

MUHAMMAD HOSSAIN

Fort Washington, MD | mhossainmd25@gmail.com | 1-571-658-9226 (cell)

An Accessibility Specialist in Section 508 Compliance testing and development (Front-end), Automation Test Engineer, and skilled QA Analyst with extensive production experience and demonstrated expertise. Proven ability to manage high-impact projects within Agile and deadline-driven environments.

WORK AUTHORIZATION: U.S. Citizen

EDUCATION: M.S. in IT & E-Commerce

GOVERNMENT SECURITY CLEARANCE: Public Trust

CERTIFICATIONS & ADDITIONAL TRAINING

- Certified SAFe 5 Practitioner (Scaled Agile) – Cert ID: 06266082-3157
- Certified Scrum Master (Scrum Alliance) – Cert ID: 600921
- Certified 508 Compliance Trusted Tester (Department of Homeland Security) – Cert ID: TT-2307-03247
- Google Certifications: Introduction to Generative AI, Generative AI for Developers
- Snowflake Data Analyst Certification
- AWS Cloud Practitioner & AWS Technical Essentials for U.S. Government

STRENGTHS / PROFESSIONAL SKILLS:

- Over 12 years of experience in Quality Assurance, Performance, Data Analysis, Section 508 Compliance Accessibility, Manual and Automation Testing.
- Expertise in the Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), and Business Requirement Documentation (BRD). Specialized in project management, planning, and coordinating web/software development, testing, and execution.
- Highly organized with strong responsibility, ethics, and ownership in professional and personal realms.
- Skilled in analyzing Software Requirement Specifications, Requirement Traceability Matrix, Functional Requirement Specifications, Business Rules, and Test Analysis Reports.
- Proficient in creating, reviewing, and executing Test Plans, Test Scenarios, Test Cases, and Test Scripts.
- Technically adept in various testing types, including Functional, Positive, Negative, Regression, Black Box, System, User Acceptance, End-to-End, Business Process, and JUnit Testing.
- Proficient in Unified Functional Testing (UFT)/QTP, Application Lifecycle Management (ALM)/QC, JIRA, TestRail/Zephyr Squad, JMeter, SoapUI/ReadyAPI, and REST Web Services.
- Skilled in writing SQL and Snowflake SQL queries for back-end database testing and validation.
- Experienced in designing, creating, implementing, and maintaining Automation Frameworks (Keyword Driven, Data Driven, Modular Driven, and Hybrid) using UFT, Selenium (WebDriver and Appium), Python/Java EE/C#, Coded UI, TestComplete, Eclipse IDE, PyCharm IDE, Jenkins, GitHub, Selenium Grid, etc.
- Experience with cloud-based data platforms like Snowflake and relational databases (RDBMS) such as SQL Server, MS Access, and Teradata.
- Familiar with ETL tools such as SAP Business Objects, SAP Data Services, and Informatica PowerCenter.
- Extensive experience with Section 508 Compliance Accessibility tools, including JAWS & NVDA screen readers, ANDI, Microsoft Narrator, ZoomText (magnification tool), Web Accessibility Tool (WAVE), Color Contrast Analyzer, VoiceOver (macOS/iOS), TalkBack (Android), Mobile Speak, Video Caption Creator, accessScan, Lighthouse, axe DevTools, Siteimprove Accessibility Checker, and ClickUp accessibility features.
- Strong knowledge of Section 508 Compliance Accessibility front-end development following WAI-ARIA technical specifications.
- Excellent multitasking ability, self-starter, motivated, team-oriented, and quick learner. Capable of working autonomously, managing time effectively, and collaborating well with teams and clients.
- Outstanding leadership and management skills with strong written and verbal communication, negotiation, and interpersonal abilities.
- Highly adaptable to change and eager to learn new technologies in the IT industry to contribute to the success of the organization.

