San Jose CA

Tel: 979-739-1573

Email: mr.shaohuay@gmail.com

EDUCATION

Texas A&M University, College Station, TX

May. 2021

Master of Science in Computer Science (GPA 4.0/4.0)

SKILLS:

- Languages: Java, Javascript, Typescript, Python, PHP, HTML, CSS, C/C++, SQL, Shell/Scripting, Markdown
- Techstacks: React Native, React JS, GraphQL, MySQL, PostgreSQL, DynamoDB, Redis, Kohana, Spring Boot, Reactor, Dropwizard, Falcon, Django, Qt, Keras, AWS, GCP, OpenAPI, gRPC, Kafka, Airflow, Nginx, Memcached, EC2, Cron, BigQuery, jQuery, AJAX, GPG, SSH, MPI, WeChat Mini Program

EXPERIENCE

ChoreConquer – Android/IOS

March 2025

- Launched a dual platform mobile app which lets people manage chores in their family and motivates children to engage in more family activities.
- Built backend with Postgresql as database, Spring Boot as application layer. Exposed resources as Restful API & GraphQL. Used flyway to manage DB schema migration. Implemented in-house JWT authentication layer. Added email verification flow with resend.com.
- Developed the frontend with React Native and Expo Router. Standardized the user experience with gluestack.io
- Deployed the backend to the Oracle Cloud with namecheap.com as the domain provider. Implemented the in-house SSL and HTTPS solution with Nginx and letsencrypt.org
- Developed CI/CD pipeline using Github Actions, automates the build, test, and deployment processes.

JPMorgan Chase & Co., WePay, Palo Alto, CA

Lead Software Engineer

Feb 2023 - Feb 2024

Software Engineer

June 2021 - Feb 2023

- Migrated the entire AMEX payment soft merchant system to new unblocking JAVA backend stack with Java Reactor
- Replaced all existing MySQL databases with NoSQL through AWS DynamoDB.
- Lead the decomposition of a legacy PHP Kohana pricing billing monolithic service to a new JAVA microservice
- Designed and built the pricing policy in WePay pricing system from ground up, which enables card network compliance. Added email notification to the billing flow with Kafka message queue.

JPMorgan Chase & Co., WePay, Redwood City, CA

June. 2020 – Aug. 2020

Software Engineer Intern (remote)

- Designed and implemented the automated credit card export tool using PHP, Javascript, JQuery and Ajax. The feature is expected to save 16 person weeks a year for the Engineering team from manual work.
- Added access control and auth flow to the credit card export tool.
- Built audit log with the searching feature, which automatically records activities with the credit card export tool and allows people to search history log for auditing purposes.

Anonymous chat room – Web

May. 2020

- Built a web application in Python and Django running on multiple AWS EC2 servers, with load balancer implemented by Nginx. The app lets people chat with each other in different rooms anonymously.
- Implemented the real time chatting UI/UX by Django Channel and AWS Redis, so that all people in the same room will receive the new message immediately as soon as the message is sent out.
- Managed chat history data in MySQL deployed in AWS, which will be loaded to people when entering the room, so people can quickly understand the topic and start chatting.

Nintendo Switch Game Deals - WeChat Mini Program

Dec. 2020

- Developed a WeChat mini program integrating with a third party API to show current Nintendo eShop game deals
- Implemented dynamic loading with AJAX, so user can start browsing content without waiting all data to be loaded

Jump detection – AI/ML

May. 2020

- Constructed and trained a deep neural network using Python Keras, which takes video format as input, and outputs the possibility of detecting jump action in the video. The final result has 97% accuracy.
