

Gina Galgano, M.S.

PMP-certified project leader with almost 2 decades of experience driving complex, global initiatives across life sciences, biotech, pharma, and consumer products. Proven success in business transformation, cross-functional integration, risk mitigation, and change management. Adept at leading strategic programs from ideation through execution, with strong executive reporting and governance. Committed to delivering operational excellence.

PROFESSIONAL EXPERIENCE

Amgen Inc. - Senior Project Manager – Global Quality Strategic Planning & Operations (Contract Worker)

October 2023 – Present | Remote

- Leads cross-functional, multi-site quality transformation programs to optimize Amgen's global QC network across 7 sites in the Americas, Europe, and Asia.
 - Manages a portfolio of over a dozen initiatives, including digital transformation, workforce optimization, cost reduction, and lab network integration to drive increased capacity, speed, and reliability.
 - Develops and delivers weekly executive-level reporting on program status, risks, interdependencies, and escalations to the Quality leadership team.
 - Facilitates global alignment and change management on organizational capabilities, talent strategies, and standardization of quality operations, contributing to operational efficiency, long-term scalability.
-

Verity Packaging, Inc. - Director of Project Management, Operations & Sales

February 2022 – June 2023 | Remote

- Established and scaled the project management function for a fast-growing startup, supporting cross-functional teams across Operations, Engineering, Sales, and Quality.
 - Led selection and implementation of key enterprise systems including project management (Asana), ERP (Odoo), and CRM (HubSpot), optimizing workflows and scalability.
 - Managed 15+ simultaneous cross-functional projects across Sales, Manufacturing, and Quality, with a focus on risk mitigation, process standardization, and business process improvements.
 - Drove cross-functional communication across internal teams, external factories, and clients, enabling agile decision-making and rapid issue resolution.
 - Assisted R&D Engineering team with setting up test methods including stability and compatibility testing, as well as scale up from innovation prototypes to pilot batches and commercialization.
 - Spearheaded cultural initiatives to drive employee engagement, team building, and leadership development.
-

Guthy Renker - Senior Project Manager, R&D / Product Development

June 2019 – October 2021 | El Segundo, CA

- Led portfolio of 80-100 concurrent product development projects across skincare, haircare, cosmetics, and OTCs, supporting major omni-channel brands.
- Oversaw projects from idea conception, formula development, packaging development, product safety testing, clinical studies and claim substantiation, testimonial groups, artwork and copywriting, regulatory and legal review, strategic sourcing, manufacturing, and commercialization.
- Partnered with senior management to ensure alignment on key milestones, resource planning, and risk mitigation strategies across product development lifecycle.

- Championed cross-departmental process improvements, including development of a centralized SharePoint system and implementation of weekly governance meetings, enhancing efficiency and communication across all teams.
-

Bachem Americas, Inc. - Project Manager, CMC

July 2017 – June 2019 | Torrance, CA

- Managed 20-30 drug development and manufacturing campaigns in various stages. Products included peptide new chemical entities (NCEs), oligonucleotide NCEs, commercial API, research and specialty products, for non-GMP, clinical, and commercial GMP use.
 - Maintained over 95% on-time delivery, ensuring alignment across Sales, Operations, R&D, Manufacturing, QC, QA, Regulatory Affairs, Logistics.
 - Served as primary liaison for global clients and multi-site technical teams.
 - Reported monthly project status, closing, and financials to senior leadership.
-

SGS North America Inc. - Technical Manager & Senior Microbiologist

August 2014 – April 2017 | Carson, CA

- Technical Manager (December 2015 – April 2017)
 - Responsible for management of equipment validations, specialized studies, and subcontracted testing.
 - Created detailed schedules for execution of multiple projects to deliver to senior management. Ensured compliance of all documents to quality assurance and regulatory requirements.
 - Senior Microbiologist (August 2014 – December 2015)
 - First microbiologist hired in support of SGS' first West Coast life science contract testing services lab.
 - Developed the laboratory SOPs and test methods, product validations, oversaw and performed equipment qualifications, and advanced and specialized studies as requested by clients.
 - Performed microbiological, chemistry, and bioanalytical testing of pharmaceutical products, biologics, and medical devices.
-

Nephron Pharmaceuticals Corporation - Microbiologist III

February 2014 – July 2014 | Columbia, SC

- First microbiologist hired to support a brand new sterile manufacturing facility.
 - Authored the facility's first environmental monitoring master plan and IOPQ of new equipment. Developed new SOPs and test methods. Conducted method validations.
 - Hired and trained staff, supervised technicians, oversaw the aseptic gowning certification program.
-

AAI Pharma Services Corp. / Cambridge Major Laboratories Inc. (now Alcami) - Microbiologist

November 2009 – February 2014

- August 2012 – February 2014 / Charleston, SC
 - Led the startup of new microbiology lab testing capabilities for the sterile small molecule drug substance and drug product manufacturing facility.
 - Trained other analysts and served as subject matter expert and trainer for various microbiological testing.
 - Performed installation, operation, and performance qualifications for laboratory equipment and testing validation.
- Assistant Scientist I November 2009 – August 2012 / Wilmington, NC

- Responsibilities in support of a contract testing lab included microbiological testing of pharmaceuticals, medical devices, and biologics.
 - Ensured that routine tests requested by clients were performed promptly and in accordance with USP, CFR, and FDA established methods.
 - Created protocols, test procedures, reports, laboratory investigations, and standard operating procedures.
-