TECHNICAL SKILLS:

Validation and Testing Tools: UFT/QTP, ALM/QC, IBM Rational Quality Manager (RQM), SmartBear TestComplete, Testing Anywhere, Microsoft SharePoint, MS Team Foundation Server (TFS), Microsoft Test Manager, MS Visual Studio Coded UI, MS Visual Studio Test Professional, JIRA, Bugzilla, Issue-Tracker (Defect Management Tools), Maven, ANT (Build Tools), SVN, GitHub (Source Code Repository / Version Control), Jenkins (Continuous Integration), Selenium WebDriver (Python, Java EE, C#), Cucumber, Jasmine (BDD Framework), Ganib (Open Source Project Management Software), Firebug, Firepath, Fiddler (Web Debugging Proxy), Sikuli (Game Automation), SoapUI, Postman, ReadyAPI, Burp Suite (Vulnerability / Penetration / Security Testing), Tricentis Tosca (Continuous Test Automation), etc.

Accessibility / Section 508 Compliance: JAWS, NVDA, Wave, Deque Axe (WCAG 2.2 compliance), Siteimprove (Automated Accessibility Scans), aXe Inspector (WCAG 2.1 Checks), Object Inspector, Lighthouse (WCAG 2.2 Checker), ANDI, axe DevTools, Acrobat PDF Accessibility Verifier / PAC 2 (PDF Accessibility Checker), Microsoft Narrator, ZoomText, Video Caption Creator, Color Contrast Analyzer, VoiceOver (macOS/iOS), TalkBack (Android), Mobile Speak, accessScan, WebAIM WCAG 2.2 Checklist, U.S. Web Design System (USWDS) Checklist, Accessibility Scanner (Android), Accessibility Inspector (iOS), WAI-ARIA Specifications, Google Assistant/ Apple Siri / Microsoft Cortana / Dragon NaturallySpeaking (Voice recognition /Processing tools), etc.

Database: SQL / PL-SQL, Snowflake, SQL Server, TOAD, MS Access, ETL (Extract, transform, load) tools, Derby Database, Mark Logic, JBoss Database, Teradata, etc.

Languages: HTML5, CSS, JavaScript, ASP, PHP, JSP, XPath, CSS Selector, XML, Document Object Model (DOM), SQL, SnowSQL, Java (J2EE), C#, Python (learning), VBA (Macros), VB Script, JQuery, etc.

Performance, Analysis and Customer Satisfaction Tools: IBM Tealeaf, HttpWatch, LoadRunner, Apache JMeter, LoadUIWeb, Business object (BO), Spotfire (AI-powered analytics platform), Google/Adobe analytics, Splunk, SAS (Statistical Analysis System), etc.

Graphics/Video editing: Adobe Photoshop, Adobe Firefly, Pixlr, Adobe Lightroom Classic, Luminar Neo (AI-powered photo tool), Image Ready, InDesign, PageMaker, Adobe Illustrator, Adobe Premiere Pro, Adobe After Effects, HitFilm Express, Snagit, Snipping Tool, etc.

IDE / Development: Eclipse, MS Visual Studio Code, PyCharm, MS FrontPage, MS Expression Web, Adobe Dreamweaver, EditPlus, NotePad++, Adobe ColdFusion, Adobe Web Premium, Adobe AIR (cross-platform runtime system), etc.

E-commerce, CMS, Framework: WordPress, WooCommerce, PrestaShop, Magento, Drupal CMS, OpenCart, Shopify, AbanteCart, Joomla, osCommerce, Ember.js and Moodle (open-source learning management system (LMS))

Others: MS Office (Word, Excel, PowerPoint, Outlook, Access, Publisher, OneNote, Teams), MS Visio, Slack channel, Snagit, etc.

Networking/Network monitor/protocols: SolarWinds Network Performance Monitor (NPM), FTP, Telnet, TCP/IP configuration and troubleshooting, VPN, Putty, etc.

Troubleshooting: Client and server machine repair, installation and troubleshooting. Scanner, photocopier, Printer and projector troubleshooting. Data recovery, Virus and Malware cleaning. CCTV installation, networking and maintenance support, etc.

