SUMMARY:

Cybersecurity professional with 9+ years of experience in incident detection and response, threat intelligence, threat hunting, and digital forensics for Fortune 500 companies. Expertise in MITRE ATT&CK, NIST, and ISO 27001 frameworks, enhancing security resilience across endpoint, network, and cloud environments(Azure). Developed SIEM use cases for emerging threats and achieved a 30% reduction in incident response times through automation. Led incident response teams, driving proactive threat management and risk mitigation. Skilled in phishing defense, executive communication, team mentoring, and cross-functional collaboration for scalable security solutions.

WORK EXPERIENCE:

Principal Security Engineer, Optiv Security (Oct 2022 - Apr 2024)

- Led the Cybersecurity Incident Response Team (CSIRT), proactively detecting, analyzing, and mitigating critical security incidents, reducing incident impact and enhancing overall network resilience.
- Led a comprehensive DFIR during a high-severity malware outbreak, reducing recovery time by 30% through effective IR playbooks.
- Developed custom detection in SIEM (QRadar, Splunk) use cases using TTPs, MITRE framework, and IOCs, automated response workflows, and improved incident detection and triage efficiency by 30%.
- Conducted in-depth investigations of cyber threats, malware(CrowdStrike), and vulnerabilities, leading to proactive threat mitigation.
- Automated phishing remediation in Proofpoint, cutting false positives by 30% and saving 40+ hours/month.
- Collaborated with cross-functional teams to improve network traffic monitoring, and identified, and mitigated security risks.
- Provided executive-level intelligence briefings on emerging cyber threats, transforming complex data into strategic insights.

Senior Security Engineer, Elevate Services (May 2021 - Oct 2022)

- Managed a critical incident response and leveraged network traffic monitoring and malware forensics to contain a breach within 24 hours, minimizing potential data loss.
- Optimized Exabeam UEBA, identified, and mitigated insider threats with a 15% improvement in detection accuracy.
- Developed and implemented custom playbooks for phishing and ransomware incidents, reducing incident response time by 20%.
- Integrated open-source threat intelligence feeds, increasing actionable alerts by 18%, leading to detailed incident triage and resolution.

Senior Security Analyst, British Telecom (Nov 2018 - Apr 2021)

- Led the implementation of IDS/IPS and endpoint security use cases, enhanced network intrusion detection and prevention, and reduced unauthorized access incidents by 15%.
- Conducted forensic investigations for malware incidents, and utilized sandboxing tools like Threat Grid, Anyrun, and Hybrid Analysis to determine attack vectors.
- Monitored and analyzed alerts from a payment gateway system to ensure PCI DSS compliance and detect potential data leaks.
- Created an automated incident response workflow with SOAR(IBM Resilient), reducing response times by 35%.

Senior Security Analyst, KPMG (Oct 2017 - Nov 2018)

- Managed security operations for over 100 KPMG member firms and developed use cases that increased the detection of advanced persistent threats (APT) by 25%.
- Specialized in phishing/spam email analysis, used sandboxing tools like Threat Grid, and prepared investigation reports and recommendations.
- Conducted threat intelligence analysis and log hunting, significantly increased the detection of previously undetected malicious activity by 20%.

Security Analyst, Wipro Technologies (Aug 2015 - Sep 2017)

- Correlated security logs from various sources, identified patterns that led to the root cause of critical incidents, and improved detection accuracy by 20%.
- Led phishing awareness campaigns, enhanced employee detection rates by 25%, and contributed to a more secure organizational culture.
- Enhanced firewall and IPS policies, improving overall network defense mechanisms by 10%.

EDUCATION:

- Master of Cybersecurity and Leadership, University of Washington (Jun 2024 – Jun 2025)
- Bachelor of Technology (Electronics and Communication Engineering), Jaypee Institute of Information Technology (Jul 2011 – Jul 2015)

TECHNICAL TRAINING / CERTIFICATIONS:

- Certified Threat Intelligence Analyst (CTIA), Issuer-EC-Council
- Certified Ethical Hacker (CEH), Issuer-EC-Council
- Certified Associate Security Qradar V7.0 MR4, Issuer-IBM
- Splunk Fundamentals 7.x, Issuer-Splunk
