PROFESSIONAL SUMMARY

Strategic and innovative Product Manager with proven expertise in driving product development, optimizing workflows, and aligning business goals with user-centered design. Skilled in leveraging data-driven insights to enhance product efficiency, user experience, and adoption. Adept at leading cross-functional teams, executing high-impact product strategies, and creating solutions that meet market needs. Passionate about fostering a collaborative, psychologically safe work environment to drive innovation and continuous improvement. Thrives in fast-paced environments, scaling product success while championing continuous learning.

CORE COMPETENCIES & TOOLS

- Product Management: Product & Technical Roadmaps, Product Lifecycle Management, UI/UX Design Best Practices, Stakeholder/User Research, Cross-Functional Team Collaboration, User Flow & Requirements Definition, Go-to-Market Strategy
- Technologies: JavaScript, CSS, AWS (EC2, S3, IAM, VPC, RDS, Lex, DynamoDB), Git & GitHub, Linux, MySQL, Docker, Jenkins, Nagios, Prometheus, Jira, Azure DevOps, Confluence, Slack, Miro, ServiceNow, Google Analytics, Low Fidelity Wireframes
- Data & Analytics: Product Analytics, KPIs, Data-Driven Decision Making, Competitor Analysis

PROFESSIONAL EXPERIENCE

Product Manager

WEX Inc - June 2024 - Present

- Leading the development and execution of strategic product roadmaps, from ideation to launch, including a redesigned Benefits Enrollement (HSA / FSA) platform that improved user experience and reduced customer service calls by 30-35%.
- Spearheading the implementation of the AI Benefits Assistant chatbot using AWS services like Amazon Lex and DynamoDB, enhancing automation, following HIPAA compliance, and reducing benefits-related inquiries by support teams.
- Collaborating with cross-functional teams (technology, design, operations, and clients) to successfully launch benefits administration products, improving efficiency and user satisfaction.
- Championing user-centered design principles, increasing adoption of employee benefits products by improving informational visuals, and creating an intuitive, journey-based customer experience.
- Conducting client interviews, competitor analysis, user research, and market analysis to gather requirements for the Benefits Enrollment Platform, ensuring alignment with industry trends and user needs.
- Launching a bi-weekly internal podcast sharing product, technical, and program management experiences, alongside best practices, across WEX.

Product Owner | Project Manager

WEX Inc - March 2022 - June 2024

- Directed the successful Payroll Integration project, automating file transfers between benefitExpress and ADP, saving 700 hours annually by eliminating manual benefits reporting.
- Led cross-functional teams in the Health line of business, improving product delivery by 20% based on DevOps Research and Assessment benchmarks, fostering a culture of continuous improvement.
- Facilitated stakeholder communication through regular demos, tech reviews, and transparent backlog management to ensure alignment and effective feedback integration.
- Implemented a comprehensive initiative based on Marty Cagan's Product Operating Model and Gary Gruver's

“Engineering the Digital Transformation,” shifting teams to a product innovation and quality-first approach.

- Designed ACA compliance solutions, reducing auditing time by 1000 hours annually and ensuring regulatory adherence for 1094 and 1095 filing.
- Collaborated with Operations to determine ROI for product initiatives, authoring epics and user stories, and leading technical documentation, requirements elicitation, and team task management.

Product Owner | Sr. Scrum Master

OneStream Software - April 2021 - March 2022

- Prioritized product features and requirements using methods such as WSJF, Kano Model, and MSCW, aligning product roadmaps with business objectives and stakeholder needs.
- Partnered with sales, marketing, engineers, and designers to enhance existing features, improving usability by 20% for financial consolidation desktop and web applications.
- Developed operational value stream mapping from customer requests to delivery, identifying bottlenecks, streamlining workflows, and enhancing delivery efficiency.
- Owned and prioritized the product backlog, driving enhancements in FP&A processes, facilitating big-room planning sessions, and improving story clarity, resulting in a 12% increase in usability and reducing backlog churn.

Business Analyst (Contract)

Harmonia Holdings Client: United States Department of Agriculture - October 2020 - March 2021

- Supported audit procedures including developing testing criteria, analyzing evidence, and documenting findings.
- Analyzed organizational procedures for compliance with USDA regulations, including labeling practices, fraud investigations, and workplace injury management.
- Identified audit issues and recommendations, contributing to Harmonia Holdings achieving CMMI Maturity Level III certification.

Agile Business Analyst

HireWorks - February 2020 - September 2020

- Facilitated Scrum ceremonies and coached teams on effective user story creation using the INVEST method, ensuring adherence to Agile best practices.
- Collaborated with development teams to create working agreements and removal of impediments, ensuring successful sprint goal achievement.
- Supported technology solution alignment with business strategy and created a psychologically safe environment for trust-building and active participation.

Other Relevant Work Experience:

- Business Analyst, Cisco Meraki (May 2018 - February 2020)
- Assistant Project Coordinator, Lyca Mobile (July 2016 - May 2018)
