

Galeo Akoni

SQL SERVER DATABASE ADMINISTRATOR | AZURE SQL ADMINISTRATOR

Richmond, TX | Tel: 346-747-3081 | Email: akonigaleo@gmail.com | LinkedIn: www.linkedin.com/in/galeo-akoni

PROFESSIONAL SUMMARY

SQL Database Administrator with over 8 years of administering SQL Server database administration, Azure cloud Data Management and Tableau Administration. Proven ability to design and implement high availability and disaster recovery solutions, such as AlwaysOn, Failover Clustering, and Log Shipping, ensuring seamless operations in 24/7 production environments. Skilled in Azure Databricks for large-scale data processing and analytics, alongside proficiency in deploying, configuring, and optimizing Tableau and Power BI Server for interactive reporting and business intelligence. Adept at driving cloud migrations and automating DBA tasks using PowerShell and T-SQL. Committed to optimizing database performance, enhancing scalability, and ensuring security compliance across all systems.

SKILL OVERVIEW

SQL Server Integration Services (SSIS) | SQL Server Reporting Services (SSRS) | SQL Server Monitoring | T-SQL Scripts | Database Mirroring | Replication | Always On | High Availability Solution – Clustering | Traditional Failover Clusters | Azure Cloud | Azure SQL Database | Managed Instances | Elastic Pools | Azure Databricks | Azure Data Factory | Azure VMs | Log Shipping | Data Warehouse | Performance Tuning | Extract, Transfer, Load (ETL) | Data Migration | Disaster Recovery | Tableau Server Administration | Power BI | RDBMS (Relational Database) | Data Extraction | Technical Documentation | Automation | Team Leadership | Agile Lead | Scrum Master | On-Call 24/7 Production Support | Production-Level Support Onsite and Offshore | Microsoft Office | Azure Active Directory | Domain Services | Azure Security Center | Azure Governance | Security | MFA | Authorization | B2C | Data Privacy | Identity and Access Management (IAM) | Key Management | Access Controls and Security Protocols | HTML | IT | Experience with Terabyte Databases

TOOLS:

SSMS | SSDT | Azure Data Studio | SQL Profiler | Query Store | Extended Events | SentryOne | Spotlight | Idera Diagnostic Manager | SolarWinds (DPA) | Redgate | Data Migration Assistant | Data Migration Expert | Azure Blob Storage | ARM Templates | Azure Storage Explorer | Azure VMs | VMware | Hyper-V | vSphere | AzureDevOps | PowerShell | Tableau Server Administration | Power BI | Visual Studio | ServiceNow | Jira | Confluence | Rally | Cohesity | DDBOOST | Avamar

KEY ACCOMPLISHMENTS

- **Led Azure Cloud Migration Project** – Successfully migrated critical business applications and SQL Server databases from on-premises to Azure Cloud, improving performance and scalability by 40% and reducing operational costs by 30%. Integrated **Azure Databricks** for real-time data processing and analytics, accelerating business insights.
- **Implemented High Availability & Disaster Recovery Solutions** – Designed and deployed **AlwaysOn Availability Groups**, Log Shipping, and Failover Clustering strategies to ensure business continuity, reducing downtime by 30% and strengthening disaster recovery capabilities.
- **Directed Zero-Downtime Azure SQL Migration** – Oversaw migration of 250+ production databases to Azure SQL for a Fortune 500 client, preserving 100% data integrity, reducing query load times by 35%, and ensuring seamless operations during the transition.

PROFESSIONAL EXPERIENCE

SQL Server Database Administrator / MS Azure DBA

United Health Services | 02/2023 – Present

- **Situation/Task:** Supported enterprise-scale SQL Server environments (14TB+ VLDBs) with strict uptime/performance SLAs.
Action: Administered, optimized, and maintained SQL Server 2016–2022 across production workloads.
Result: Delivered consistent high availability and mission-critical stability.
- **Situation/Task:** Business required highly available SQL workloads in AWS and Azure.
Action: Designed and implemented **Always On Availability Groups**, multi-node clustering, read-scale routing, job sync, and redo latency troubleshooting.
Result: Achieved **99.99% uptime** and seamless failover/failback during production incidents.
- **Situation/Task:** Production query performance degraded under high concurrency.
Action: Tuned complex queries using DMVs, SQL Sentry, and SolarWinds DPA; optimized indexing strategies.
Result: Improved query response times by **40%**, boosting application performance.
- **Situation/Task:** Manual maintenance tasks and routine monitoring consumed DBA bandwidth.
Action: Automated backups, index defragmentation, log shipping, AG checks, and proactive health checks using PowerShell/dbatools.
Result: Reduced manual workload by **30–40%** and improved operational efficiency.
- **Situation/Task:** Organization required disaster recovery readiness and compliance.
Action: Implemented and tested DR strategies, including corruption recovery, cross-region replication, and storage failure handling.
Result: Ensured **RPO < 15 minutes** and **RTO < 1 hour**, passing audits.
- **Situation/Task:** Rising IT costs impacted budget efficiency.
Action: Consolidated servers, migrated to Azure elastic pools, and leveraged VMware for virtualization.
Result: Saved **\$250K annually** in licensing, hardware, and support costs.
- **Situation/Task:** Business moved workloads to cloud-first strategy.
Action: Provisioned Azure databases, Managed Instances, elastic pools, and VMs; migrated on-prem SQL workloads to Azure.
Result: Enabled **scalable and cost-efficient cloud adoption**.
- **Situation/Task:** High availability required in the cloud.
Action: Installed/configured SQL Server VMs in Azure and built Windows clusters for HA.
Result: Delivered resilient and fault-tolerant production databases.
- **Additional Achievement:** Directed **zero-downtime migration of 250+ production databases to Azure SQL**, preserving 100% data integrity and reducing query load times by 35%.

- **Situation/Task:** Developers required schema and object enhancements for critical applications.
Action: Designed and modified tables, stored procedures, functions, and triggers.
Result: Delivered efficient database solutions supporting business needs.
- **Situation/Task:** Organization needed peer training for smoother DBA operations.
Action: Oriented junior DBAs on upgrades, migrations, and best practices.
Result: Improved team capability and reduced knowledge gaps.
- **Situation/Task:** Performance troubleshooting required advanced analysis.
Action: Utilized SQL Profiler, Extended Events, Query Store, and Database Tuning Advisor.
Result: Enhanced system performance and reduced downtime in 24/7 production environments.
- **Situation/Task:** Led **Azure Cloud Migration Projects** for multiple clients.
Action: Migrated on-premises SQL Server workloads to Azure, integrating **Azure Databricks** for large-scale data analytics.
Result: Improved scalability by 40% and reduced operational costs by 30%.
- **Situation/Task:** High availability and disaster recovery planning required.
Action: Implemented **AlwaysOn, Log Shipping, and Failover Clustering** for mission-critical databases.
Result: Reduced downtime by 30% and strengthened disaster recovery readiness.
- **Situation/Task:** Managed business intelligence reporting environments.
Action: Deployed and optimized **Tableau Server** and Power BI dashboards for interactive reporting.
Result: Reduced report generation time by **25–40%** and improved reporting accuracy.

EDUCATION & TRAINING

- Bachelor of Science in Business Administration – 2015
- Advanced Database Administration and T-SQL Programming – 2016
