

Steven Bateman

Brooklyn, NY | +1(347) 669-4868 | stevebateman930@gmail.com | [LinkedIn](#)

Senior Full Stack Engineer with 12+ years of experience in designing, architecting, and leading the development of scalable, high-performance web and mobile applications. Proven track record of driving technical strategy, leading cross-functional teams, and optimizing system performance. Deep expertise in **React, Angular, Node.js, ASP.NET, Spring Boot, Python, and cloud architectures (AWS, Azure)**. Adept at mentoring engineers, implementing CI/CD pipelines, and ensuring seamless system integrations to enhance efficiency and scalability. Passionate about building innovative solutions that drive business growth and technical excellence.

PROFESSIONAL EXPERIENCE

Anala	Remote, US
Senior Mobile Developer	August 2024 – January 2025

- Engineered and **launched the NFA mobile application** using **React Native for cross-platform compatibility (Android and iOS)**, achieving a **4.7-star user rating** and driving a 30% increase in active users. Focused on delivering a highly responsive user experience across both platforms.
- Refined Redux state management, resulting in improved usability and a 25% increase in user retention. This involved optimizing data flow and component interactions to create a more seamless and intuitive user experience.
- Significantly **improved the NFA app's performance** by implementing code-splitting techniques minimizing **load times by 30%**, leading to faster app startup and smoother navigation.
- Integrated key features into the NFA app**, including push notifications for timely updates and biometric authentication for enhanced security. Leveraged third-party libraries to streamline the implementation of these functionalities.
- Designed and **developed the AGCRM mobile application** using the **Flutter framework**, achieving a **40% reduction** in development time compared to previous projects.
- Implemented **scalable state management for the AGCRM app** using the **Provider and Riverpod frameworks** ensuring efficient data handling and maintainability as the app's features and complexity grew.
- Integrated **Firebase services into the AGCRM app**, enabling real-time database operations for dynamic content updates and secure user access management.
- Optimized the AGCRM app's performance** using **Dart DevTools**. Conducted detailed profiling to identify performance bottlenecks and implemented targeted improvements, resulting in a smoother and more responsive user experience.
- Implemented **robust app monitoring and crash reporting** using **Sentry and Firebase Crashlytics**. This proactive approach allowed for timely issue resolution and a 20% improvement in overall app stability, reducing user frustration and negative reviews.
- Demonstrated expertise in **mobile app development** across **multiple frameworks (React Native and Flutter)**, showcasing adaptability and a commitment to utilizing the best tools for each project.

Melity	Remote, US
Senior Full-Stack Developer	February 2021 - July 2024

- Led the development of a scalable web application** using **React, Next.js, Gatsby, and TypeScript**, increasing user engagement by 25% and improving overall performance by 20%.
- Designed and implemented backend services** with **Node.js, Laravel, .NET, and Java Spring Boot**, enhancing transaction processing efficiency by 30% and ensuring seamless system performance.
- Developed an AI-powered chatbot** leveraging **Natural Language Processing (NLP)** for real-time customer support, significantly reducing response times and enhancing user satisfaction.
- Architected a serverless infrastructure** with **AWS Lambda, Amplify, and DynamoDB**, leading to a **40% reduction** in operational costs while improving system scalability.
- Implemented caching strategies and database indexing**, optimizing query performance and reducing system latency by 25%.
- Mentored junior engineers**, conducting **code reviews, workshops, and technical training** to foster team growth and maintain high development standards.

Simform

Full-Stack Developer

Brooklyn, NY

July 2015 – January 2021

- Architected and developed **single-page applications (SPAs)** using **React.js**, resulting in a **20% reduction** in server response times.
- Created **reusable UI components across React.js, Angular, and Vue.js**, accelerating **development cycles by 25%** and improving user engagement. **Implemented Redux** for enhanced state management, decoupling data handling and **improving maintainability by 30%** while reducing **debugging time by 20%**.
- Designed and implemented **scalable back-end services using Node.js and MongoDB for data persistence**. Developed robust web applications with **ASP.NET and Ruby on Rails**, leveraging the MVC architecture.
- Developed **multiple Proofs of Concept (POCs)** integrating front-end and back-end systems, accelerating project approval **timelines by 20%**.
- Led mobile development initiatives, creating and optimizing high-performance hybrid mobile applications using **React Native and Flutter** for iOS and Android platforms. Achieved a **4.5-star average user rating** across both platforms.
- Focused on **performance optimization throughout the development lifecycle**, resulting in a 20% reduction in server response times for SPAs and **improved user engagement across platforms**.

Vasterra

Full-Stack Developer

Spring, TX

July 2011 – June 2015

- Oversaw **remote development projects, including a \$500,000 SaaS platform**, managing a team of 10 developers to deliver scalable solutions on time and within budget.
- Enhanced technical expertise by **adopting modern tools like Webpack and ES6+**, resulting in a 25% reduction in build times and improved team collaboration. Built scalable web applications using **Node.js, Java, and .NET**, contributing to robust back-end development and a 25% increase in application performance.
- Developed responsive **web designs using CSS3, HTML5, and Bootstrap**, increasing user retention by 15%. Created interactive web pages integrated with **MySQL databases**, optimizing workflows and query performance.
- Directed cross-platform mobile application development using Swift and Ionic, focusing on UI/UX design and performance optimization to **achieve a 4.5-star average rating** on app stores.
- Contributed to full-stack development by **building scalable web applications with Node.js, Java, and .NET** for back-end services, and developing interactive front-end interfaces integrated with MySQL databases.

TECHNICAL SKILLS

- **Frontend Development:** React, Angular, Vue.js, Next.js, Nuxt.js, SASS, LESS, Tailwind CSS, Storybook
- **Backend Development:** Node.js, ASP.NET, Laravel, Python, Ruby on Rails, Java Spring Boot, GraphQL
- **Mobile Development:** React Native, Flutter, Swift, Ionic, NativeScript
- **Databases:** MySQL, PostgreSQL, MongoDB, DynamoDB, SQL Server, NoSQL
- **Cloud Services:** AWS (Lambda, Amplify, S3, DynamoDB), Azure
- **Testing & Automation:** Cypress, Jest, Puppeteer, Selenium, Playwright
- **DevOps & CI/CD:** Jenkins, GitLab, GitHub Actions, Docker, Kubernetes
- **Other Skills:** API Design, Microservices Architecture, Serverless Solutions, Web Accessibility (WCAG), ADA Compliance

EDUCATION

- **UCLA**
Master of Science : Computer Science 2012 – 2014
- **UCLA**
Bachelor of Engineering: Computer Engineering 2010 - 2012
