
PROFESSIONAL SUMMARY:

Results-driven Senior .NET Full Stack Developer with over 8 years of experience in designing, developing, and implementing web applications and services. Proficient in a wide range of technologies including C#, ASP.NET, JavaScript frameworks, and cloud services. Adept at collaborating with cross-functional teams to deliver high-quality solutions that meet business objectives. Strong expertise in Sitecore CMS, cloud architecture, and DevOps practices.

CAREER PROFILE

- Expertise in developing scalable, high-performance solutions that meet business objectives while ensuring seamless user experiences.
- Skilled in collaborating with cross-functional teams to deliver complex projects on time, with a focus on continuous learning, problem-solving, and staying ahead of technology trends.
- Proven track record of contributing to successful Sitecore implementations, optimizing performance, and ensuring robust, maintainable code.
- Technical expertise in Microsoft Technologies, such as **C#, .NET Framework, ASP.NET, Web API, LINQ, AJAX, ADO.Net, HTML5, Java Script, CSS, Node.js, jQuery, Bootstrap, Entity Framework and React.js.**
- Consumed **ADO.NET** components like **Data Adapter, Dataset** to perform data operations and implement the data layer to communicate with different database.
- Expertise in **React.js** for creating interactive **UI's** using **One-way data flow, Virtual DOM, JSX, React Native** concepts.
- Hands on experience in **SQL Server** and **Oracle** database design and development, writing **Constraints, Indexes, Views, Stored Procedures, Cursors, Triggers** and **User Defined Functions.**
- Experience working with **Sitecore CMS**, including architecture, maintenance, upgrades, and personalization.
- Proficient in **Sitecore JSS** (JavaScript Services) and **Sitecore XM Cloud**, specializing in the development of decoupled, API-first applications to deliver scalable, performance-optimized websites and apps across multiple platforms and channels.
- Expert in integrating **Sitecore JSS** with Sitecore XP/XM for delivering content-driven, API-based websites, ensuring smooth data flow and integration with third-party services while maintaining Sitecore's robust content management features.
- Extensive experience in developing full-stack, **headless Sitecore applications**, integrating **React.js, Next.js, and Angular** with Sitecore for seamless front-end and back-end content management and expertise in **Server-side Rendering (SSR)** and **Static Site Generation (SSG)** for dynamic content delivery.
- Extensive experience in Sitecore CMS, cloud-based application architecture, and building scalable microservices.
- Proficient in Agile methodologies (Scrum, Kanban), and experienced in using tools like **Jira, Azure DevOps, and Git** for version control and continuous integration.
- Experience in designing and developing highly responsive websites with modern web technologies, **AWS, Azure, and IIS.**
- Expertise in **debugging and troubleshooting** issues, root-cause analysis, and solution development.

- Extensively performed the **unit testing** and **load testing** using **SOAP UI** to ensure Quality of the software.
- Provided ongoing maintenance and support after the launch of websites, addressing issues related to performance, security, and functionality, and implementing new features based on customer feedback.
- Provide **post-implementation**, application enhancement and **maintenance support** for the clients as part of Managed Services.

EDUCATION

M.S. Computer and Information Systems

Dec 2017

Wilmington University, New Castle, DE.

CERTIFICATIONS

- Sitecore 9.0 Certified Platform Developer
- Sitecore 10 .Net Developer Certification
- Sitecore XM Cloud Certified Platform Developer
- Box ever Advanced Certification (Version 9.0-9.3)

PROFESSIONAL EXPERIENCE

Senior Application Developer

Nov 2020 – Present

Horizontal Digital, Minneapolis, MN

- Led the design, development, and customization of multiple customer websites across diverse industries including **e-commerce**, **banking**, and **entertainment applications**, ensuring scalable, secure, and user-friendly solutions tailored to the unique needs of each sector.
- Extensive experience with the **Sitecore XM Cloud platform** and **headless development** using **Sitecore JSS** and **Cloud SDK**.
- Integrated customer websites with third-party APIs and services, including payment gateways, CRM systems, and marketing platforms, to enhance functionality and provide a seamless experience for users in commerce, banking, and entertainment sectors.
- Hands-on development experience in **Next.js** and **React.js**, and built scalable, high-performance front-end applications and worked on modern tooling and frameworks, ensuring visually compelling and functional UI components.
- Developed custom, reusable components in **React.js** and **Angular** integrated with **Sitecore JSS**, ensuring consistent and efficient rendering of content for dynamic and personalized user experiences.
- Developed and consumed **REST APIs** to integrate external systems and services, ensuring smooth data flow and content synchronization between headless frontend and Sitecore backend services.
- Implemented **headless** solutions using **GraphQL** to integrate **Sitecore XM Cloud** as a powerful content delivery API and enhanced the performance and scalability of websites by delivering content to decoupled frontend efficiently through **GraphQL queries**.
- Worked with Docker Containers for local development and deployments on Sitecore 10.1.

