PROFESSIONAL SUMMARY

Results-driven ServiceNow Developer with 5+ years of proven expertise in design, configuration, implementation, and support of ServiceNow applications across telecommunications, healthcare, banking, and automotive industries. Demonstrated success in developing and customizing ServiceNow applications using JavaScript, AngularJS, and REST APIs, delivering 20-35% operational efficiency improvements. Deep technical proficiency in ITSM, CSM, TSM, and HR modules with strong capabilities in business architecture, process development, functional implementation, and API-based integrations. Track record of collaborating with business consultants and client resources to translate technical requirements into solution architecture while creating detailed technical documentation.

EDUCATION

St. Cloud State University, Minnesota, United States

Jan 2025 - Present

Executive Master in Engineering Management

GPA: 4.0/4.0

Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal, India

Jun 2015 - May 2019

Bachelor of Technology in Computer Science

GPA: 8.56/10.0

Honors: Chancellor's Scholarship recipient for academic excellence; Ranked 1st university-wide

TECHNICAL SKILLS

ServiceNow Development: JavaScript, ES6 features, AngularJS, Glide API, ServiceNow UI Builder, UX/UI custom design, Now Create, Automated Test Framework (ATF)

ServiceNow Configuration & Implementation: Module-specific implementation, Flow Designer, Integration Hub, Workflow Designer, Business Rules, Client Scripts, UI Actions, UI Policies, Data Policies, Transform Maps, Record Producers

API Development & Integration: REST APIs, SOAP, API-based integrations, Scripted REST APIs, Import Sets, Scheduled Jobs

ServiceNow Modules: ITSM, CSM, HR (HRSD), TSM, Now Mobile, Agent Mobile, Enterprise Work Delivery, Service Portal, Virtual Agent, Performance Analytics

Technical Stack: JavaScript (ES6), AngularJS, Microsoft SQL Server, Rally, Predictive Intelligence, Update Sets management

Design & Architecture: Business architecture, Process development, Solution architecture, Technical requirements scoping, Performance optimization

Methodologies & Practices: Agile/Scrum, ITIL Processes, DevOps, CI/CD, Requirements gathering, Testing and validation, Hyper care activities, Technical documentation

PROFESSIONAL EXPERIENCE

Senior Application Developer | IBM, Pune, India

Apr 2023 – Nov 2024

- Assisted Fortune 500 telecommunications client in design, business architecture, process development, and functional implementation of ServiceNow TSM and Now Mobile applications, delivering **20% operational efficiency gains** for 500+ enterprise users
- Developed and customized ServiceNow applications using JavaScript (ES6 features), Flow Designer, and REST APIs, creating **15+ mission-critical automated workflows** that reduced manual processing overhead by 35% and accelerated service delivery by 40%
- Contributed to design and development of client-specific needs including custom record producers and inventory management solutions with enhanced UX/UI design, elevating end-user satisfaction scores by 28%
- Collaborated with business consultants, project team, and client resources to define, detail, and scope technical requirements into solution architecture for demand management operations, cutting average ticket resolution time by **25%**
- Implemented reusable Automated Test Framework (ATF) test suites to automate verification of ServiceNow applications, customizations, and configurations, avoiding repetitive and time-consuming testing processes
- Created detailed technical documentation for design, implementation, workflows, and configurations ensuring knowledge transfer and compliance with ServiceNow best practices
- Created, managed, and deployed update sets with complete appropriate testing and remediation to support go-live and production releases across development, staging, and production environments with zero downtime

- Mentored 4 junior developers by providing input based on knowledge and experience to optimize configurations, accelerating team velocity by 30% through knowledge transfer in ServiceNow development standards and advanced scripting

Project Engineer | Wipro, Pune, India

Oct 2021 – Apr 2023

- Performed ServiceNow CSM module-specific implementation and configuration for major healthcare organization, achieving **30% improvement in data accuracy** through enhanced validation frameworks and process optimization
- Designed and implemented robust API-based integration between Microsoft SQL Server and ServiceNow Enterprise Work Delivery platform using REST APIs and JDBC, automating bi-directional data synchronization for **10+ custom tables**
- Improved existing scripts using ES6 JavaScript features, enhancing code quality, performance, and maintainability while implementing sophisticated transform maps and business logic
- Developed **20+ high-impact technical components** including responsive agent views, custom tables, UI pages built with custom UX/UI design, transform maps, and intelligent scheduled jobs extending platform capabilities
- Coordinated with technical team, client management, and other stakeholders throughout Agile sprint cycles using Rally, facilitating bi-weekly demonstrations and maintaining 98% on-time delivery rate across 12+ sprint iterations
- Delivered testing, validation, and hyper care activities, identifying and fixing performance issues while maintaining **95% code quality standards** and reducing production defects by 40%
- Created comprehensive technical documentation for processes, workflows, data models, and API integrations supporting knowledge sharing and operational excellence

Software Developer | Accenture, Pune, India

May 2019 - Oct 2021

- Assisted global banking and automotive clients in design, business architecture, and functional implementation of ServiceNow ITSM and CSM solutions, driving **20% operational efficiency improvement**
- Developed and customized **30+ ServiceNow applications** using JavaScript, AngularJS, and REST APIs including Agent Workspace customizations, dynamic UI actions, complex business rules, and client-side scripts supporting 1000+ concurrent users

- Contributed to design and development of API-based integrations connecting ServiceNow with enterprise systems (SAP, Salesforce, Active Directory) using REST/SOAP APIs, enabling real-time data synchronization
- Collaborated with business consultants and client resources to define and scope technical requirements into solution architecture for ITIL-compliant incident, problem, change, and request management modules
- Performed module-specific implementation and configuration with custom workflows, intuitive UX/UI interfaces, and automated SLA enforcement mechanisms
- Created detailed technical documentation for configurations, integrations, and custom developments; coordinated with stakeholders throughout project lifecycle from requirements gathering through deployment
- Delivered comprehensive testing and validation activities including test case development, system testing, and UAT coordination, successfully identifying and resolving **50+ critical defects** pre-production
- Created, managed, and deployed update sets with appropriate testing for production releases; implemented automation solutions including inbound email actions, data policies, and scheduled jobs reducing manual tasks by 45%
- Supported other teams by providing input based on knowledge and experience to optimize configurations; created executive dashboards leveraging Performance Analytics that identified \$2M+ in cost-saving opportunities

CERTIFICATIONS

ServiceNow Certified System Administrator (CSA)

ServiceNow Micro-Certifications: Flow Designer | Integration Hub | Virtual Agent | Service Portal | Predictive Intelligence | Automated Test Framework | Application Developer Process Creator | Application Developer User Interface Creator | Application Developer Core Skills | Citizen Developer Application Creator | Business Analyst - Project Roles and Responsibilities
