

Aishwarya Gabhane

(510) 396-7287 | aishwaryagabhane93@gmail.com | [LinkedIn](#) | Bay Area

EDUCATION

- **Masters - Business Analytics, California State University, East Bay** May 2023
- **Bachelor of Engineering, University of Nagpur, India** May 2015

SUMMARY

- Software engineer with 5+ years of experience in Python, SQL, and data visualization tools like Tableau and Power BI.
- Proficient in designing ETL workflows, integrating scattered data sources, and optimizing database performance.
- Expertise in transforming flat log files into actionable insights, automating processes, and building scalable solutions.
- Strong communicator adept at collaborating with technical and non-technical stakeholders to deliver data-driven solutions.
- Led cross-functional teams and managed end-to-end data projects, ensuring data integrity and accuracy from extraction to reporting.

PROFESSIONAL EXPERIENCE

Business Intelligence Engineer, Agile Datapro

July 2023 – Present | Campbell, CA

- Designed and developed **Power BI dashboards** to monitor recruitment analytics, enhancing operational decision-making.
- Automated **ETL** pipelines using **Python and SQL** to process and store parsed resumes in **Azure Blob Storage**, improving scalability.
- Developed a **Generative AI Recruiting Co-Pilot** leveraging **NLP techniques** to parse resumes, extract key skills, and store data in **SQL databases** for analysis, resulting in a 50% reduction in manual resume screening time.
- Deployed a **Flask application** for real-time resume insights and cover sheet generation, streamlining recruitment workflows.
- Optimized **SQL** queries and database schemas, improving data retrieval efficiency by 40%.
- Integrated **large language models (LLMs)** to analyze unstructured text data from resumes and job descriptions, improving skill matching accuracy.
- Developed algorithms using **LLMs** to extract, classify, and rank key competencies, enhancing recruitment decisions by 35%.

Software Engineer, IBM

July 2020 – Feb 2021 | Mumbai, IN

- Created **Tableau dashboards** and SQL-based reports to monitor product quality and performance.
- Conducted **A/B testing** to analyze customer interactions, translating results into actionable performance recommendations.
- Automated **SQL queries and Python scripts** to streamline KPI reporting and dashboard creation, improving data accessibility.
- Analyzed customer engagement data to identify patterns and develop strategies for product and portfolio improvement.
- **Conducted ad hoc analyses** to support leadership decisions, improving risk controls and business outcomes.
- **Collaborated with stakeholders** to translate complex business requirements into optimized data models and analytical solutions, improving data accessibility and enabling more effective decision-making.

Senior Software Engineer, Capgemini (Prudential)

April 2018 – July 2020 | Mumbai, IN

- Leveraged **SQL and Tableau** to monitor customer behavior, developing dashboards to track KPIs and provide actionable insights.
- Conducted predictive analytics on customer transaction data, reducing **fraudulent transactions** by 48%.
- Analyzed **10k+ customer** records to support fraud prevention strategies and optimize marketing content.
- Streamlined **ETL** workflows using **SQL and Python**, achieving a 90% improvement in reporting efficiency.
- Documented data analyses and dashboard functionalities, ensuring clarity and reproducibility for leadership reporting.
- Collaborated with cross-functional teams to translate business requirements into scalable data solutions.

Software Engineer, Capgemini (Taco Bell)

Feb 2016 – April 2018 | Mumbai, IN

- Built interactive dashboards using **Power BI and SQL** to improve decision-making for **payment processing** and online transactions.
- Conducted **A/B testing** and automated analytics workflows, increasing revenue by 23%.
- Performed statistical analysis and created interactive dashboards to support strategic business decisions.
- Proficient in managing complex **payment processing** and online payment data autonomously and collaboratively.
- Managed project timelines, priorities, and deliverables using agile methodologies, ensuring 98% completion of key milestones.

TECHNICAL SKILLS

Programming Languages: Python (NumPy, Pandas, Matplotlib, TensorFlow, PyTorch, Pyspark), Java, R Programming, Perl, shell/bash scripting

Databases: MySQL, Microsoft SQL Server, DB2, Netezza, ETL

Data Visualization: Microsoft Power BI (DAX, Power Query), Tableau, Microsoft Excel (VLOOKUP, HLOOKUP, PIVOT Tables, Macros)

Tools and Frameworks: Talend, HDFS, AutoSys, GitHub, PVCS, PPM, NzAdmin Tool, Airflow, Application Support, Incident Management, ITSM, Azure Data Factory, Hadoop, Jenkins

Cloud-Based Technologies: Azure (Blob Storage, Synapse Analytics, Data Lake Gen2), AWS (S3, EMR, EC2)

Reporting & Automation: SharePoint, Power Automate, ITIL Tools (JIRA, ServiceNow), BMC Remedy

Statistical Analysis: A/B Testing

ACADEMIC PROJECTS

Reservation Cancellation Dataset

Jan 2023 – Mar 2023

- Analyzed and predicted Booking status for reservation cancellation dataset using predictive analysis techniques.
- Conducted exploratory data analysis (EDA) on the reservation cancellation dataset to gain insights into the data and identify patterns and trends.
- Used cross-validation techniques to assess the model's performance and fine-tuned the hyperparameters to improve the model's accuracy and generalization.
- Generated data visualization using Matplotlib, heatmap, and seaborn.

Real Estate Analysis.

Jan 2022 – May 2022

- Used Python & Beautiful Soup to extract property data from Redfin.com, achieving a successful scrape of millions of listings.
- Constructed a house price prediction model using linear, random forest, and support vector regressions. The random forest model yielded the best results with an accuracy of 95%, precision of 94%, and robust prediction capabilities.
