

Sanjeev Shakya
sanjeev.shakya0660@gmail.com

SUMMARY:

- Around 11+ years of professional experience in Identity Access Management.
- Worked with Active Directory, LDAP/UNIX groups, Networks, Human Resource systems for Identity and Access Management.
- Managed projects for design, configuration and implementation of SailPoint IIQ, including coordinating with vendor leadership, technical services leadership, and end user customers.
- Excellent knowledge and experience in implementing user provisioning credential management, workflows, forms, application integration, connectors, reports and roles.
- Experience in troubleshooting various issues in LDAP. Exporting, importing, performance tuning, creating and maintaining user and group profiles in LDAP.
- Hands on experience in development of SailPoint Identity IQ 6.x and 7.x workflow solution.
- Worked with Active Directory, LDAP/UNIX groups, Networks, Human Resource systems for Identity and Access Management.
- Designed SailPoint deployment activities - connector configuration, custom rule development, workflow configuration, development and third-party system integration.
- Coordinating with existing Provisioning Team for the application in order to get the existing User Access Management (UAM) model to make it fit in to IIQ.
- Provisioning application's requests in IdentityIQ to Create/Amend/Delete user access for the on boarded applications.
- Understanding of directories (AD/LDAP) and group structures, policies etc, SAML 2.0, Frame set up for enterprise level Role mining, Role Based Access Control (RBAC), Multi Factor Authentication (MFA), Single Sign on (SSO), PAM (Privileged Account Management)/ (Privileged Identity Management), Entitlement Management and Identity Management.
- Upgraded Ping Federate from Version 7.1.1 to 7.3.
- Installed and Configured Ping Federate.
- Expertise in implementing SAML as both Identity Provider and Service Provider across multiple platforms Using SiteMinder and Ping Federate.
- Implemented OAuth to access the protected API with Access Token by using Different OAuth Grant types.
- Configured multi factor Authentication for internal applications using PingID.
- Experienced in migrating NetIQ Access Manager to Ping Federate.
- Experienced on Cloud based Identity and Access Management Solutions like OKTA and PingOne.
- Working as a part of Single Sign on team(SSO), Protecting Web applications with Standard/Custom Authentication Schemes and educating the application team about the flow of authentication and authorization.
- Worked with OKTA support by opening cases on several issues.
- Worked in tuning the environment and setting up High availability with LDAP and Access manager.
- Deep knowledge on OKTA MFA device management, server MFA management.
- Implemented Single Sign-On using SiteMinder on single/multiple cookie domains for Web applications and integrated SSO with SunOne LDAP and MS Active Directory and e-Directory. This also includes Federation both inbound and outbound using SAML 2.0.
- Understanding of directories (AD/LDAP) and group structures, policies etc, SAML 2.0, Frame set up for enterprise level Role mining, Role Based Access Control (RBAC), Multi Factor Authentication (MFA), Single Sign on (SSO), PAM (Privileged Account Management)/ (Privileged Identity Management), Entitlement Management and Identity Management.

PROFESSIONAL EXPERIENCE:

Cisco-Philadelphia, PA

IAM Consultant

Sept 2019- Present

Responsibilities:

- Gathering the Requirements, Documenting the functionality before Implementing.
- Creating and Customizing the operational work flows.
- ISIM administrative activities such as generating user reports, create/modify users
- Involved in customization and creation of workflows
- Led security architecture for the Customer Identity & Access Management (CIAM) system, which handles access governance of Confidential 's external B2B users. CIAM is implemented using SailPoint IdentityIQ.
- Involved in Coding, Testing and Support Activities.
- Involved in development of front-end components using Spring MVC, JSP, JavaScript, JAVA, and JSON.
- Administered user accounts and profiles and performed test planning and test activities for SailPoint Application post patch application
- Using IIQ Console for operations such as checkout, import, connector Debug etc.
- Managed all phases of application lifecycle including requirements analysis, application design, construction, quality control-testing, deployment and integration, troubleshooting and change management on SailPoint IIQ.
- Upgraded Ping Federate solution from legacy (6.x) version to new (8.x) version.
- Performed POC for Ping Access Authentication Solutions.
- Worked on moving around 50 applications from OAM to Ping Access.
- Worked on Custom Authentication Schemes in Ping Access based on Business needs.
- Upgraded Ping Federate from 6.0 to 8.0.
- Worked on applications which needed compliance requirements in relation to HIPAA, PHI, SOX.
- Involved in discussions with the various business owners and vendors to implement the change on each application without impacting the end user.
- Designed, deployed, and supported highly available and scalable Pingfederate infrastructure in on-premise that provides single-sign-on (SSO) and federation solutions for internal/external access.
- Experienced in integrating various applications with Okta to provide SSO as well as user provisioning, deprovisioning and reconciliation.
- Migrated around 100 applications to use the new solution which offers the users with Kerberos Authentication internally and the Forms based authentication externally using Ping Federate 8.x.
- Executed platform upgrades for Pingfederate.
- Installation and configuration of PingAccess.
- Worked on OAuth Integration using Ping Federate and Ping Access and implementing Federation SAML services to SSO into third-party vendors.
- Implemented OAuth to access the protected API with Access Token by using Different OAuth Grant types.

