

Daniel Paris

Fairfax, VA, 22033 | parisdaniel059@gmail.com | LinkedIn - <https://www.linkedin.com/in/danieldeparis/>

Lead Full-Stack Engineer with 12+ years of experience building and deploying scalable web applications. Proven ability to lead technical projects from concept to production, including front-end development (React, Next.js, D3.js), back-end engineering (Python, Node.js), and cloud infrastructure management (AWS). Expertise in developing RESTful APIs, integrating AI-powered features (chatbots, recommendation engines), and establishing CI/CD pipelines for increased deployment frequency. Passionate about creating innovative solutions that drive business value.

PROFESSIONAL EXPERIENCE

Innostax

Remote, MA

Senior Software Engineer

August 2020 – Present

- **Led the development of a CRM software solution for a GreenTech beverage sales company**, utilizing **React, Next.js, Prisma, Recharts, and PostgreSQL**. This application provided real-time insights into sales, user behavior, and operational metrics, empowering the client to make data-driven decisions and improve sales performance.
- **Spearheaded the design and development of a scalable MVP for an AI-powered supply chain management startup**, leveraging **Next.js, NestJS, GraphQL, D3.js**, and **OpenAI** integration. Key features included AI-powered contextual search, Stripe payment integration, and SEO optimization.
- **Automated data collection by scraping 10+ global e-commerce websites using Playwright, Selenium, and Puppeteer**. Successfully extracted over 100,000 product listings, enabling faster and more data-driven market analysis. **This data helped in competitive intelligence and product pricing analysis.**
- **Architected and implemented 15+ RESTful APIs using FastAPI, Django, Node.js, and Express.js for logistics, payment processing, and customer management systems**. These APIs supported over 50,000 daily calls, **ensuring seamless operation of critical business processes.**
- **Migrated a monolithic legacy application to a distributed microservices architecture on AWS (EC2, S3, RDS, CloudFormation)**. This transition resulted in a 40% increase in system reliability and a 25% reduction in infrastructure costs.
- **Established CI/CD pipelines using Jenkins, Docker, Amazon EKS, and Infrastructure as Code (Terraform)**. This automation led to a 75% increase in deployment frequency, enabling faster release cycles for critical updates and features.

GrubMarket Inc.

Remote, CA

Full Stack Engineer

Aug 2016 – July 2020

- **Modernized the retail E-commerce platform by migrating from a legacy Java-based system to PHP Laravel and Vue.js**. This migration resulted in a 40% reduction in page load time, significantly improving development efficiency and reducing long-term maintenance costs.
- **Developed and implemented AI-powered solutions for a B2B e-commerce platform, including voice-to-order functionality, an AI assistant, and GPT integration**. These features led to a 30% reduction in order processing time and a 20% increase in customer satisfaction.
- **Engineered a high-performance event-driven architecture using Apache Kafka, RabbitMQ, and Nginx, processing over 1 million events daily**. This architecture enabled real-time data synchronization across systems, resulting in a 50% improvement in data consistency and a 40% reduction in latency.
- **Optimized MySQL database performance by refactoring 50+ SQL queries and implementing Redis caching**. This optimization reduced query response time from 500ms to under 100ms, leading to a 25% increase in user retention due to improved load times. **This faster performance significantly enhanced the user experience and contributed to increased user engagement.**
- **Automated inventory management workflows using serverless functions deployed on AWS Lambda**. This automation ensured real-time stock level updates, resulting in a 30% reduction in stockouts and a 20% improvement in inventory accuracy. **This automation streamlined inventory management and minimized lost sales due to stock shortages.**
- **Proactively monitored system health using Datadog and New Relic, identifying and resolving 30+ performance bottlenecks**. This proactive approach ensured 99.99% service availability and eliminated downtime incidents. This high level of availability ensured uninterrupted service for customers and protected the company's reputation.

- **Designed and implemented an interactive custom apparel design tool using JavaScript, React, and HTML5 Canvas.** This tool provided real-time previews and seamless customization, enabling over 1 million unique designs annually and contributing to a 25% boost in sales.
- **Developed and maintained back-end services using Django and Flask, supporting the processing of over 50,000 orders and 20,000 customer records annually.** This robust back-end infrastructure improved order fulfillment efficiency by 30% and reduced system downtime by 20%.
- **Collaborated with designers and product managers to enhance the platform's UI/UX, conducting A/B tests on 10+ key features.** These tests resulted in a 20% increase in user satisfaction and a 15% boost in feature adoption. **These UI/UX improvements significantly enhanced the customer experience and drove user engagement.**
- **Automated regression and functional testing workflows using Selenium and Pytest.** This automation detected and resolved over 100 critical bugs, improving release efficiency by reducing manual testing time by 50% and decreasing post-release defects by 30%.

TECHNICAL SKILLS

- **Programming Languages** - JavaScript, TypeScript, Python, PHP, HTML, CSS
- **Frontend Technologies** - React, Next.js, Vue.js, Nuxt.js
- **Backend Technologies & Frameworks** - Node.js, NestJS, Express.js, FastAPI, Django, Flask, Laravel
- **API Development**- REST APIs, GraphQL
- **Databases & Caching** - PostgreSQL, MySQL, MongoDB, Redis
- **Cloud Services & DevOps** - AWS (EC2, Lambda, S3, RDS, EKS, ECS, Amplify, SES), Terraform, Docker, Kubernetes, Jenkins
- **Message Queues & Event Streaming** - Apache Kafka, RabbitMQ
- **Testing & Automation** - Selenium, Playwright
- **Monitoring & Performance Tools** - Datadog, New Relic, Prometheus, Grafana
- **Project Management Tools**- Agile, Scrum, Jira

EDUCATION

- **Texas State University**
Bachelor of Science : Computer Science

2008 – 2012
