.
- Optimized SQL and NoSQL data performance across PostgreSQL and MongoDB.
- Spring JDBC uses retrieve and update, inserting data in MySQL database with use of stored procedures.
- Involved in creating and extracting data from databases using SQL Queries in MySQL database.
- Extensively used log4j to log regular debug and exception statements.
- Implemented Spring boot microservices to process the messages into the Kafka cluster setup.
- Wrote Kafka producers to stream the data from external rest APIs to Kafka topics.
- Created partition of Kafka messages and set up the replication factors in Kafka Cluster.
- Deployed Spring Boot based micro services and Docker container on AWS EC2 instance.
- Prepared and executed test cases for Unit and Integration testing using Spock and Groovy.
- Involved in the development of presentation layer and GUI framework using ReactJS and HTML.
- Involved in rendering additional components with custom HTML tags using ReactJS.
- Performed code review and unit tested the application using Junit framework. Participated in the production support and maintenance of the project.

Environment: Java 8, JPA, Spring, Hibernate, AWS, Struts, MicroServices, Stripes, Cassandra, EJB, JSF, jQuery, Ajax, JavaScript, Oracle 11g, Jira, Maven, PL/SQL, JDBC, Solr, Apache CXF, NoSQL, CI/CD, Jenkins, Cloud logging, Cloud Storage, ActiveMQ, Rest, XCode, WebLogic, Node.js, Bootstrap, Sybase, Backbone.js, Angular.js, WODM 8.1, Junit, Agile, UML, JSP, JBoss, Servlet, Selenium, SOA.

Client: Edward Jones, MO.

Jan 2016 to May 2018

UI Developer

Responsibilities:

- Developed dynamic and reusable UI components using AngularJS, React.js, JavaScript (ES6+), and Bootstrap.
- Migrated legacy JSP/HTML components into modern React and Angular front-end modules to improve scalability and maintainability.
- Implemented secure UI practices (CSRF, CORS, XSS prevention) and integrated with REST APIs and JSON-based services.
- Designed responsive web applications with HTML5, CSS3/SCSS, and AJAX for multi-browser and mobile compatibility.
- Collaborated in Agile teams, participating in sprint planning, code reviews, and continuous integration with Jenkins and Git.
- Integrated application monitoring with ELK Stack to track UI performance and error handling across environments.
- Involved in designing the front-end applications using web technologies like HTML/HTML 5, XHTML, and CSS/CSS3.
- Maintained existing UI Applications and upgraded them using advanced web technologies.
- Designed the user interactive (UI) web pages using web technologies like HTML5, XHTML, and CSS3.
- Wrote application-level code to perform client-side validation and implemented dynamic page elements using JavaScript.
- Implemented date calendar using jQuery.
- Developed project's web page as Single Page Application (SPA) by using AngularJS.
- Created various controllers, views using MVC framework AngularJS.
- Designed services and factories and injected into various methods by using AngularJS.
- Designed customized filter techniques in the webpage using AngularJS.
- Used jQuery plugins for Drag-and-Drop, Widgets, Menus, User Interface and Forms.
- Wrote application-level code to perform client side validation using jQuery and JavaScript.
- Wrote jQuery function while implementing various UI Screens across the whole web application (both consumer facing as well as internal application).
- Interacted with java controllers (jQuery, Ajax, and JSON to write/read data from back-end systems).
- Maintain, enhance, and recommend solutions that best suit business and technology needs from UI standpoint.
- Define technical requirements based upon business requirements.
- Used SVN for version control and JIRA for defect tracking.
- Involved in Agile process, monthly Sprints, and daily Scrums to discuss the development of the application.

Environment: HTML, HTML5, CSS, CSS3, JavaScript, jQuery, AngularJS, Bootstrap AJAX, JSON, XML, Apache Tomcat, ECLIPSE.
