SUMMARY

Results-driven Software Engineer with 3+ years of hands-on experience in full-stack application development, cloud-native microservices, and AI-powered personalization for high-traffic consumer platforms. Proficient in React.js, Django, Flask, REST/GraphQL APIs, and PostgreSQL/MongoDB, with proven success optimizing large-scale data models and streaming workflows. Skilled at deploying containerized solutions on AWS/Azure using Docker, Kubernetes, and CI/CD pipelines, driving faster releases and robust system reliability. Adept at leveraging PyTorch, NLP, and RAG-based AI agents to enhance product engagement. Collaborative team player committed to building secure, scalable, and user-centric applications that deliver measurable business value.

TECHNICAL SKILLS

Front-end Technologies: React.js, Redux, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material-UI, SASS, SCSS, Figma, Responsive Web Design, Web Accessibility (WCAG)

Back-end & API Development: Python (Flask, Django, FastAPI), RESTful APIs, GraphQL, WebSockets, JWT, OAuth2, Microservices, Bash, Shell Scripting, Node.js, Express.js, Java, Spring Boot

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Firebase, SQLite, Data Modeling, Schema Design, Vector Databases

Cloud Platforms & DevOps: AWS (Lambda, EC2, RDS, S3, DynamoDB, IAM, Elasticsearch), Azure (ML, DevOps, Data Factory), Docker, Kubernetes, Jenkins, GitHub Actions, GitLab, Nginx, Linux, Terraform

AI, ML & Data Engineering: Big Data/ML Ops tools, TensorFlow, Keras, PyTorch, LLMs (Large Language Models), OpenCV, Generative AI, LangChain, Retrieval-Augmented Generation (RAG), AI Agents

Testing & Quality: Pytest, Selenium, Postman, OpenAPI, React Testing Library, Unit Testing, Integration Testing, JUnit, Mockito

Other Technical Skills: CI/CD Automation, Design Patterns, Data Structures & Algorithms, Git, Jira, Agile Methodology

PROFESSIONAL EXPERIENCE

Software Engineer, Spotify

May 2024 - Present | Remote, USA

- Developed robust full-stack modules for music personalization using React.js front-end with Django microservices, enabling seamless playlist curation and personalized recommendation delivery for millions of active listeners.
- Built AI-powered song recommendation pipelines leveraging PyTorch and user-behavior analytics, boosting personalized discovery accuracy and improving playlist adoption rates across premium and free tiers by 23%.
- Integrated real-time lyrics synchronization with NLP-driven contextual search powered by Hugging Face Transformers, improving content discovery speed and in-app engagement for global streaming audiences by 35%.
- Optimized Django ORM queries, schema design, and PostgreSQL indexing to enhance playback responsiveness, reduce query latency, and handle large-scale streaming metadata with superior stability.
- Partnered with analytics and design teams to deliver React-driven dashboards visualizing engagement metrics, enabling marketing and editorial teams to make faster data-backed curation decisions.
- Automated containerized deployments using Django-compatible CI/CD pipelines with Kubernetes and GitHub Actions, improving deployment reliability and accelerating production rollouts for new feature releases worldwide.
- Strengthened API authentication with OAuth2 and token-based user session management, ensuring secure handling of subscription data and compliance with evolving international data-privacy requirements.

Software Engineer, TCS

Aug 2021 - Jul 2023 | Remote, India

- Delivered modern, responsive front-end interfaces using React.js integrated with Flask-powered REST APIs, enabling seamless browsing, cart tracking, and live order status updates for shoppers.
- Architected and fine-tuned MongoDB data models with efficient indexing strategies to ensure faster search responses and secure storage of high-volume retail transaction histories.
- Designed automated test suites with PyUnit for backend Flask APIs, improving quality assurance workflows and reducing production bugs during rapid CI/CD-driven deployments.
- Integrated JWT-based authentication and robust role-based permissions across API endpoints and React modules, safeguarding sensitive customer profiles, payment data, and access privileges.
- Built asynchronous order-tracking pipelines within Flask microservices to deliver instant shipping notifications and predictive delivery ETAs, enhancing user satisfaction and operational visibility.
- Enhanced API response speeds by 38% through caching strategies, optimized pagination logic, and efficient JSON serialization, improving checkout latency and overall browsing experience.
- Streamlined deployment workflows by configuring GitHub Actions to automate testing, packaging, and updates on AWS EC2 instances, improving rollout reliability for production environments.

EDUCATION

Master of Science, Northwest Missouri State University

Aug 2023 - Dec 2024 | Missouri, USA

Computer and Information Sciences

Bachelors of Science, Vellore Institute of Technology

Aug 2019 - May 2023 | Tamil Nadu, India

Computer Science Engineering
