

Rajesh Yelala
(903)634-7699 | Rajeshyelala0129@gmail.com | .Net Developer

PROFESSIONAL SUMMARY

- Over **5+ years** of experience, as a software developer, in Functional specifications, Analysis, Design, Modelling, Development, Configuration, Management and implementation of various web applications including health care, banking and finance projects.
- Expertise in **C#, VB** with a strong grasp of .NET Technologies and Object-Oriented Programming concepts/methods using **ASP.NET, .NET Core and ASP.NET MVC** architecture.
- Strong experience on MS SQL Server using **SQL, MS SQL, SSIS** and **T-SQL**. Have worked on ETL using SSIS and DTS packages.
- Experience in creating Views, Partial Views, and Sections etc. In **ASP.NET MVC**, and Created the Controllers and Controller Actions, Filters, Routing using ASP.NET MVC.
- Working with RDBMS includes **MS SQL Server ... Oracle 8i, 9i, 10g, 11g, 12c and MS-Access**.
- Responsible for making AJAX Calls for the UI Interactions to the Controller Actions using Angular JS and getting the Data back as JSON and parsing it onto the UI.
- Developed complex queries using the SQL API in Cosmos DB to perform data retrieval and manipulation within .NET applications.
- Excellent skill in data modelling and implementing tables, views, stored procedures, functions, schemas, and Triggers using **T-SQL** Queries and **PL/SQL**.
- Good application deployment experience on Windows and on other platforms like UNIX, Solaris.
- Expertise on working with RDBMS like **DB2 (v 8.1.2) and Oracle (v 8i, 9i, 10g)** and knowledge of directory services like LDAP.
- Utilized Postman to test and validate RESTful APIs developed in .NET, ensuring they meet functional requirements and perform as expected.
- Extensive experience in Web using **MVVM, MVC, JSON** based development and WEB API 2.0
- Working knowledge on Cloud Platforms like AWS, GCP, OpenStack, OpenShift.
- Hands - on experience in deploying applications to MS Azure Private Cloud and Good Experience in TFS Branching and Merging.
- Implemented and managed indexes in MongoDB to improve query performance in .NET applications.
- Demonstrated proficiency in development using Microsoft.NET technologies like **ASP.Net, C#, VB.Net, ADO.Net, Web Services, MVC, AJAX**, Windows Services, WCF Services, OOPS, XML, XSLT, HTML, SOAP, LINQ Text Editor, MS IIS ... DHTML, VBScript, VSS, JavaScript, SQL Server.
- Experience in designing web pages using **HTML, JavaScript, HTML, CSS** and jQuery, Angular JS, AJAX, Bootstrap and JSON, Node JS., UML.
- Strong Experience in Web Forms and Win Forms applications with .NET Framework ... and Visual Studio.
- Strong Microsoft Technologies in the fields of Win - forms, Web-forms, Web Services using **ASP.Net ... VB.Net, C#, MVC, Entity framework, Angular JS, ADO.NET AJAX, LINQ, WCF, WPF**, Silverlight 2.0/3.0 using Microsoft .Net Framework.
- Experience in using testing Tools JUnit, **Selenium, Cucumber/Gherkin**.
- Expertise in database modelling and development using **SQL, T-SQL and PL/SQL** in Oracle and SQL Server environments.
- Exposure to Oracle, DB2, and MySQL databases in developing applications using SQL Scripts, Stored Procedures.
- Experience using an Integrated Development Environment like Eclipse, RAD 7.5/8.5 for code development.
- Extensive experience on support tools like Application Life Cycle Management to perform Unit testing and Application integration testing.
- Good experience on **MS Azure Cloud Architecture (MS Azure Pack (Private Cloud), PaaS and IaaS)** assessments.
- Involved in development of projects using **SQL Server Integrated Services (SSIS)**, SQL Server Reporting Services (SSRS) and Data Transformation Services (DTS)

- Good experience with Agile (SCRUM) methodology, Waterfall and Test-driven development.
- Specialized in developing highly interactive applications using **Silverlight, WCF, ASP.NET MVC3, Razor Engine**, MVVM patterns, Microsoft Application Block

EDUCATION

Master of Science Technology Management at Lindsey Wilson college, Columbia, KY, US.

