SOFTWARE ENGINEER IN TEST

[linkedin.com/in/rza-aliyev2](https://www.linkedin.com/in/rza-aliyev2)

PROFESSIONAL SUMMARY

Software Engineer in Test with 8 years of experience across mobile (iOS/Android), web, and backend testing in Agile teams. Hands-on in building automation frameworks from the ground up, improving existing ones, and making sure testing fits smoothly into CI/CD pipelines. Skilled in Appium, WebdriverIO, Selenium, and API testing tools like Postman and Rest Assured. Known for setting practical code standards, mentoring teammates, and helping choose the right tools and test suites to keep releases on track and issues under control.

TECHNICAL SKILLS

Languages: Java, JavaScript, C#, HTML, SQL, JSON, Gherkin, XML

Frameworks: WebdriverIO, Appium, Selenium, Cypress, JUnit, Playwright, TestNG, Cucumber BDD

Tools: Postman, Rest Assured, Allure Reports, SauceLabs, BrowserStack, Perfecto, Android Studio, Xcode

CI/CD: Jenkins

Version Control: Git, Bitbucket, Peer code review (PRs)

Build Tools: Maven, npm

Test Management: Jira Xray, Azure DevOps

Databases: Oracle, MySQL (JDBC)

Design Patterns: Page Object Model, Singleton

Test Practices: Mobile Automation, UI Testing, API Testing, Regression, Smoke Testing, Exploratory, CI/CD Integration, BDD, Agile/Scrum

WORK EXPERIENCE

Sr QA Developer | O'Reilly Auto Parts | Remote | 2023-2025

- Designed and built the iOS automation framework from scratch using WebdriverIO and Appium, introducing consistent code standards and reusable patterns.
- Took charge of smoke and regression suites for both iOS and Android, with every pull request going through peer review to maintain high code quality.
- Led the comparison of BrowserStack and SauceLabs, guiding the decision to adopt SauceLabs for cloud device testing.
- Worked closely with teammates to share mobile automation best practices, explain framework usage, and review code.
- Hooked automated tests into Jenkins CI/CD pipelines, running daily smoke and regression suites across simulators and physical devices.
- Helped speed up mobile automation onboarding by 40% with clear documentation and joint sessions with the Android QA team.

Sr QA Engineer | Citi | Remote | 2022-2023

- Maintained and enhanced smoke, regression, and functional suites built in Java/Selenium using the Page Object Model.
- Helped coworkers learn UI inspection techniques for automation, showing them how to choose stable locators.
- Flagged and documented major defects early in the cycle, preventing many from reaching production.
- Verified backend integrations with API testing in Postman.

Automation Engineer | Navy Federal Credit Union | Remote | 2020-2022

- Supported and updated an existing Java/Selenium/Cucumber BDD framework.
- Performed API testing in Postman as part of full-stack validation.
- Used Selenium Grid to run tests in parallel, cutting test execution times significantly.

QA Testing & Automation Engineer | Ryder Systems | Washington D.C | 2018-2020

- Wrote automated UI tests for critical features in Java, Selenium, and TestNG.
- Used Apache POI to handle Excel-based test data.
- Partnered with developers to resolve automation-related issues, improving release stability.

Software QA Tester | UnitedHealth Group | Washington D.C | 2017-2018

- Executed manual functional and regression testing during Agile sprints.
- Created reusable manual test cases to keep testing consistent across releases.
- Participated in sprint planning and defect triage, making sure testing priorities matched business needs.

EDUCATION

Master of Business Administration | Azerbaijan State Economic University, Baku, Azerbaijan

Bachelor Of Science in Economy | Azerbaijan State Economic University, Baku, Azerbaijan
