Achievements:

Born a leader, self made, self and people caring. Used managerial skills to ambassador the sustainable and international Hennes and Mauritz (H&M) brand around the world. Research, artificial intelligence, application, cloud, data management and security, web development accrued computer knowledge and turned them to a bachelor in Computer Engineering. Worked as a software developer and learned many skills for an IT Technician. All these skills and diploma are to prepare me for my next Job in your company.

I- First Line French/English Customer service Agent : 2015 through 2020

International Hennes and Mauritz Ambassador (H&M)

Titled as an Ambassador of the brand everywhere in the world. Working as a manager to solve orders and cases. Call back hospitality customers to resolve 1 on 1 issues. Talk to them about a sustainable future fashion brand stylish show. Giving essential and exact customer service in French and English for the Canadian and United States Market. Working with the IT section to improve the platform with Artificial Intelligence application and technique. Organize the Canadian Team for better teamwork, excellent customer service, and improving the rating of the whole Team.

Top Skills

- Ability to talk to customers for a long period of time by answering their questions and giving them information about the company as a whole.
- Experienced service as a customer service Agent and use different types of **empathy** to resolve issues and conflict between company, myself, and the customer.
- Can receive more than **60 calls per day** and deal with them in different ways that meet the company standard.
- Always happy to receive calls and also calling customers for a follow up on a **case** or a problem they are facing.
- Using company programs to resolve customer issues by ordering, writing a case, checking their delivery and making sure that their items are received and on time.
- Working for 5 years and becoming an **ambassador of the brand everywhere in the world**.
- Working to make the workplace **a better place** for myself and for everyone on the team.

II - Research Developer for Evolution business Technology 2019 through 2023

Working as a Software Developer to find Artificial Intelligence solutions to solve unresolved and futuristic problems. Writing programs with C++ and python to maintain and update the company website. Partner with AWS to secure data and protect the customer information and privacy. Working closely with the CEO and did research for development purposes to look for customers and companies to work with.

Top Skills

- Research **Artificial Intelligence** solutions that work and apply them in the company.
- Work with **Amazon web services** solution to build an architecture for the plan of the company.
- Web development: Using **python** to write scripts for the company that works for looking for a company to work with.
- Can write **small programs** in python, C++ and java.
- Ability to maintain a website for a long period of time by working on the front end and also the back end.
- **Partner** with the **CEO** to find, finalize, and sign contracts with big corporations and companies around the world.
- Working with a Partner like **Amazon** to improve company service and employee data and information.
- Update and maintain company site to facilitate **employee daily work** using the system.
- Ability to use the engineering cycle to solve hardware or software problems for the company and also in real life.
- Ability to define and work with object oriented programming to build longer programs and detailed them with comments.

III- IT Technician experience

During my work as an Agent and as a developer, I had the chance to work as an IT technician making sure that company websites were updated correctly and the computers were working properly. Also, Working as a ticket manager at H&M to send tickets to the main team if the problem could not be resolved here in the Chicago office. Using Microsoft Office tools to email co-workers, draw designs, write feedback and make presentations. Also, using Microsoft Team to maintain sharing of information between co-workers in the same or different team.

Top Skills

- Update computer **windows or Mac Os** with newer versions to keep the computer of the organization up to date and to facilitate and solve worker navigation issues.
- **Fixing** computer hardware or **replacing** them quickly to improve the company working percentage.
- Knowing **100% of Microsoft Office tools** (word, excel, power point, paint etc...).
- Familiar with Microsoft Team and/or slack or tools to use to discuss between the company.
- Understand **Networking** as a whole and can work with http and https and other hardware and software networking tools.
- Writing **tickets** with the company ticketing program to alert the main team for advice or for computing issues with the hardware and software we have in the chicago office.
- Use Word to write and edit email and/or feedback for workers to fix their issue at the moment.
- Use Microsoft Team to chat within the company to solve worker issues quickly for any immediate response.