TECHNICAL SKILLS

Programming Languages	C#, VB, SQL, JavaScript, TypeScript, Python, C++
.NET Technologies	ASP.Net, ASP.Net MVC, .Net Core, ADO.Net, IIS, WPF, WCF, Web/Windows Forms, Web API, SOA, Entity Framework, SSIS, SSRS
Web Technologies	HTML, XML, AJAX, CSS, JSON, jQuery, CSS, .NET, jQuery, RPA, Bootstrap, Node.js Angular, AngularJS, Blazor, AWS
Cloud Technologies	Google Cloud Platform, AWS, Azure, Terraform, Terragrunt
Development Tools	Visual Studio, VS code, MS SQL Server Management Studio, TOAD, Postman, Insomnia, Rocket Data Virtualization, Terraform, Splunk
Database	SQL Server (2000-2022), Oracle (8i, 9i, 10g, 11g), MySQL, PostgreSQL, MongoDB, DB2, Informix, T-SQL, DB2
Project Management Tools	JIRA, TCS MasterCraft DevPlus, ALM, Sunrise
Reporting Tools	SQL Server Reporting Services (SSRS), Crystal Reports, Gentax
Version Control Tools	GIT, Team Foundation Server (TFS), SVN
DevOps Tools	Bitbucket, Jenkins, Ansible, AutoSys
Management Tools	Jira, TCS MasterCraft DevPlus, ALM, Sunrise
Integration Tools	WSO2 API Manager, WSO2 ESB, OpenText Cordys
Testing/QA Tools	NUnit, MSTest, VSTest, Moq Framework, Checkmarx

PROFESSIONAL EXPERIENCE

Client : Comforce Health, Duluth, GA
Full Stack .Net Developer

June 2022 – Present

Responsibilities :

- Created and used User Controls in developing the front-end application and multi-thread windows applications using **VB.Net**.
- Automated the build process for .NET applications using Jenkins, configuring jobs to compile code, run unit tests, and produce build artifacts.
- Leveraged NUnit's integration with **Visual Studio** Test Explorer or Rider Test Runner for convenient test discovery, execution, and debugging.
- Used Postman's powerful debugging tools to identify and resolve issues in API requests and responses, improving the reliability and functionality of .NET applications.
- Created packages to write procedures in Oracle to load Global Dir Params and update audit transactions.
- Converted the web sites to web applications to make Azure compatible.
- Involved in deploying desktop applications, web applications, websites and console applications to the Confidential Azure Cloud.
- Developed the portal using various .Net Technologies like Microsoft **.NET Framework 3.0, C#, ASP.NET, ADO.NET**.
- Developed stored procedures, triggers, cursors using Oracle for authorization and card details database.
- Utilized various JavaScript and jQuery libraries, **AJAX** for form validation and other interactive features.
- Developed Web forms using **ASP.Net server** controls and validated input using Java Script.

- Created and maintained database objects like complex Stored Procedures, Tables, Views, and User Defined Functions in SQL Server 2012.
- Extensive use of Web Services, **Web API**, **XML** to expose the reports to facilitate the information sharing
- Worked on SOAP and RESTFUL Services using WEB API which return JSON data.
- Built Web based and service-oriented platforms using Microsoft .NET technologies (**C#, ASP.Net, MVC, Web API, and Entity Framework**).
- Configured custom package sources in NuGet to manage and distribute proprietary packages securely within the organization.
- With the concept of ReactJS Worked on usage metrics and also end to end events tracing for analysis purpose.
- Developed UI interfaces with **MVC 5 Razor Views (CSHTML)**, **CSS JavaScript**, Knockout JS and jQuery.
- Implemented CRUD functionality with Entity framework in ASP.NET MVC and implemented sorting, filtering and paging with Entity framework in MVC.
- Experience on latest Evolutions of **JavaScript, Docker, Web pack, OpenStack, AWS**, Elastic Search, Redis, MongoDB, GitHub Enterprise, Splunk.
- Implemented Application logging, email for error handling and notifications.
- Prepared unit test cases and performed N-Unit testing prior to system implementation. Used Hibernate - Object Relational Mapping Tool for the backend data persistence
- Applied **Test-Driven Development** (TDD) principles using xUnit, writing tests before implementation to drive design and ensure thorough test coverage.
- Integrated code coverage tools with xUnit to measure and improve test coverage, identifying untested parts of the codebase and reducing potential bugs.
- Created logical and physical data models putting to practice, concepts of normalization and RDBMS.
- Used Rational Application Developer which is based on Eclipse, to develop and debug application code.
- Modified the Spring Controllers and Services classes to support the introduction of Spring framework.
- Developed and Enhanced Master Pages, User Controls, Custom Controls, User Interface by using HTML 5, CSS 3, Bootstrap and Kendo UI Controls.
- Used Dependency Injection Pattern to reduce the dependency coupling between classes and in Front end using AngularJS.
- Implemented Swagger Codegen to generate client SDKs and server stubs, accelerating development and ensuring alignment with API specifications.
- Designed and implemented **continuous integration and continuous deployment (CI/CD)** pipelines using Jenkins to automate the build, test, and deployment processes, ensuring quick and reliable delivery of .NET applications.
- Implemented robust **CI/CD pipelines in Azure DevOps for .NET** applications, reducing deployment time by 40% and improving release reliability.
- Configured and managed release pipelines in **Azure DevOps** to streamline application deployments across multiple environments (development, staging, production).
- Used ADO.Net extensively for database interactions using Data Reader, Data Adapter, Data view and Datasets.
- Responsible for fine tuning the Stored procedures and SQL Queries that have been found expensive in the load testing conducted for the releases.
- Managed project dependencies using NuGet, ensuring consistent and reliable package management across multiple .NET projects.
- Configured and managed custom indexing policies in **Cosmos DB** to optimize query performance for .NET applications.
- Configured Tomcat server which gave users a single point of access to the applications, services, information and social connections they need.