WORK EXPERIENCE:

Optum Serve (Part of UnitedHealth Group)

Windsor Mill, MD

Sep 2018 – Present

Senior SQA Test Engineer and Section 508 Accessibility Compliance Specialist

Centers for Medicare and Medicaid Services (CMS), One Program Integrity (OnePI) Project: Fighting Fraud in Medicare and Medicaid. This is a major initiative by the CMS to combat fraud, waste, and abuse (FWA) within the Medicare and Medicaid programs. It acts as a one-stop shop for program integrity data analysts.

Key Responsibilities:

- Conduct comprehensive data analysis within an agile environment, contributing to the project's goal of fighting fraud in Medicare and Medicaid.
- Utilizing Teradata, Snowflake, Showsight, Business Object (BO), STARTInformant, dbt (data build tool), Splunk, Burp Suite, SQL, Snowsql, SAS, SAS Studio, JIRA, TestRail, AWS (including AWS CloudFront and AWS S3), Github, etc., for extracting, transforming, and loading (ETL) data from various sources to support analytical objectives.
- Collaborate with cross-functional agile teams to interpret data requirements, ensuring alignment with project objectives.
- Implement advanced analytics techniques and statistical models to uncover patterns, trends, and anomalies in healthcare data.
- Develop and maintain data pipelines using dbt for efficient data transformation and modeling, enhancing data accessibility and integrity.
- Perform data quality assessments and implement corrective measures to ensure accuracy and reliability of analytical outputs.
- Generate insightful reports and visualizations using Business Object (BO), SAS, and other tools, facilitating data-driven decision-making.
- Utilize JIRA and TestRail for efficient project management, sprint planning, test case documentation, test planning, and bug/issue tracking, ensuring alignment with agile methodologies and timely task delivery.
- Leverage AWS services, including AWS CloudFront and AWS S3, for efficient data storage, retrieval, and management.
- Collaborate with cybersecurity efforts using tools like Burp Suite to ensure the security and integrity of data.
- Worked on framework development and data migration from Teradata to Snowflake, facilitating the decommissioning of the Teradata system.
- Conducted 508 compliance accessibility development and testing on full web and mobile for healthcare.gov by adhering to the Web Content Accessibility Guidelines (WCAG 2.2) from section508.gov, webaim.org, and W3C. Utilized tools such as JAWS/NVDA, Wave, Deque Axe (WCAG compliance testing), Siteimprove (Automated accessibility scans), Acrobat PDF Accessibility Verifier/PAC 2 (PDF Accessibility Checker), Color Contrast Analyzer, lighthouse, ANDI, WebAIM WCAG Checklist, U.S. Web Design System (USWDS) checklist, Accessible Rich Internet Applications (WAI-ARIA) technical specifications, and accessibilitychecker.org for development and testing.
- Design, implement, and maintain automation frameworks using Selenium WebDriver with Python for automated data validation between Teradata and Snowflake. Tools used: ANT (Build tool), GitHub (Source code repository), Jenkins (Continuous integration), Extent Reports (Management reports).
- Contribute to the continuous improvement of data analytics processes, staying informed about industry best practices and emerging technologies.
- Provide guidance and support to team members on data analysis techniques and tools, fostering a collaborative and innovative work environment.

Environment and Tools Used: Agile methodologies, Teradata, Snowflake, Showsight, Business Object (BO), STARTInformant, dbt (data build tool), Splunk, Burp Suite, SQL, Snowsql, SAS, SAS Studio, JIRA, TestRail, AWS CloudFront, AWS S3, GitHub, JAWS/NVDA, Wave, PDF Accessibility Verifier, Color Contrast Analyzer, lighthouse, Siteimprove, WebAIM WCAG Checklist, Accessible Rich Internet Applications (WAI-ARIA) technical specifications, Selenium WebDriver with Python, ANT, Jenkins, Extent Reports, etc.