- Experience in working with Azure DevOps deployment pipelines (CI/CD) and proficient in Agile methodologies and have worked extensively in DevOps environments, leveraging tools like **Git**, **Bash**, and **PowerShell** to streamline development workflows and enhance collaboration.
- Leveraged **ASP.NET MVC 5** for building dynamic and robust **web applications** with **Model-View-Controller (MVC)** architecture.
- Utilized **.NET Core** for building cross-platform applications and microservices, optimizing for cloud-native environments.
- Worked with Entity Framework Core to design and implement database interactions and optimize performance for data access.
- Created **RESTful APIs** using **ASP.NET Core** to handle product listings, user authentication, and order processing, ensuring adherence to **REST** principles.
- Developed the user interface using **React.js**, implementing responsive design principles with **Bootstrap** and **CSS** to enhance user experience across devices.
- Worked as part of the **Managed Services** team to support and maintain production applications, ensuring optimal performance by troubleshooting and resolving application issues in real-time.
- Installed, tested, and validated hotfixes, patches, and updates in production environments to resolve critical issues and ensure security compliance while minimizing downtime and impact on business operations.
- Acted as a SME for key stakeholders, providing timely updates and resolutions for incidents, changes, and service requests, ensuring customer satisfaction.
- Provide mentorship to junior developers, offering technical guidance on programming, debugging, and problem-solving.
- Lead knowledge-sharing sessions on best practices in .NET development, microservices architecture, and Sitecore development to enhance team expertise and ensure alignment with modern development standards.
- Design and implement scalable, maintainable, and secure architectures for on-demand project offerings as part of Managed Services.
- Ensure adherence to coding standards and best practices, including performance optimization and maintainability.
- Prepare and present progress reports, demos, and final deliverables to customers, identify opportunities to streamline processes and improve the efficiency of on-demand offerings.
- Ensure seamless handoffs and proper documentation for customer environments post-project completion.

Senior Web Developer
Virginia Lottery, Richmond, VA

Mar 2018 – Nov 2020

- Responsible for supporting the design and development of the project built on the Sitecore Platform as well as related content management tools.
- Involvement in Setup and designing the website built on Sitecore 8.2 and involved in redesign of the website to Sitecore 9.3.

- Implemented **Sitecore/MVC** design pattern for developing the Web Application.
- Designed and developed **Sitecore Data Templates**, Branch Template, Layouts, Controller Rendering, View Rendering, Sub Layouts and Content Items for **Sitecore MVC**.
- Expertise in optimizing Sitecore environments by analyzing the existing set up and using best practices to create reusable **Sitecore templates and layouts**.
- Created Sitecore **workflows, securities**, rules and worked on actions **Installs and upgrades** for Sitecore application with new releases and hot fix patches.
- Involved in Design and development of user interfaces using ASP.Net Core MVC/ASP.Net MVC **Razor engine, ASPX** pages, **HTML5, JavaScript, jQuery, AJAX, CSS and Bootstrap**.
- Developed the Web Application in **ASP.Net** using Master Page, Themes & skins to maintain the consistent look and feel throughout the application.
- Developed **Views, controllers** and **business logic** models using **C#**.
- Worked on **Entity Framework 6/5** with database first approach to connect and perform Create, Update, delete operations on database using Language Integrated Queries (LINQ) and Lambda expressions.
- Implement security in web applications using ASP.NET Authentication and authorization mechanisms.
- Used **LINQ to SQL** as the data provider for communicating with the **SQL Server 2010/12/16** Database.
- Involved in developing API end points with **XML** and **JSON** documents for data transmission.
- Optimized Sitecore environments by analyzing the existing set up and using best practices to create reusable **Sitecore templates and layouts**.
- Developed and decoupled code using Design Patterns - **MVP, MVVM, Singleton, Factory** and concepts like **Dependency Injection, IOC, Lambda Expression, Delegates** (Inversion Control).
- Designed and developed **RESTful Web APIs** using **ASP.NET Core Web API** for client-server communication and integrated these APIs with the **front-end** using **AJAX** and **JavaScript**.
- Worked on handling data exchange between the **UI** and **back-end services** using **AJAX**, sending asynchronous requests and updating the DOM without page reloads.
- Integrate **SQL Server** databases with **.NET Core** applications, ensuring optimal performance for complex queries and ensuring that all interactions are smooth and efficient.
- Write complex **SQL queries** and **stored procedures** to handle data retrieval, manipulation, and updates in applications.
- Use **LINQ** and **Entity Framework Core** to simplify database access and operations while ensuring that data is securely retrieved and displayed.
- Created **Gulp** scripts for various tasks and used **Node.js** for managing application **UI** dependencies.
- Involved in Design and Architecture of the ASP.Net application, **WCF** and **WPF** based Web Services.
- Created and maintained database objects like complex **Stored Procedures, Views, User Defined Functions, Triggers, Cursors, Tables, SQL Joins** and **T-SQL Statements** in **SQL Server 2012** for Inserting/Updating/Deleting the data into the relational tables.

