

Raj Kalyan Reddy Bezawada

Software Engineer – Full-Stack (Java | React | Distributed Systems)

Long Beach, California, USA | bezawadakalyanreddy@gmail.com | + 1 (562) 514-2982| [LinkedIn](#)

SUMMARY

Full-stack Software Engineer with 5+ years building large-scale, high-traffic systems across payments, insurance, and retail (Mastercard, Zurich, Marks & Spencer). Expert in Java 17/21, React 18/Next.js, Spring Boot 3, Kafka, GraphQL, PostgreSQL, AWS, Docker, Kubernetes. Strong in distributed systems, event-driven architecture, observability, and security. Proven track record of delivering low-latency, resilient, and secure platforms serving millions of users, driving 40%+ performance gains, 99.99% uptime, and compliance with OWASP/GDPR/PCI.

CORE SKILLS

Programming & Frameworks:	Java 17/21, Spring Boot 3, Spring Cloud (Gateway, OpenFeign, Config, Resilience4j), Spring Node.js, Python, MVC/WebFlux, Go, TypeScript, React 18, Next.js (SSR/SSG), Redux Toolkit, GraphQL (DGS, Federation, Relay)REST, WebSockets, gRPC, Thrift, OpenAPI/Swagger
Frontend Development:	React Query, React Hook Form, Jest/RTL, Cypress/Playwright, Tailwind, Storybook, Core Web Vitals, PWA, Accessibility (WCAG 2.2 AA), Web Performance APIs, Micro-frontends
UI/UX & Accessibility:	Responsive Design, Mobile-First Design, Accessibility Standards, Reusable UI Components, Branding Guidelines
Databases:	PostgreSQL, Oracle, MongoDB, Cassandra, Redis, Caffeine, Memcached, Elasticsearch/ OpenSearch, ScyllaDB, BigQuery, Liquibase/Flyway migrations, query optimization
Cloud, Infra & DevOps:	AWS (EKS/ECS, EC2, RDS, Lambda, S3, API Gateway, CloudFront, CloudWatch, IAM), Docker, Kubernetes, Helm, Terraform, Jenkins, GitHub Actions/GitLab CI, Pivotal Cloud Foundry (PCF), Service Mesh (Istio/Linkerd), Nginx, CDN
Architecture & Sys Designs:	Microservices, Event-Driven (Kafka, SNS/SQS), DDD, Hexagonal/Clean, CQRS, Saga/Outbox, 12-Factor Apps, CAP theorem trade-offs, Consistent Hashing, Backpressure handling, Idempotency keys, API versioning, Leader election, Chaos engineering, Feature flags (LaunchDarkly), Monorepo tooling (Nx, Bazel)
Security & Quality:	OAuth2, OIDC, JWT, mTLS, TLS, SAML SSO, CSP/CORS, Threat Modeling, Secrets Management (Vault, AWS SSM), GDPR/PCI/SOC2 compliance, OWASP Top 10, Differential Privacy basics, JUnit5, Testcontainers, WireMock, Pact (CDC), SonarQube, JaCoCo
Observability & Performance:	OpenTelemetry, Prometheus/Grafana, Datadog, New Relic, ELK/EFK, Flame Graphs, Synthetic Monitoring, Continuous Profiling, SLIs/SLOs, Latency optimization, JVM tuning (GC, pools), Gatling/JMeter
AI/ML Adjacency:	Integration with personalization APIs, LLM/embedding APIs, Vector DBs (Pinecone, FAISS, Weaviate), Realtime recommendations & analytics pipelines

PROFESSIONAL EXPERIENCE

Mastercard Senior Software Developer	<i>June 2024 – Present</i>
- Built a Next.js + React 18 checkout platform integrating MPGS, EMV® Click to Pay, and tokenization; reduced checkout latency by 40%. - Engineered Spring WebFlux + Spring Cloud microservices with GraphQL APIs; supported 50M+ monthly transactions with sub-200ms latency. - Integrated MDES tokenization with async risk scoring via gRPC and Kafka streams, improving fraud detection accuracy by 25%. - Applied OAuth2/OIDC, JWT, mTLS, and AWS Secrets Manager for security; led threat modeling workshops. - Achieved 99.99% uptime SLA with OpenTelemetry, Prometheus/Grafana, and JVM profiling. - Deployed with AWS EKS, Docker, Helm, Terraform, GitHub Actions; implemented blue-green and feature-flag rollouts with LaunchDarkly.	
Zurich Insurance Software Engineer	<i>May 2021 – Aug 2023</i>
- Built policyholder self-service portal in React 18 + TypeScript with secure uploads and WCAG 2.2 AA compliance. - Developed Spring Boot 3 microservices with CQRS and Saga/Outbox, ensuring reliable claim event processing. - Integrated with core systems using REST & gRPC; modeled claim events on Kafka + SNS/SQS with	

- Oracle/PostgreSQL hybrid persistence.
- Secured portal with SAML SSO (Okta), OAuth2/OIDC APIs, and mTLS; enforced GDPR/OWASP standards.
- Increased throughput by 35% with optimized DB indexing; reduced incident MTTR by 45% via Grafana dashboards.
- Scaled platform to 100K+ concurrent enterprise users with Kubernetes + AWS Terraform infra.

Marks & Spencer | Junior Software Developer

Sept 2019 – Mar 2021

- Implemented Sparks loyalty & Click-and-Collect features in React 18 + Redux Toolkit, ensuring accessibility compliance.
- Developed Spring Boot microservices for offers and loyalty wallet; optimized PostgreSQL + Redis caching to reduce API response times by 60%.
- Streamed order/loyalty events via Kafka; delivered real-time status with SSE; improved triage with ELK dashboards.
- Hardened APIs with Keycloak OAuth2/JWT, TLS, Vault secrets, and systematic OWASP checks.
- Drove CI/CD with Jenkins + Docker + PCF; applied feature flags with LaunchDarkly for safe rollouts.

EDUCATION

California State University, Long Beach, USA

Aug 2023 – May 2025

Master's in Computer Science

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- AWS Certified Developer – Associate

ACHIEVEMENTS

- Delivered systems handling millions of transactions per day at Mastercard with industry-grade resilience.
- Recognized for ownership and leadership in Zurich claims modernization project.
- Consistently improved customer-facing performance metrics (Core Web Vitals, accessibility, latency)