In addition to the above project, I am simultaneously contributing to the following project:

UnitedAI Studio Project: The UnitedAI Studio project within Optum Serve Tech at UnitedHealth Group focuses on leveraging artificial intelligence (AI) and machine learning (ML) technologies to optimize processes, enhance efficiency, and improve areas such as healthcare administration, data analysis, and customer service within Optum Serve. It serves as a dedicated unit responsible for developing and implementing AI/ML solutions across various projects, aiming to enhance service delivery, reduce costs, and optimize overall performance both within Optum Serve and the broader UnitedHealth Group.

Key Responsibilities:

- Collaborated with cross-functional teams, including engineers, data scientists, and analysts, to ensure that AI/ML solutions met quality and accessibility standards.
- Provided Quality Assurance (QA) support, focusing on ensuring that AI/ML models and solutions were thoroughly tested for performance, accuracy, and reliability.
- Conducted Section 508 compliance accessibility testing for the AI/ML interfaces, ensuring that solutions were accessible to users with disabilities.
- Developed and executed test plans, test cases, and defect reports, ensuring comprehensive test coverage across all project components.
- Performed manual and automated testing for accessibility and functionality across web and mobile applications.
- Worked closely with the development team to identify and resolve bugs, accessibility issues, and usability concerns.
- Utilized accessibility testing tools such as JAWS, NVDA, Wave, Deque Axe, and other WCAG compliance tools to assess conformance with accessibility guidelines.
- Monitored AI/ML models for continuous performance, reporting issues related to accessibility and functionality.
- Participated in project discussions, providing insights on improving accessibility, usability, and overall product quality.
- Documented test results and generated reports to track progress, ensuring all Section 508 and WCAG compliance requirements were met.
- Ensured data quality for training AI/ML models by verifying the integrity and accessibility of the datasets.

Environment and Tools Used: Microsoft Teams and Slack for collaboration, Jupyter Notebooks for analysis, Python (pandas, NumPy, scikit-learn), TensorFlow/Keras for ML models, Matplotlib/Seaborn for visualization, GitHub for version control, AWS for cloud computing, Docker for containerization, JAWS/NVDA, Deque Axe, Wave, and other Section 508/WCAG compliance tools for accessibility testing.

QSSINC (Part of UnitedHealth Group)

McLean, VA

Jun 2016 – Sep 2018

Sr. IT Quality Analyst and Accessibility Support Specialist

Centers for Medicare and Medicaid Services (CMS), ESDCU Project Overview: The Eligibility Support Desktop Change Utility Tool (ESDCU) is an internal CMS tool with the primary objective of updating consumer information within Federally Facilitated Marketplaces (FFM) eligibility and enrollment records. ESDCU plays a significant role in supporting CMS activities, aiding in the development of the HealthCare.gov application, and providing services for the State-Based Market (SBM) platform.

Key Responsibilities:

- Conducted Quality Assurance (QA) and Section 508 Compliance activities for the CMS ESDCU Project, ensuring HealthCare.gov adhered to Section 508 and WCAG standards.

- Validated HealthCare.gov application compliance with Section 508 standards using the Voluntary Product Accessibility Template (VPAT) and Government Product Accessibility Template (GPAT).
- Implemented RestUtil API to facilitate seamless data retrieval from MarkLogic via web service calls to the JBoss server, ensuring accurate data presentation on web pages.
- Ensured Section 508 compliance through comprehensive accessibility assessments using tools like the WAVE tool, aligned with WCAG standards.
- Conducted cross-browser testing using JAWS and NVDA screen readers to verify application accessibility across multiple platforms.
- Extracted data from JBoss web servers in JSON format and presented it on web pages, enhancing data accessibility and presentation.
- Managed project deployments using Jenkins, overseeing smooth transitions across different environments.
- Managed GitHub repository via command line operations, including branch creation, committing code to staging, pushing updates to development branches, and actively participating in code review processes.
- Utilized a diverse range of accessibility and testing tools such as JIRA, Zephyr, Microsoft Narrator, Zoom Text, WAVE, Color Contrast Analyzer, VoiceOver (macOS and iOS), TalkBack (Android), Mobile Speak, Video Caption Creator, accessScan, and Accessible Rich Internet Applications (WAI-ARIA) technical specifications for comprehensive testing and compliance activities within the project.

