PROFESSIONAL SUMMARY

Results-driven Full Stack .NET Developer with 3+ years of experience designing, developing, and deploying scalable, secure, and high-performance web applications using ASP.NET Core, C#, Angular, SQL Server, and MySQL. Skilled in microservices architecture, REST API development, and cloud-native solutions on Microsoft Azure. Hands-on with JWT authentication, RBAC, and Azure Key Vault for enterprise security. Proven record of delivering business value — improved application performance by 25%, reduced manual operations by 40%, and shipped high-quality releases with 80%+ automated test coverage. Strong collaborator in Agile/Scrum with expertise in CI/CD automation, observability, and performance optimization.

TECHNICAL SKILLS

Backend & Microservices: ASP.NET Core Web API, .NET Core Microservices (Controller, Service, Repository, Data layers), EF Core, ADO.NET, LINQ, AutoMapper, Dapper

Frontend Development: Angular, TypeScript, HTML5, CSS3, JavaScript (ES6+), Bootstrap (basic React.js knowledge)
Databases: SQL Server, Azure SQL Database, MySQL, SQL Server Management Studio (SSMS), EF Core Migrations, Transact-SQL, Query optimization & performance tuning

Authentication & Security: JWT, Azure Key Vault, Azure API Management, RBAC, API Security Best Practices

Cloud & DevOps: Microsoft Azure (App Service, Functions, Blob Storage, Key Vault, API Management, Azure Active Directory, AKS), GitHub Actions, Azure DevOps (YAML pipelines), Docker

Testing & Monitoring: xUnit, Moq, Postman, JMeter, Serilog, Azure Application Insights, ELK Stack (Elasticsearch, Logstash, Kibana), Splunk

Collaboration: Git, Azure Repos, Agile/Scrum, Sprint Planning, Code Reviews

PROFESSIONAL EXPERIENCE

Full Stack Developer, Capital One Aug 2024 – Present | Remote, USA

- Built and secured REST APIs with ASP.NET Core, EF Core, JWT, and Azure Key Vault.
- Designed Angular dashboards with TypeScript-based components and advanced filtering, reducing booking errors by 30%.
- Automated CI/CD with GitHub Actions and Azure DevOps, implementing YAML pipelines to cut deployment time by 40%.
- Integrated Serilog, Application Insights, and ELK stack dashboards for proactive monitoring and analytics.
- Developed event-driven Azure Functions with API Management for 10+ internal and partner applications.
- Optimized SQL queries in SQL Server (via SSMS) and Service Bus, cutting manual tasks by 45%.
- Secured APIs with Azure Active Directory and
- LINQ for faster reporting (20–25% gain).

Software Engineer, TCS Jan 2021 – Dec 2022 | Mumbai, India

- Developed .NET Core microservices for asset management, enabling real-time tracking of 10,000+ assets.
- Built Angular dashboards with TypeScript and charting libraries, reducing manual reporting by 25%.
- Implemented RBAC-secured JWT authentication with Azure Active Directory and Key Vault secrets management.
- Automated builds and tests with GitHub Actions pipelines, adopting YAML workflows to increase release readiness.
- Improved database operations — optimized SQL Server and MySQL queries using SSMS to enhance report responsiveness by 20%.
- Added centralized logging with Serilog and monitoring via Application Insights, Splunk, and ELK to strengthen reliability.

EDUCATION

Master of Science, Saint Louis University Jan 2023 -Dec 2024 | MO, USA
Computer and Information Science

Bachelor of Technology, Lakireddy Bali Reddy College of Engineering Jun 2017 – Jun 2021 | AP, India
