EXPERIENCE

Symbolic, Senior Software Engineer

Jan 2025 - Present

Working on a robust and fault-tolerant warehouse robot simulation platform in Java (Spring Boot), Python, Kafka and Kubernetes to enable accurate virtual testing of bot actions in warehouse environments.

Hoosier Community Network, Senior Consultant

Aug 2024 - Dec 2024

Conducted research on small businesses in Indiana, focusing on digital presence, technology adoption, and business strategies. Developed whitepapers, market research reports, and website mock-ups to support small business growth initiatives.

Indiana University, Assistant Instructor, Computer Networks & HPC

Aug 2024 - Dec 2024

Assisting professors with material creation, lesson planning, class preparation, scheduling, exam distribution, and student mentoring for High Performance Computing and Computer Networks courses.

Blume Global, Staff Engineer

Oct 2021 - Jun 2022

Developed an application to optimize delivery routes and transportation modes for delivery orders. This was done using ReactJS, Google library (Distance API), and microservices

Designed a user-centric website for drivers and end-users, streamlining the order fulfillment process from warehouses to customers.

Designed a system that enabled the drivers to utilize the shortest and most cost-effective routes. This significantly improved delivery efficiency and customer satisfaction.

PayU, Senior Software Engineer

Sep 2019 - Sep 2021

Delivered an 80% performance improvement by revamping the eCommerce payment settlement protocol through redesigned system architecture.

Collaborated with merchants to generate comprehensive settlement reports, facilitating efficient dispute resolution for banks and card providers.

Developed APIs connecting with Mastercard and Visa servers to seamlessly fetch commission information, augmenting the functionality and value of the PayU platform.

Infosys, Technology Analyst

Jul 2017 - Aug 2019

Leveraged Esper engine to develop anomaly detection rules and identify potential threats for an eCommerce application.

Developed an advanced user authentication and authorization system for auto-pay transactions, strengthening system security.

Capgemini, Associate Consultant

May 2013 - Jun 2017

Designed and implemented an insurance policy recommendation tool based on client-specific liability factors, providing personalized policy suggestions.

EDUCATION

Indiana University Bloomington

Computer Science • Aug 2022 - May 2024

Courses: Engineering Cloud Computing, Applied Machine Learning, Artificial Intelligence, Data Mining, Computer Networks, Theory of Computing, Deep Learning, Software Engineering.

Visvesvaraya Technological University

Bachelor • Computer Science • May 2009 - May 2013

SKILLS

Java • Javascript • Python • Go • C • C++ • SQL • AWS • GCP • Azure