Environment and Tools Used: Agile environment, JAWS/NVDA, Deque Axe (WCAG compliance testing), Siteimprove (Automated accessibility scans), Object Inspector, Lighthouse (WCAG checker), Acrobat PDF Accessibility Verifier, WebAIM WCAG Checklist, U.S. Web Design System (USWDS) checklist, GitHub, JSON, Jenkins, etc.

In addition to the above project, I also contributed to the following project simultaneously:

CMS Data Service Hub (DSH) project: QSSI designed the middleware infrastructure (Data Service Hub) to facilitate services between the State-Based Marketplace (SBM) and Federally Facilitated Marketplace (FFM) for the Affordable Care Act (ACA) program. The Data Service Hub (DSH) handles requests from the FFM to determine eligibility criteria for individual health plans and taxation. Additionally, it interfaces with the IRS to ensure the accuracy of provided data for future processing.

Key Responsibilities:

- Spearheaded Section 508 compliance testing using JAWS/NVDA, Deque Axe, Siteimprove, aXe Inspector, Lighthouse, and other WCAG compliance tools to ensure accessibility standards.
- Conducted quality analysis using SOAPUI for system functionality and performance assessment.
- Utilized Splunk for log analysis and Putty for server-side operations.
- Engaged in thorough accessibility checks and assessments using tools like Acrobat PDF Accessibility Verifier/PAC 2, WebAIM WCAG Checklist, U.S. Web Design System (USWDS) checklist, and Object Inspector.
- Collaborated with the development team to guarantee adherence to accessibility standards and resolve any identified issues.
- Played a critical role in ensuring middleware (Data Service Hub) functionality between the SBM and FFM for ACA program services.
- Validated eligibility criteria for individual health plans and coordinated with the IRS for data accuracy and future processing.
- Contributed as a Senior IT Quality Analyst and Section 508 Compliance Specialist, ensuring the project's compliance and operational efficiency within the ACA framework.

Environment and Tools Used: Utilized Agile methodologies, HTML5, XML, JavaScript, RESTful services, SOAPUI, Splunk, Putty, JAWS/NVDA, Deque Axe (WCAG compliance testing), Siteimprove (Automated accessibility scans), Acrobat PDF Accessibility Verifier, WebAIM WCAG Checklist, U.S. Web Design System (USWDS) checklist

Senior SQA Test Engineer, Test Lead, and Section 508 Accessibility Compliance Specialist

Veterans Benefits Management System (VBMS) Project Overview: VBMS is a comprehensive software solution designed to streamline and enhance the disability and pension claims process for veterans. It plays a crucial role in the VA's continuous efforts to modernize operations and provide improved services to veterans. Key features include electronic case management, workflow automation, enhanced communication, and data analysis and reporting. These features contribute to reduced claim processing times, improved accuracy, increased transparency, and enhanced efficiency.

Key Responsibilities:

