Summary

Cybersecurity Professional with 2.5+ years of experience in threat detection, vulnerability management, network security, and incident response. Holds a Master's in Cybersecurity from California State University Dominguez hills. Skilled in security monitoring, compliance audits, risk mitigation, and enterprise security posture enhancement.

Work Experience

Information security intern, SiliconBricks Technologies Jan 2021 - July 2021

- Conducted vulnerability scans and assisted with patch management to enhance cybersecurity measures.
- Supported compliance audits to ensure adherence to industry regulations.
- Contributed to the implementation of security policies and procedures at SiliconBricks.
- Developed skills in cybersecurity, compliance, and policy implementation.

Junior Cybersecurity Analyst, SiliconBricks Technologies Aug 2021 – Aug 2023

- Monitored systems for cyber threats, assisted in incident response, and conducted vulnerability assessments.
- Documented and reported security incidents for mitigation, ensuring a secure environment for SiliconBricks.
- Developed strong analytical skills and attention to detail in identifying and resolving potential security risks.

Education

California State University Dominguez hills, MS in Cyber Security Aug 2023 - Dec 2024

- GPA: 3.78/4.0

Anurag College Of Engineering, BTech Computer Science and Engineering Aug 2018 - Aug 2022

- GPA: 6.4

Projects

Intrusion Detection & Prevention System IDPS Aug 2024 - Dec 2024

- I Created a project that presents the design and implementation of a comprehensive Intrusion Detection and Prevention System (IDPS) that combines packet analysis, signature-based detection, and real-time monitoring and visualization to protect network infrastructure.
- Tools Used: SNORT, SCAPY, Elasticsearch, Kibana, Kali Linux.

A User-Centric Machine Learning Framework For Cyber Security OperationsCenter May 2022 - Aug 2022

- Developed a user-centered computer learning system that affects large data from various security logs, awareness information, and inspector intelligence.

Optimizing Information Leakage in Multi cloud storageservices Sep 2021 - Nov 2021

- I developed an approximate algorithm, BFSMinHash based on Minhash to generate similarity-preserving signatures for data chunks. Based on the information match measured by BFSMinHash, we develop an efficient storage plan generation algorithm, Clustering, for distributing users data to different clouds.

Tic Tac Toe Jun 2021 - Jul 2021

- I developed a simple game of Tic Tac Toe GUI with Python.

Certifications

CompTIA Security+ ce Certification Jan 2025

Google Cybersecurity Professional Certificate Jan 2025

Full Stack Development JSpiders

Feb 2023

Agile Methodology Virtual Experience Program (Cognizant) (Forage)

Dec 2022

Accenture Nordics (Developer program)

Aug 2022

Skills

Cybersecurity Management | Network Security | Threat & Vulnerability Management | Risk Management |
Malware Analysis | End-Point Security : Carbon | Black AV, McAfee, CrowdStrike | SQL | Linux | Python |
Firewalls