Sophos, Austin, TX

IAM Consultant

April 2016-July2019

Responsibilities:

- Worked on installation and configuration of PingAccess Policy Servers and PingAccess Agents.
- Integrated PingAccess with Pingfederate System to authenticate the user using Pingfederate and Authorize by using PingAccess Servers.

- Integrate the custom developed independent application with PingAccess to track the owner of the application which is being protected by PingAccess and Pingfederate.
- Worked on apache web server to make the application URL work with both http and https and protected both secure and non-secure URL's using PingAccess.
- Worked on application configuration with PingAccess and defining PingAccess Sites, rules, Virtual hosts, Policies and Rules.
- Experienced with multiple Ping Federate adapters like HTTP adapter, Open Token adapter and Composite adapters.
- Created policies, realms, rules and responses to protect the applications and configure them to work under the SSO environment.
- Development of identity federation connectors from SailPoint to target systems, along with subsequent access control by Secure Auth.
- Ensure requirements gathered, processes defined, and use cases documented follow out of the box configuration vs. customization as much as possible.
- Manage client requirements and configure SailPoint IIQ connectors for 34+ applications.
- Develop SailPoint deployment and solution architectures.
- Participate in all SailPoint deployment activities - connector configuration, custom rule development, workflow configuration and development, third party system integration.
- Design, implemented a solution which manage the Identity lifecycle of almost all applications with the enterprise, without directly controlling the identity store within the application.
- Involved in creating custom reports, certifications to cater various data feeds.
- Design and Implement data import of various types of data files from internal and external target sources for validating access levels.
- Created a Registry for important information on all applications.
- Participate in and/or User Acceptance Testing and bug-related reengineering efforts.
- Perform Installation and configuration of SailPoint IdentityIQ.
- Develop custom SailPoint Build Map Rules and Workflows as per the business needs.
- Setup applications Active Directory, LDAP, Oracle and Flat Files.
- Providing solutions for the changing business requirements.
- Implement REST classes using SailPoint Rest Application.
- Worked on configuration of PingAccess as Proxy Gateway to protect the application without exposing the application URL to the end users.
- Participated actively in Change meetings to implement the changes in higher environments.
- Experience in working with Microsoft, Azure AD, Okta to build custom integration for clients.
- Have Built and grown strong collaborative relationships with key stakeholders to effectively get their application on boarded into OKTA.

Trustwave, Pittsburgh, PA

IAM Consultant

Feb 2013-March 2016

Responsibilities:

- Involved in building, design, testing, supporting and determining SailPoint Identity IQ Solution design.
- Worked on upgrading Identity IQ from 7.0 to 7.1 and applied patches.
- Onboarded the application for aggregating the accounts to identity IQ as per requirements.
- Hands on experience on onboarding different connectors like Active Directory, Oracle, JDBC, Delimited File, Salesforce, ServiceNow.
- Extensively worked on implementing loopback connector for certifying the workgroups within the SailPoint.
- Extensively worked on Identity Governance including User Provisioning, Access Certifications, Access request, Workflow, Delegated Administration and Password Self-Service.
- Developed before and after provisioning custom rules, tasks.

- Configured Business and It roles in SailPoint IIQ according to the Entitlement hierarchy in the target application.
- Upgraded the SiteMinder Policy Server, Admin UI, and Secure Proxy Server from r12.52 to r12.6. Involved in testing the functionality to meet the business units. Extensively involved in troubleshooting issues that arose in the upgrade process.
- Determine user roles and responsibilities, classifying like users into groups to ease maintenance and rule implementations controlling access to resources appropriate to user and group classifications.
- Created adapters, authentication selectors, policies and policy contracts to protect the applications and configure them to work under the SSO environment using Ping Federate.
- Worked on Open Token Adapter to establish SSO between two native applications.
- Performed POC for Ping Access Authentication Solutions.
- Worked on Ping Access POC to migrate applications from Siteminder to Ping Access.
- Worked on the architecture of Ping federate and PingAccess to check if we could replace CA siteminder with Ping Identity (Ping Access and Ping federate).

EDUCATION : Bachelor in Science, Sikkim Manipal University
Master's in Human Resource Management, Lincoln University , CA