- Independently managed web/cloud-based projects, exhibiting agile self-organization and collaboration within cross-functional teams, adhering to ISO 9001:2008, Section 508 compliance, and W3C Standards throughout the project life cycle.
- Collaborated with business analysts, solution architects, subject matter experts, and developers to define acceptance test criteria, operating within Agile software development methodologies.
- Developed customized automated test scripts using Java in Selenium and created a Selenium WebDriver-based automation testing framework from scratch. Utilized Selenium IDE, Selenium Grid for Cross-Browser Testing, and tested Web Service/RESTful Service with SoapUI. Employed Apache POI for Excel Data-Driven Testing.
- Implemented Cucumber, a Behavior-Driven Development framework.
- Utilized ANT as a build tool, GitHub as a source code repository, and Jenkins as a continuous integration tool.
- Reviewed requirements specification and functional specifications to create comprehensive test plans and scripts.
- Analyzed user requirements and use cases, developing test scenarios and creating relevant test data.
- Conducted smoke testing, regression testing, integration testing, and system testing manually, leveraging Quality Center (ALM) for requirements management, planning, scheduling, running tests, and defect tracking.
- Worked extensively with backend DB log tables, creating SQL scripts for both Back-end and Front-end Testing using standard SQL functions and commands.
- Utilized Keynote for analyzing the response times of business transactions under load, developing reports and graphs to present load test and stress test results to management.
- Communicated requirements traceability matrix and monitored requirements status throughout the project.
- Collaborated closely with developers to ensure proper test implementation.
- Wrote and maintained requirement and test documentation following high-level testing standards, actively participating in review meetings and quality control board meetings for continuous improvement of software quality.
- Conducted End-to-End verification for the entire application.
- Contributed as a team member in requirements mapping and the preparation of a Requirements Traceability Matrix.
- Leveraged SharePoint project management portal for documentation maintenance.
- Conducted disability (Section 508 compliance) testing on full web and mobile, adhering to Web Content Accessibility Guidelines (WCAG 2.0) from section508.gov, webaim.org & W3C. Utilized JAWS screen readers, Microsoft Narrator, Natural Reader, zoom text, VoiceOver for iOS, Talkback for Android, Mobile Speak for Windows Mobile, and Video Caption creator for Section 508 testing.
- Managed resource allocation, reviewed weekly testers' status reports through agile processes, and actively participated in scrum calls.
- Coordinated projects within an offshore model.

Environment and Tools Used: Utilized Agile methodologies, ISO 9001:2008, Section 508 compliance, and W3C Standards in managing web/cloud-based projects; tools included Selenium WebDriver, Cucumber, SoapUI, Apache POI, SQL, ANT, GitHub, Jenkins, Quality Center, Keynote, JAWS, Microsoft Narrator, Zoom Text, VoiceOver, Talkback, Mobile Speak, Video Caption Creator, SharePoint.

Total Wine & More
Sr. SQA Test Engineer

Bethesda, MD

Mar 2014 – Feb 2015

Key Responsibilities:

- Collaborated with CAT (Core Application Team) and DOT (Digital Omni-channel Transformation) team.
- Served as a senior quality assurance test engineer in a fast-paced environment, working with multiple project teams, platforms, architectures, and diverse technologies throughout the Software Delivery Lifecycle (SDLC).
- Designed, implemented, and maintained automation frameworks using Selenium WebDriver with Java for DOT application and Visual Studio Coded UI with C# for Core application. Conducted load tests, performance tests using JMeter, continuous integration, API testing, Smoke testing, Functional testing, and Regression testing on various devices (Windows, Android, IOS, tablets, and smartphones using Appium). Customized reports for client requirements.
- Performed test automation (data, hybrid, and modular driven) for web applications using Cucumber (Behavior Driven Development framework) and TestNG framework.
- Used ANT as a Build tool, SharePoint, TFS (Team Foundation Server), and GitHub as a source code repository. Employed Jenkins for continuous integration and Selenium Grid for Cross-Browser and cross-platform Testing.
- Multitasked with bug tracking, problem management, troubleshooting, data analysis, performance monitoring, and final validation of the product before production.
- Analyzed and reported bugs/issues using SharePoint, ALM/QC (Quality Centre), MTM (Microsoft Test Manager), and JIRA.
- Utilized Microsoft SQL Server Management Studio for manipulating backend data.
- Assisted developers in finding code issues and performed unit and white box testing.
- Tested web services (API)/RESTful Services using SOAP UI for validating data integrity.
- For Core Application, used MTM and TFS for test case management, bug reporting, and agile methodology management. Employed test builder and C# in Visual Studio Coded UI for developing automation test scripts.
- Conducted accessibility (Section 508 compliance) testing on full web and mobile following W3C Web Content Accessibility Guidelines (WCAG 2.2) and section508.gov, using JAWS screen readers, Microsoft Narrator, Natural Reader, Zoom text, VoiceOver for iOS, Talkback for Android, Mobile Speak for Windows Mobile, and Video Caption creator.
- Generated reports using Extent Reports or Allure Report (allurereport.org)
- Managed resource allocation, reviewed daily and weekly work status reports through the agile process, and arranged scrum calls. Monitored and merged all team member's daily work reports in a tracker sheet and updated them in SharePoint.
- Coordinated projects with offshore teams and conducted daily agile scrum meetings with offshore teams to improve the analysis process and discuss daily status reports.

