## Summary

Full Stack Developer with 8+ years' experience in **React**, **Node.js**, **TypeScript** and **cloud technologies**. Fluent in developing **GraphQL**, **REST APIs** and optimizing query performance. Deep knowledge in **event-driven architectures**, **microservices** and familiar with **Azure** for building and deploying applications. Passionate about using the latest technologies and actively jump in online dev communities to enhance experience, knowledge.

## Skills

**Languages** - JavaScript, TypeScript, SQL, HTML, CSS

**Frameworks** - React, Node.js, Next.js, Express, NestJS

**Databases & API** - MySQL, MongoDB, PostgreSQL, Elastic Search, GraphQL, REST APIs

**Unit Testing** - Jest, Cypress, Enzyme

**Cloud & DevOps** - Azure, Azure Functions, Azure Blob Storage, Amazon Cosmos DB, Azure Resource Manager, Azure Virtual Machines, Azure Developer CLI, Docker, Kubernetes

**Methodologies** - Agile/Scrum, Test-Driven Development (TDD), Continuous Integration/Continuous Deployment (CI/CD), Version Control Systems (Git, GitHub, Gitlab, Bitbucket)

## Work Experience

### Full Stack Developer

Postal | Mar 2020 – Feb 2025

Developed a set of applications to support marketing business model.

- Lead development to design and build responsive, scalable web applications using **React** for front-end and **Node.js** with **Express** for back-end with **TypeScript** for a marketing platform/gift system.
- Implemented server-side rendering and client-side data fetching using **Next.js** to ensure fast page loads and smooth transitions between pages.
- Introduced monorepo architecture to share components, repeated frontend workflow across multiple applications in **React**.

- Refactored state management using **Redux** and **Context API** by separating their use cases in appropriate situation to provide a fast, predictable solutions.
- Designed and implemented **microservices** using **Node.js** that support middleware, common functions and communicate with third-party APIs.
- Developed and optimized **GraphQL** and **RESTful APIs** interacting with **MongoDB**, **PostgreSQL** that provides data to frontend applications and handling events from vendors platform using **Node.js**.
- Developed and maintained serverless functions using **Node.js**, deploy them with **Azure Functions** and used **Azure Monitor** to check logs and debug.
- Collaborated in a **CI/CD** pipeline and used **Azure Developer CLI**, **Docker** and **Kubernetes** to implement automatic build and deployment of websites, functions on every sprint cycle.
- Created a customized UI library that fit with own design system by inheriting **Material UI** and used **Storybook** to document and showcase the components' usage and their variations.
- Utilized **Jest** and **Cypress** to write unit tests and integration tests for UI components and middleware functions to makes sure all edge cases were covered.

## Full Stack Developer

Concepta Tech | Aug 2016 – Feb 2020

Provided software solutions and maintained customer's platforms. E.g., e-commerce website, healthcare application, immigration program, custom apparel design system, ...

- Developed and maintained a couple of web applications using **React** for front-end and **Node.js** with **Express** for back-end usually like customer's introduction websites, portfolios and business management systems.
- Developed highly interactive, responsive UIs for a survey application in **React** with **TypeScript** and **Redux** for state management improving user-side performance.
- Implemented **Node.js** backend for a healthcare application that supports website, mobile apps.
- Built scalable **RESTful APIs** in **Node.js** with **Express** and **MongoDB** that pulls and distributes products data between the e-commerce platform and vendors' databases.
- Integrated Azure services such as **Azure Virtual Machines**, **SQL Database**, **Azure Blob Storage**, **Azure Functions** to deploy standalone projects, serverless functions.
- Improved application performance by using **Azure CDN** for content delivery and improving page load times by 25%.

## Education

The University of Hong Kong

Sep 2010 – Apr 2016

Master's degree, Computer Science
