Senior Software Engineer | Technical Lead | Solution Architect

SUMMARY

Results-driven generalist with over a decade of experience overseeing the entire SDLC, from concept to deployment, delivering market-ready products that have fueled company growth and generated hundreds of millions in revenue for startups and enterprise companies. Some of my recent remarkable work includes, but is not limited to:

- Adapted cutting edge AI technologies including MCP (Model Context Protocol) and A2A from POC (Prove of Concept) to product at Paypal, empowered over 24,000 employees global wide to adapt the AI technologies and address their daily work including Engineers, HR, Marketing, Finance, Legal, Security and other departments with billions of budgets. (2024 ~ 2025)
- Developed Intuit GenStudio aim to the 10-billion-dollar investment of company AI transformation goal by using cutting-edge AI technologies including GenAI/LLM (Large Language Model) technologies with OpenAI GPT, Meta LLAMA, Google Gemini, Anthropic Claude, supporting over 7,000 employees company-wide, and over 50% activate rate, 20% daily use (2023 ~ 2024)
- Support Meta AIM (Apply Machine Learning) data integrity team with over 300 third-party labelers collaborate on multiple projects including command detection, hate speech detection, music copyrights, voice transcriptions project and supporting the prototyping of Facebook Portal (later Meta Portal) generated \$280 million total revenue. (2020 ~ 2021)

SKILLS

Languages

HTML5, CSS3, JavaScript, TypeScript, Node.js, Python, Shell, Go, Ruby, Hack, PHP, GraphQL, XML, JSON, YAML, Bash

Cloud/Platforms

AWS, GCP, Azure, DigitalOcean, Firebase, Heroku, WNCN, Borg, Kubernetes, Docker, Github, CI/CD, Splunk, Jenkins, Datadog, Git, Jira

Libraries/Frameworks

React, Angular, Next.js, Material UI, FastAPI, Django, Express, NestJS, Electron, WebSocket, Jest, D3.js, Google Maps API, Jest, Cypress, pytest, Selenium

AI/ML

Gen AI, LLMs (GPT, LLAMA, Claude, Gemini), RAG, MLOps, LangChain/LangGraph, NLP, TensorFlow, PyTorch, MCP, Deepgram, AWS Bedrock, Pinecone

Data/Databases

SQL, NoSQL, MySQL, PostgreSQL, MongoDB, Hive DYNAMODB, ORM, Redis, Memcached

Soft Skills

Communication, Problem-Solving, Time Management, Collaboration and Teamwork, Adaptability

PROFESSIONAL EXPERIENCE

Staff AI/ML Full Stack Engineer, Paypal, San Jose, CA

Oct 2024 – Sep 2025

- Researched, evaluated, designed and implemented advanced AI solutions on PayPal’s internal AI platform, integrating MCP and Google A2A Protocol that is compatible with CrewAI and PayPal native Agent for Agent-to-Agent communication to improve the AI technologies usage efficiency.
- Developed full-stack AI applications using Python, FastAPI, React, Next.js, Cloud SQL (MySQL engine), deployed with Docker and Kubernetes on GCP Compute Engine for scalable inference and orchestration monitored by Splunk and Datadog, covering over 24,000 employees companywide.
- Leveraged multiple AI models like OpenAI GPT, Google Gemini/Vertex AI, Anthropic Claude, and Meta Llama to enhance automation, reasoning, and internal productivity tools.

Senior AI/ML Full Stack Engineer, Intuit, Mountain View, CA Jan 2023 – Oct 2024

- Designed, prototyped, and developed a Generative AI web application with multiple LLMs (OpenAI GPT, Anthropic Claude, Google AI, Meta Llama) to enhance the internal working environment.
- Built and deployed the Intuit Assist chatbot using TypeScript, React, Next.js, Material UI, Node.js, Python, and FastAPI, supported by Docker, microservices, and internal tools such as Splunk and Figma.
- Implemented CI/CD pipelines and released production-ready versions on AWS and Azure, ensuring scalability, observability, and cross-platform reliability.

Senior Software Engineer, SlateAI, San Francisco, CA Aug 2021 – Dec 2022

- Collaborated with third-party partners to design and implement new Building Information Modeling (BIM) features supporting the construction industry.
- Developed and optimized web and mobile applications using JavaScript, TypeScript, React, Next.js, HTML, and CSS for seamless cross-platform performance.
- Integrated NoSQL databases and Hasura GraphQL APIs to deliver scalable data access and improve real-time collaboration within BIM systems.

Senior Software Engineer, Facebook/Meta, Menlo Park, CA Aug 2020 – Aug 2021

- Developed AI/ML tools focused on Automatic Speech Recognition (ASR) to enhance product features across Messenger Assistant, Oculus Speech Recognition, Advertising, and Media Studio.
- Provided technical solutions and cross-functional support for projects involving Hate Speech Detection, Music Copyright, and Portal Smart Album IoT initiatives.
- Built and maintained systems using Hack/PHP, JavaScript, React, Python, Hive, and Jest with data visualization, CI/CD pipelines, and collaboration alongside Machine Learning Engineers.

Software Engineer, Huawei Technologies, San Francisco, CA Apr 2017 – Mar 2020

- Participated in architecture design, prototyping, and delivery of robot development tools like controllers, SDKs, and chat-based content tools for designers and HRI (Human-Robot Interaction) researchers.
- Engineered solutions integrating AI/ML models, computer vision, and 3D technologies using Node.js, Electron, React, GraphQL, WebSocket, HTML/CSS, and Google Material UI.
- Collaborated with DevOps and robotics research teams across Linux, Jenkins, Android, C++, Python, Docker/Kubernetes, and ROS, supporting CI/CD releases and multi-cloud deployment on AWS and Huawei Cloud in an agile environment.

Web Developer, BlueJay Mobile Health Inc, Pleasanton, CA Nov 2013 – Feb 2017

- Designed, developed, and optimized a cross-platform clinic management system (Web, iOS, Android) featuring admin dashboards, payment billing, account management, and live video chat.
- Implemented scalable front-end architecture using Angular, Bootstrap, Node.js, socket.io, WebRTC, and RESTful APIs, enhancing responsiveness and real-time communication.
- Deployed and maintained services on AWS using the LAMP stack (Linux, Apache, MySQL, PHP) with Laravel framework, integrating Figma workflows for UI/UX and continuous improvement.

EDUCATION

San Jose State University, BS Computer Science

2007 - 2011
