SUMMARY

Results-driven and collaborative Senior Full Stack Engineer with 10+ years of experience with a track record of delivering high-quality web and mobile applications using **JavaScript, TypeScript, React, React Native, Flutter, Next.js, Angular, Node.js, Express.js, Nest.js, Python, Django**, and more. Proven ability to collaborate within cross-functional teams to achieve project goals. Stays up-to-date with cutting-edge technologies to advance the next generation of tech landscape.

SKILLS

- JavaScript (ES6+), Typescript, Python, Go (GoLang), PHP
- React, Next, Angular, Laravel, CodeIgniter, Gatsby, WordPress, jQuery
- React Native Expo, Flutter, Dart
- Node.js, Express.js, Nest.js, Django, Flask, FastAPI, Gin
- Redux, Redux-Saga, Zustand, Redux-Toolkit
- REST API, GraphQL
- MySQL, PostgreSQL, MongoDB, Oracle
- Bootstrap, Material UI, Tailwind CSS, Ant Design, Chakra UI
- AWS (EC2, S3, Lambda, API Gateway, DynamoDB), Google Cloud Platform (GCP), Firebase
- React Testing Library, Jest, Mocha, Jasmine, Cypress, Pytest, Detox, Gotests
- TypeORM, Prisma ORM, Mongoose, GORM
- GitHub Actions, Jenkins, Docker, Kubernetes, Bitrise
- Agile Methodologies (Scrum, Kanban), Teamwork, Communication
- Debugging, Code Optimization, Architecture, Design Patterns

WORK HISTORY

Senior Full Stack Engineer | *Attract Group - Las Vegas, NV*

08/2021 - Present

- Developed and maintained web and mobile applications for **healthcare, e-commerce, fintech**, and **education** industries.
- Managed frontend development using **React, React Native, Next** and **Angular** while ensuring seamless interaction with **Node.js, Express.js, Nest.js, Django**, and **Flask** for backend services.
- Architected and developed an educational platform, integrating **React** for the frontend, **Express** for the backend, and **MongoDB** for database.
- Participated in developing e-commerce sites for various clients, leveraging **React, Angular, Next.js, Gatsby, WordPress**, and headless CMS platforms like Sitecore, DataCMS and Contentful.
- Contributed to a healthcare platform for beneficiaries and Medicare providers using **React, Nest.js, AWS**, and **Python**.
- Utilized **Redux** and **NgRX** for effective global state management.
- Built responsive and pixel-perfect pages from **Figma** and **XD** designs using **Bootstrap, Tailwind CSS** and **Material UI**.
- Enhanced application performance and SEO through the implementation of server-side rendering (**SSR**) using **Next.js**.
- Integrated React and React Native applications with **REST APIs** and **GraphQL** for seamless communication between backend and frontend.
- Implemented and optimized data queries and updates by configuring **Apollo Client** with **Apollo Server** for efficient data management.
- Utilized **AWS** for cloud infrastructure, leveraging **S3, API Gateway, Lambda**, and **EC2** for scalable solutions.
- Leveraged **RabbitMQ** and **Kafka** for efficient message queuing and real-time data processing.
- Developed unit and integration tests using **Jest, React Testing Library, Mocha, Jasmine**, and **Cypress**, resulting in a 30% reduction in production bugs.
- Applied CI/CD pipelines with **GitHub** actions, **Jenkins, Kubernetes** and **Docker**, decreasing deployment time by 40%.

- Successfully managed multiple projects simultaneously, transitioning between different projects and teams as needed.
- Collaborated closely with product managers to translate requirements into designs and establish precise roadmaps for project execution.

Full Stack Engineer | *Swing Education - Franklin, TN*

05/2019 - 07/2021

- Contributed to the design and development of the company's substitute teacher platform using **Node.js** for backend services and **React** and **React Native** for frontend components.
- Published the mobile application for **Android** and **iOS** via the **Google Play Store** and **Apple App Store**.
- Implemented push notifications using **Firebase Cloud Messaging (FCM)** to enhance user engagement.
- Built dynamic, responsive user interfaces with **React**, **React Native**, **Redux**, and **React Context API**, improving the experience for **10,000+** users.
- Managed **PostgreSQL** databases, ensuring data integrity and optimizing query performance.
- Introduced **Storybook** to document and maintain reusable UI components, improving development consistency.
- Engineered scalable backend services using **Express.js**, enhancing system reliability and performance.
- Utilized **AWS** services (**EC2**, **S3**, **RDS**) for cloud infrastructure, ensuring high availability and scalability.
- Monitored and resolved mobile application issues using **Sentry.io** for real-time error tracking.
- Leveraged **Firebase Remote Config** to enable feature flagging and dynamic app behavior without code redeployment.
- Planned and executed **A/B tests** using **Google Optimize** to evaluate user behavior and improve key website metrics.
- Collaborated with product managers, designers, and **cross-functional teams** to deliver high-quality software within timelines.

Software Engineer | *ScienceSoft - McKinney, TX*

04/2015 - 05/2019

- Experienced in building real world applications using **PHP** frameworks, **Node.js**, **React**, **Redux**, **JQuery**, **Angular**, and **AWS**.
- Participated in migrating several marketing sties and CRM systems with **React** and **Angular**.
- Built sports betting application using **Next.js**, **Node.js**, and **PostgreSQL**.
- Worked on a healthcare telemedicine application for a healthcare client, utilizing **React**, **React Native**, and **Node.js**.
- Translated designs & wireframes into high-quality code using **HTML**, **CSS**, **Bootstrap**, and **Ant Design**.
- Utilized **Redux Saga** middleware for handling asynchronous operations.
- Converted basic websites into **SPA** and made custom components using different frontend frameworks like **React** and **Angular**.
- Successfully migrated existing **REST APIs** to **GraphQL**, reducing response times and improving query flexibility.
- Developed essential features like **OAuth** authentication flow for Google and Facebook sign, push notifications, and real-time chat features using Firebase SDKs.
- Part of a team that would plan, develop, and create web-and-mobile-based applications to match business objectives.
- Wrote rich front-end interfaces for online applications and websites for large clients in industries including medical, insurance, and technology.
- Managed and maintained **Linux**-based servers, ensuring 99.9% uptime.
- Launched **HTML**, **CSS**, and **JavaScript** to create 100+ responsive landing pages for both company and client.
- Preserved up-to-date code by committing daily updates, showcasing proficiency in **Git** and **GitHub**, and adeptness at resolving merge conflicts.

EDUCATION

Bachelor's Degree, Computer Science

University of Texas at Dallas 04/2011 - 03/2015