Environment and Tools Used: Collaborated in a multifaceted environment, employing Selenium WebDriver with Java, Visual Studio Coded UI with C#, JMeter, Appium, Cucumber, TestNG, ANT, SharePoint, TFS, GitHub, Jenkins, Selenium Grid, SOAP UI, Microsoft SQL Server Management Studio, MTM, JIRA, ALM/QC, Section 508 tools (JAWS, Microsoft Narrator, Natural Reader, Zoom text, VoiceOver, Talkback, Mobile Speak, Video Caption creator), Extent Reports, Allure Report, while managing agile methodologies, scrum calls, and offshore coordination.

AT & T
Sr. Quality Assurance Engineer

Orlando, FL

April 2013 – Mar 2014

Key Responsibilities:

- Collaborated seamlessly with the PVT (Production Validation Team) and PMT (Problem Management Team), ensuring smooth project operations and communication.
- Developed meticulous Test Plans, Test Cases, and Test Analysis Reports, ensuring compliance with policies and meeting stringent project requirements.

- Conducted a diverse range of tests including white box, sanity, regression, integration, dirty data, negative, and system testing, employing both manual methods and automation tools. Effectively escalated test-related risks and issues.
- Managed and resolved tickets efficiently using SharePoint, ALM/QC, JIRA, and similar platforms, ensuring prompt issue resolution and tracking.
- Collaborated closely with development teams, conducting unit and white box testing, identifying and resolving code issues for enhanced product quality.
- Provided impactful daily error reports, performance analysis, planning, query reports, and customer insights to project management utilizing SAP Business Objects, IBM Tealeaf, and BI tools.
- Employed Keynote, Gomez, Load Runner, and HP Load Runner for comprehensive website/application performance analysis and load testing across various platforms and browsers.
- Supported test strategy development, test planning, test documentation, defect analysis, and reporting test results using ALM/Quality Center, QTP, Selenium WebDriver. Covered functional/system, integration, regression, performance, and Section 508 compliance testing. Developed and maintained automation test scripts.
- Ensured consistency in JavaScript framework (Angular JS) and HTML tag declaration through rigorous white box testing procedures.
- Managed resource allocation, reviewed work status reports, and arranged scrum calls using agile methodologies. Oversaw the merging and monitoring of daily work reports in SharePoint.
- Led the migration of QTP test cases to Selenium WebDriver, overseeing the development of the Selenium framework. Coordinated projects with offshore teams, conducting daily agile scrum meetings for streamlined analysis processes and status updates.

Environment and Tools Used: QTP/UFT, QC/ALM, JIRA, Selenium WebDriver, Appium, SQL, Load Runner, JMeter, Unix (Server side), Windows (Client), Microsoft Word/Excel/PowerPoint/Project/Access/Visio/ XMind, VB Script, Java, CSS, HTML5, XML, firebug, fire path, Agile Scrum, Keynote(KITE & MITE), Tealeaf, OLAM (On Line Account Management), CSR (Customer Service Representative), IUCLP / SWITT (Inquire Unified Customer Login Profile), EMT(Error management tool), Eclipse, SAP Business Objects BI, SOAP UI/ Ready API, Maven/ANT, GitHub/SVN, Jenkins, Microsoft Narrator, JAWS etc.