Environment : .NET Framework 2.0/3.0/3.5/4.0, C#, VB.NET, ASP.NET (including Web Services and WCF), ADO.NET, LINQ, HTML, HTML5, XHTML, CSS, JavaScript, jQuery, AJAX, XML, XSL, Microsoft SQL Server (2005, 2008, 2012), T-SQL, Visual Studio (2005, 2008, 2010), Team Foundation Server (TFS), SVN, NUnit, Crystal Reports, Visio, Agile Development, WPF, SSRS (SQL Server Reporting Services), MS Excel, UML, VB Script.

Responsibilities :

- Involved in design and developing case management system web screens using **ASP.Net MVC 4.0** Framework and had knowledge on Web API (Restful).
- Used Inject to implement Dependency Injection (DI) when developing Components for MVC Architecture.
- Developed the Controller with using LINQ to Entity to query Stored Procedures or Entities to render JSON data, VIEW to Front-end.
- Used VUE.JS for HTML-based template syntax that allows to declaratively bind the rendered DOM to the underlying Vue instance's data
- Built the Responsive UI screen using **HTML 5, CSS 3** and twitter Bootstrap.
- Developed Web screens using Responsive Web Design methodology. Utilized MVVM design pattern with front end framework jQuery, AngularJS and LESS CSS pre-processor to replace old system's JavaScript code.
- Extensively used **JavaScript, jQuery and AJAX** for implement client-side data verification, data transfer and load, sending XML with asynchronous/synchronous request to build the data communication between client side and server side.
- Utilized **ADO.NET** objects like Data Set, Data Adapter, and Data Reader to retrieve data from databases. Work with ASP.Net Grid Views, Repeaters, and Data Lists for displaying in front-end.
- Extensively developed with using various **C#.NET Web Forms**, Server Controls and User Controls. Developed the Presentation Layer with writing HTML, CSS.
- Developed applications in AngularJS and Bootstrap and deployed into development, Test and production environment successfully.
- Worked on the MVC architecture of **AngularJS** in developing the apps, controllers and directives which are totally customized to meet the needs of the application.
- Performed Unit Testing and maintaining the system by tracing, debugging, exception handling, and logging.
- Utilized Swash buckle to integrate Swagger with **ASP.NET** Core applications, enabling automatic generation of interactive API documentation and exploration.
- Worked with Using TFS for source control and project related document sharing.
- Building/Maintaining Docker container clusters managed by **Kubernetes Linux, Bash, GIT, Docker**, on GCP.
- Integrated Blazor applications with **ASP.NET** Core Web APIs for efficient data operations and real-time functionalities using SignalR.
- Utilized the Azure Cosmos DB SDK for .NET to connect, query, and manage Cosmos DB resources within .NET applications.
- Implemented deployment automation of Azure deployments utilizing PowerShell
- Experienced in developing and consuming **Web Services** and n-tier web applications using **ASP.NET, C# and ADO.NET**.
- Worked on making **AJAX** calls to connect the database using restful web-services and also worked on integrating the middleware to the front end.
- Used Jenkins to orchestrate the provisioning and configuration of infrastructure using tools like Terraform or ARM templates.
- Deployed and managed MongoDB instances on cloud platforms (e.g., **Azure Cosmos DB, MongoDB Atlas**) within .NET applications.

Environment : .NET Framework (3.0, 3.5, 4.0), ASP.NET (MVC with Razor, Web Forms), C#, VB.NET, ADO.NET, LINQ, HTML (4.01, 5), CSS (3), JavaScript, jQuery, AJAX, XML, XSL, XSLT, WCF, SOAP, Silverlight (2.0, 4.0), Microsoft SQL Server, Informix, DB2, MS Visual Studio (.NET 2005, 2008, 2010, 2012), TFS, GenTax and GenTax Reporting Tools, MetaStorm BPM, Visio 2012, Crystal Reports, NUnit, NANT, Windows Server (2003), UNIX, Windows Forms.
