OBJECTIVE To explore new opportunities within IT

EXPERIENCE

Arlington Consulting Group

ALC Developer

8/22 – present

Worked as member of the ITPE and BMF modernization projects

- Captured legacy mainframe ALC logic in pseudocode templates called building blocks to assist with modernization efforts
- Analyzed and resolved reported defects using trace tools
- Created boundary assignments and generated line mappings for new filing season baselines which included applying new changes to affected building blocks
- Worked on Business Master file framework to implement accelerator macros that will assist in implementation to JAVA
- Provided ALC support to assist AI group to evaluate generated business rules and work flows

NYS ITS OFFICE OF INFORMATION TECHNOLOGY

Information Technology Specialist 3

1/14 – 8/22

Worked as member of the mainframe DBA group performing database related tasks

- Developed an Operational Data Store (ODS) as part of a data modernization initiative
- Created subscriptions using IBM Infosphere Change Data Capture Management Console to replicate the data to the ODS
- Created publications using Classic Data Architect and Data Event Publisher to map vsam files to tables
- Created a program to convert data from VSAM files to new DB2 tables
- Created a program that would input production transactions via an MQ-interface and sync updates made to the VSAM files to the corresponding DB2 tables
- Designed DB2 tables using Erwin Data Modeler and created DDL. Responsible for maintenance and support of all DB's for Higher Ed and DMV. Used CA Platinum tools to assist in this effort
- Responsible for table sizing, table definitions, image copies, online reorgs, loads, unloads, repairs, grants, revokes and other DB management tasks
- Gained experience with Data Stage Extract Translate Load (ETL)

11/88 – 1/14

Mainframe lead for revenue applications within DMV.

- Responsible for creating an interface between our refund system and the Statewide Financial System. Key member of team responsible for documenting business rules and functional specs. Also responsible for the test plan strategy for this initiative
- Participated as a key player for both the design and initial coding for one of DMV's strategic plan initiatives that modernized our audit process. This included creation of business rules and documentation.

- Created SOA service modules that communicated with batch and CICS applications and created a detailed test plan to assist with this project
- Responsible for the maintenance of several financial systems within DMV in both online and batch environments written in assembler. Also responsive to new legislative initiatives in the following areas: Personnel, Daily Cash Reporting Sales Tax, Fee Distribution, Bad Check Processing, Refunds and Dial In Servicing
- Instrumental in the conversion of the bad check system from IDMS to DB2 and the conversion of other legacy assembler programs to cobol.. Used Endeavor to migration approval process for programs and dclgens

Expertise and Platforms

Assembler, DB2, SQL, Cobol, TSO, JCL, CICS, Viatest, Intertest, IBM Debugger, Erwin Data Modeler, Management Console, Visio, Agile Principles, GITHUB, Eclipse, IBM Infosphere Change Data Capture (CDC) and Data Event Publisher (DEP), CA Platinum tools, SOA, Endeavor, Crystal Reports, XML, SOAPUI , SecureFX, REXX

EDUCATION

B.A. in Psychology
College of the Holy Cross, Worcester MA
16 Masters Credits in Computer Science, Worcester Polytechnic Institute