AT & T

Bothell, WA

Jun 2012 – April 2013

Quality assurance and data analyst

Key Responsibilities:

- Worked on web-based projects ensuring Section 508 compliance & W3C Standards throughout project lifecycles.
- Collaborated with various stakeholders to define acceptance test criteria and derive comprehensive test plans, scenarios, and cases.
- Analyzed Business Requirements, Change Requests, Design, and GUI Specifications to create effective test strategies.
- Managed and executed requirements-to-test cases traceability matrices.
- Created and implemented Test Plans and Cases in ALM/Quality Center for Functional and Regression Testing.
- Tracked and reported defects using ALM, collaborating closely with Developers for issue resolution.
- Conducted Back-end Testing via Stored Procedures and SQL.
- Developed and executed automated test scripts using QTP/UFT, maintaining related files and applying various automation techniques.
- Conducted GUI testing to ensure compliance with specified functionalities.
- Thoroughly tested web services using SOAP UI for Data Integrity validation.
- Utilized performance analysis tools like Keynote, Gomez, Load Runner, and IBM Tealeaf for problem management and performance data analysis.
- Wrote Java and JQuery scripts from scratch for Keynote and Gomez tools.
- Assisted back-end testing by integrating data from multiple sources using Informatica PowerCenter ETL tool.

- Participated in meetings addressing Enhancement and Modification requests.
- Prepared Test Status, Tracking sheets, and Presentation reports during testing execution.
- Worked in Agile (Scrum and Sprint) methodologies.

Environment: QTP/UFT, QC(ALM), JIRA, SQL, LoadRunner, Keynote (KITE & MITE), SOASTA, J2EE, CSS, HTML5, XML, MS office, pl/SQL, oracle, db2, html, JavaScript, VBScript, Unix/Linux, oracle, SQL, Agile Scrum, Soap UI etc.

Navy Federal Credit Union
QA Analyst

Vienna, VA

Nov 2010 – Jun 2012

Key Responsibilities:

- Collaborated in Agile software development methodologies.
- Utilized HP Quality Center (ALM) and JIRA for requirement management, planning, scheduling, running tests, and tracking/ managing defects in the Defects module.
- Developed Test plans, Trace Metrics, and Test Cases for multiple projects.
- Conducted Smoke, Integration, Functional, Performance, Regression, and Backend testing.
- Extensively employed Quality Center (ALM) for designing, executing test cases, and logging defects.
- Reported issues into the bug reporting system and collaborated with the development team until resolution using Quality Center (ALM).
- Parameterized scripts for execution using Excel data sheets.
- Created User-Defined Functions in VB Script and accessed them through Function Library.
- Executed and validated test cases using third-party networks (Visa test network & Mastercard network).
- Loaded test data into databases and executed queries.
- Collaborated with developers to promptly resolve testing issues.
- Involved in creating weekly status reports on the progress of the testing process.
- Prepared/presented progress reports and actively participated in required meetings.

Environment: Agile (Scrum), Windows/NT/ Unix, VCMS (Visa, Master Card Test Network System), HTML, XML, JAVA EE, QTP, QC, TOAD, SQL PLUS etc.

AA Tech
Web Developer / Designer

Austin, TX

AUG 2009 – Nov 2010

Key Responsibilities:

- Primary web designer/front-end web developer.
- Design and transform prototype designs into fully functional websites, including standard, hybrid, flash, and ecommerce sites.
- Utilize expertise in front-end development technologies such as HTML, XHTML, CSS, JavaScript, and Flash to enhance interactivity.
- Coordinate domain registrations, DNS changes, and registrar transfers.
- Set up and manage accounts on virtual private servers (VPS) for web hosting (FTP) and POP email accounts.
- Provide troubleshooting and client support for websites, hosting, and email accounts.
- Create banner ads (static, animated, flash), email advertisements/newsletters, and Flash animations.
- Graphic design skills include creating and modifying print pieces such as logos, corporate identity packages, advertisements, newsletters, and brochures.

Environment: HTML, PHP, Java Script, Photo shop, Joomla, WordPress, Presta shop, J2EE, Swings, Hibernate, Spring Framework, Struts, MySQL and Derby database.

- References Available on Request.