Education:

I- Harold Washington College

2013 through 2016

A- Associate in Science in Computer Science

2014 through 2016

Focus on science and computer skills , that degree took two years to end. Specifically, it was based on Engineering Math, Physics and chemistry. Also, it was focused on programming and IT technician problem solving. I also learned C++ to prepare me for my undergraduate degree.

Top Skills:

- **Graduated with a 3.5/ 4.0 GPA with high Honor**
- Took all the required Math classes from Trigonometry to linear algebra and scored a 95% on my entrance exam for the community college.
- Took all the required physics classes from Physics I to physics III and mastered the problem of gravity and the unsolving still problem of gravity.
- Learned C++ and passed the final project for the class with an A+.
- Earned the best solution for the Math problem 2 and earned a certificate for that in 2015.
- Took basic chemistry to add to my math and physics skills.
- Learning Microsoft Office and tools which gave me experience as an IT Technician.

B- Associate in General Studies

2013 through 2015

Gave myself a general idea of college and life. Taking classes like Art, French as a second language and literature to perfect myself talking with people and to be known outside work and school. English was a big part of this degree. Teaching me the essential tools of the language and how to use it to perform in school or in real life.

Top Skills:

- **Graduated with a 3.5/4.0 GPA with high Honor.**
- Took all the English classes from basic English 98 (grammar and sentence structure) to English 102. English 102 is a one project writing essay from the beginning to end of the class. Wrote mine on electric cars and got an A+ in the class.
- Got all the credit for French by taking an Exam and passing with a score of 100.
- Learning basic and abstract Art to know more about life as a whole and how artists see the world around us.

II - University of Illinois At Chicago

Bachelor in Science In Computer Engineering

2016 through 2019

This degree was a continuation of my associate in science in computer science. Classes like artificial intelligence and programming allowed me to get my first job as a research developer. Other classes like Networking and IT class helped me to be better as an IT technician. The experience I have with friends and teachers helped me land my job as a First line agent. All of that in a single degree as a preparation for the workplace and life.

Top Skills:

- **Graduated with a 3.5/4.0 GPA with Honor.**
- Learning **data structures** and **algorithms** to improve coding skills and to understand programming.
- Ability to understand **VLSI** design, computer architecture, digital system and senior design.
- This degree is a mix of electrical engineering and computer science.
- Ability to analyse computer **circuits** or system circuits to build a better architecture and design.
- Taking classes like embedded systems, discrete and continuous signal systems, logic design, senior design, computer algorithm, Math, physics, electrical circuits and signal processing.

Project:

Safer City Application:

For the final project of the class, our team built the Safer City Application running on both IOS and android. Using swift to make the IOS application and android studio to make the android Application. The application is a safety application which allows the user to avoid the dangerous zone where there is shooting or killing, or heavy traffic while driving to his destination. It allows the user to check the nearest police station in the zone if the user wants to make a report or visit the closest police station. Everything is done on a map, built and transferred by google API.

Top Skills:

- Familiar with swift and android studio to make apps on IOS and android.
- Using google API to build a map for the application.
- Using google search bar professionally to search for the project.
- Using other search engines like Being and Yahoo to have a second opinion on the search.
- Ability to place pins on a map to represent a destination or police station.
- Ability to program a trace or route on the app to help the user navigate to his/her destination.
- Having the power to create alerts on a map while the user is driving.

Honors and awards

- | | |
|--|------|
| - Ambassador and Manager of the Year (H&M) | 2017 |
| - Safer City Application group work Project presentation | 2017 |
| - Black Tech Scholar GRADUATE | 2017 |
| - Tau Sigma Honor Society | 2017 |
| - Engineering Math prize, 1 st place | 2016 |
| - Best Player of the National Soccer League | 2015 |
| - Phi Theta Kappa Honor Society | 2015 |

People Problem solving with social and computer knowledge

Mastering people and social problems through life experience, exceptional mind and history. Using experiences to prevent social disaster. Teaching with skills, advice and leadership skills to solve people's issues and daily obstacles. Always improving in life which is reflected in the art of finding solutions with artificial intelligence. Therefore, the addition of artificial Intelligence does not have an impact on people in the workplace.
