PROFESSIONAL EXPERIENCE

Rhythm Energy, Houston, TX

Feb 2021 – Dec 2023

Senior Software Engineer

- Identify, design, and implement new features to Rhythm's proprietary billing engine and message processors to automate manual processes being executed by Operations and Customer Service
- Responsible for the AKYTA suite of applications, including maintenance and documentation; trained, onboarded, and managed new offshore development team to support the system
- As part of a the 2021 purchase from Entrust, created a new tenant instance for Rhythm in the proprietary AKYTA software suite, executing transfer of 50k customers in less than 8 days

Entrust Energy Inc / AKYTA Inc, Houston, TX

Nov 2014 – Feb 2021

Senior Manager and Architect of Software Development, 2020 – 2021

- Oversaw development and maintenance of the entire suite of in-house applications, including billing, customer management, messaging, payments, commissions, and customer portal, serving over 150k retail and commercial client electrical meters across multiple tenants in North America
- Managed full software development team, working with product managers to create short- and long-term project schedules, plan and conduct bi-weekly sprints, and oversee production releases
- Designed database and backend architecture for new features using proven design patterns

Senior Software Developer Team Lead, 2018 – 2020

- Responsible for a team of 3-5 developers, including ongoing sprints and performance management
- Designed new operational process for Production Support, serving as the cross-functional lead
- Trained and mentored new developers; created onboarding materials for the IT department

Senior Software Developer, 2017 – 2018

Software Developer (Contract), 2014 – 2017

- As part of a small development team, created a new proprietary billing and customer management system from the ground up to fully replace all third party tools previously used by Entrust
- Architected and implemented segmentation engine as the underlying foundation for system, integrating the engine across all primary and supporting applications

The Reynolds & Reynolds Company, Houston, TX

Feb 2009 – Nov 2014