Web Developer
V9 Carinae, Hyderabad, India

Aug 2014 – April 2016

- Demonstrated expertise in **System Analysis, System Support, Client-Server Application Development** and **Designing**.

- Developed **web forms** using **ASP.NET 2.0** used **WEB controls** and **custom controls**. Used different **user controls**, and **Master pages** and **sitemaps** for all ASP.NET pages.
- Designed and developed user interface modules using HTML 5, CSS and JavaScript.
- Worked with **ASP.NET Web Forms**, **ASP .NET State Management**, **ASP .NET Caching features** and securing **ASP .NET web applications** using **ASP .NET Authentication**, **Authorization** and **Roles**.
- Used **ASP.NET MVC 3** for re-using the individual user controls by not coupling them with underlying data elements.
- Programmed **ADO.NET** for communication between application and database, extensively used **Data Grid**, **Data Set**, **Data Table**, **Data Views**, **Data Adapter**, **Data Readers** and **Repeater controls** with **paging** and **sorting** to render reports.
- Experience in **ASP .NET 3.0/3.5 versions** including the new integrated features like **WCF** and **WPF**.
- Created **WCF SOAP** Web Services using XML message format.
- Responsible for developing the full stack (front-end development, application logic, services, data persistence) as well as server setup and maintenance.
- Created Model objects using **Entity Data Model** with **Entity Framework** and used data context classes to perform **DML** operations.
- Tested for usability issues and style requirements. Tested for browser compatibility issues.
- Extensively worked on **WCF** and **Web Services** to provide SOA architecture and Configuration based activation applications on **SOAP** and **REST** protocols.
- Involved in developing and organizing **Custom Error pages** and **Exception Handling**.
- Developed parameterized **SQL queries** and **stored procedures** to query database tables in **T-SQL** and to avoid **SQL Injection** using **SQL server 2012**.
- Strong skills in **Relational Data Base Management System (RDBMS) Design, Development and Query Optimization in SQL server 2008**.

SKILLS:

Programming Languages:	C#, JavaScript, TypeScript, SQL, PL/SQL, C/C++
Databases:	SQL Server (2008/2012/2014/2016/2019), MySQL, NoSQL (MongoDB)
Front-end Technologies:	ASP.NET, AJAX, HTML5, CSS, Bootstrap, jQuery, React.js, Next.js.
Cloud:	Microsoft Azure, AWS (EC2, S3, Lambda), Docker
.NET Technologies:	.NET Core, ASP.NET MVC, Web API, Blazor, WCF, Entity Framework
Web Services:	RESTful APIs, SOAP, WebSockets
Testing Tools:	NUnit, xUnit, Selenium, Postman
Dev Tools:	Visual Studio, Jira, Confluence, Swagger, Docker, CI/CD Pipelines
Version Control & DevOps:	TFS, Git, Azure DevOps, Jenkins
CMS Tools:	Sitecore 8.2/9.0/9.3/10.1, SXA 9.3, Docker, Octopus, TDS, Unicorn RAZL, Coveo, SXA Scriban, Sitecore CLI, Sitecore XM Cloud
