PROFESSIONAL SUMMARY

Full Stack Developer with **4+ years of experience** delivering scalable **Java Spring Boot microservices** and modern **React.js applications** in cloud-native environments. Skilled in **AWS, Docker, Kubernetes, CI/CD pipelines, PostgreSQL, and Kafka**, with a proven ability to **reduce processing times by 80%+, improve system reliability, and enhance user experience**. Experienced in **Agile/Scrum** delivery, cross-functional collaboration, and mentoring junior developers. Strong record of building secure, high-performance solutions for **telecom and financial services domains**.

SKILLS

- **Programming & Backend:** Java, Spring Boot, REST APIs, Microservices, Hibernate, JPA, Maven, Gradle, GraphQL
- **Frontend Development:** React.js, Redux, Angular, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Material UI
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, CloudFormation), Docker, Kubernetes, Helm, Terraform, Jenkins, GitLab CI/CD, GitHub Actions, ArgoCD
- **Databases & Messaging:** PostgreSQL, MongoDB, MySQL, Redis, Apache Kafka, RabbitMQ
- **Testing & Quality Assurance:** JUnit, Mockito, Cypress, Playwright, Postman, Swagger, SonarQube
- **Monitoring & Security:** ELK Stack, Prometheus, Grafana, OAuth2, JWT, API Security, Identity & Access Management (IAM)
- **Collaboration & Methodologies:** Git, GitHub, Bitbucket, Jira, Confluence, Agile/Scrum, Kanban

PROFESSIONAL EXPERIENCE

Verizon Wireless Systems

Aug 2024 – Present

Java Full Stack Developer

- Developed Spring Boot microservices with Redis caching, reducing claims adjudication time by 85% (3 hrs → 15 min).
- Integrated fraud detection APIs with Kafka streaming, cutting fraudulent claims by 35% across enterprise workflows.
- Built reusable Angular + Material UI components, reducing manual claim review time by 60%.
- Deployed Drools rules engine for real-time validations, ensuring compliance and increasing claim accuracy.
- Automated regression testing with Cypress & Playwright, preventing 80+ recurring defects per sprint.
- Enhanced observability using ELK + OpenTelemetry, reducing incident resolution time by 40%.
- Implemented serverless workflows with AWS Lambda + SQS, scaling seamlessly for high-volume claims.
- Optimized CI/CD pipelines in Jenkins, cutting build & deployment times by 25%.
- Led API versioning strategy, enabling smooth backward compatibility during phased feature rollouts.
- Mentored junior developers via code reviews, pair programming, and technical sessions.

Capri Global

Jan 2020 – Dec 2022

Full Stack Developer

- Developed Spring Boot APIs for vendor reconciliation, improving inventory accuracy from 78% → 92%.
- Designed React.js + Redux portal for vendor onboarding, reducing onboarding time from 5 days → 2 hrs.
- Built Azure Functions for async data ingestion, increasing pipeline efficiency and scalability.
- Developed dashboards with ECharts + Grafana, enabling real-time reporting for decision-makers.
- Implemented GitLab CI/CD with Docker & Kubernetes, achieving zero-downtime deployments.
- Optimized PostgreSQL queries & indexing, improving response time by 30%.
- Migrated AngularJS components to React.js, reducing maintenance complexity and boosting performance.
- Integrated JWT/OAuth2 authentication, ensuring compliance with security policies.
- Created audit-ready PostgreSQL triggers & shadow tables, ensuring history tracking for compliance.
- Integrated third-party payment APIs, enabling secure vendor transactions and reducing payment failures.

EDUCATION

- **M.S. in Computer Science** – Wright State University
- **B.S. in Computer Science** – KKR & KSR Institute of Technology & Sciences

CERTIFICATIONS

- **Application Developer Middleware**
- **Microsoft Azure Certificate**
- **Executive Briefing AI**
- **Reinforcement Learning in Java**
- **AWS Certified Solutions Architect (In Progress)**
- **Kubernetes & Cloud-Native Associate (In Progress)**
