Experience

Digital Water Business Specialist, Memphis, TN

Buckman | December 2023– Present

- Furnish internal and external operation transaction support for the Digital Water team through the utilization of SAP and collaboration with Buckman personnel to accomplish the departmental objective of achieving continuous improvement through the development of group implementations.
- Dispense digital integration support for Buckman ERP platforms (Ackumen and SAP) to provide process automation insight and complete various business processes while serving as the key internal resource for Digital Water operational functions.
- Apply customer experience agile techniques to educate clients during their onboarding for the Digital Water product with an emphasis from an operational end-user support perspective.
- Communicate pertinent material to the Digital Water team such as subscriptions, renewals, invoicing, and lead times of the Digital Water product from a customer usage and reporting perspective.

Technical Project Analyst, Memphis, TN

Orion Federal Credit Union | November 2021 – June 2023

- Managed vendor inquiries and their respective deliverables during Orion's conversion into a new platform serviced by provider Q2 (Start: October 2021 and Rollout: early May 2022).
- Analyzed conversion inconsistencies during limited production, managed helpdesk tickets to their completion, and coordinated validation procedures with Q2 and the following vendors: SavvyMoney, MoneyDesktop, Doxim, Alogent, Encompass, IMSI, Payments Exchange, FIS (Fidelity Information Services), and Neural Payments.
- Created detailed member process flows via Microsoft Office that served the purpose of translating pertinent information acquired via Voice of the Customer (VoC) into presentable opportunities that allowed me to apply value inclusion accordingly.
- Utilized the feature called Q2 Discover in its entirety to build, test, and finalize via production rollout; multiple member-facing enhancements within Orion's mobile app environment to help enhance the overall member experience.
- Collaborated with my supervisor, Director of Technology Strategies/Member Experience, to interpret the digital transformation initiative and development strategy in order to research, design, scope, track, test, and rollout new digital banking services for Orion members.
- Partnered with the Digital Banking Manager to refine digital banking project scopes through collection of project requirements from business units and communicating business needs to technical developers in addition to external vendors.
- Researched procedures within internal departments and acquired information from business units on efficiency requests, new software, hardware requirements.
- Created testing scripts, conducted end user testing for new implementations via Qualtrics, notated and communicated testing results to relevant internal and external project members.
- Assembled project materials, tracked project tasks and expenses utilizing Microsoft SharePoint, and created training as well as marketing documentation for internal departments on new features for educational purposes.

Business Systems Analyst, Memphis, TN

FedEx | April 2019 – October 2021

- Championed and prioritized from an internal ranking perspective, as Demand Management Lead, all in-flight Rating and Invoicing train demand requests in addition to managing their respective progressions on behalf of the business from a proposal state to project status within the ERP PPM system tool.
- Utilized VersionOne to manage the progression of features through the various Kanban stages to ensure proper feature readiness for scrum and development teams to consume during scheduled Program Increment (PI) Planning events.
- Contributed through SAFe® Agile methodologies expertise towards software design and business process re-engineering.
- Lead international package shipment initiative that helped Asian Pacific countries and the UK minimize revenue losses up to \$6.5M due to inaccurate billing from shipments never leaving their origin destination.
- Trained incoming employees about revenue planning and engineering application user interfaces while providing insight towards the correlation between those interfaces and the departmental mission.
- Designed software requirements through revenue strategic programs that involved integration systems testing via price harmonization to match regional business needs.

Darryl Smith II
(901) 649-4791 ■ darryldsmith92@gmail.com

Financial Data Processor, Cordova, TN

Stratas Foods | January 2018 – March 2019

- Created long-term vision strategies through root cause analysis and SQL procedures for IBM database operation and credit/debit risk utilization on behalf of Finance and accounting departments.
- Identified through Oracle change management discrepancies through ad hoc via collaboration with Finance to resolve business solutions.
- Maintained account credit reports to be processed into mainframe systems.
- Provided Finance/Accounting risk support to projects within the Deductions group and other departments as needed.

Trade Promotions Analyst, Cordova, TN

Stratas Foods | October 2017 – December 2017

- Analyzed product metrics to reflect and monitor AR deals offered by sales.
- Interpreted finance documents through ad hoc requests of incoming deduction trade related items to be set up for program set up completion.
- Consulted with vendors about product health operation metrics supported by existing trade and resolved sales discrepancies.
- Defined risk factors during SQL category research information in marketplace for projects and utilized Excel through analytical reasoning techniques.

Associate Sourcing Specialist, Memphis, TN

FedEx | September 2016 – May 2017

- Supervised IT category-specific Request for Proposal (RFP) and Request for Questioning (RFQ) about product bids from competitive pricing of commodity additions.
- Strategically managed international integrations via agile methodologies as well as contracts on behalf of departments in accordance with risk evaluations through ERP analytical sourcing processes.
- Monitored supplier sustainability performance health through creation of scorecards as well as scheduled business reviews that ensured business milestones were met.
- Implemented SQL techniques, Lean Management and Quality Driven Management (QDM) techniques during in-depth project presentations to senior and executive management about category health, overall spend, and prospective new asset acquisitions.

Accounting Agent, Memphis, TN

V. Alexander Worldbridge | May 2016 – August 2016

- Directed corporate and customer electronic checks through QuestaWeb, CargoWise, and VAX while reconciling several types of journal entries.
- Procured analysis support to the import, export, and accounts receivable departments, forecasted, and concurred with other departments on organizational goals.

Accounts Payable Auditor, Collierville, TN

FedEx | June 2015 – May 2016

- Audited high volume of travel and expense statements, and processed expense reports using PeopleSoft.
- Executed daily totals on Electronic Check Requests, daily metrics on queue totals, and created monthly reports.

Implementation Coordinator, Cordova, TN

Invoice Cloud | May 2014 – November 2014

- Supported Implementation Managers with project plan execution, documentation management, etc.
- Contributed towards multiple interactive voice response (IVR) infrastructure builds.
- Coordinated documentation and implementation start dates with vendors and partners.
- Arranged interviews, performed research, assisted with reconciliation, updated reports for management and used company credit card to purchase supplies and items for special events.

Operations Coordinator, Memphis, TN

Shelby Farms Park Conservancy | January 2014 – May 2014

- Allocated support to Park Operations Manager, represented the operations department at meetings with employees, contractors, government partners, park, and educational partners.
- Assessed projects, recommended solutions to management, supported budget compliance and served as liaison between executives, management, and outside groups.
- Assisted with payroll activities, maintained monthly work schedule, prepared agendas, and scheduled meetings.
