### **PROFESSIONAL SUMMARY**

Enterprise Program and Project Manager (PMP, CSM) with 15+ years of experience leading multimillion-dollar technology modernization initiatives across federal and state government, and healthcare sectors. Proven success managing large, cross-functional teams and global stakeholders through Agile and PMBOK methodologies. Skilled in strategic planning, risk mitigation, and process optimization to deliver complex enterprise solutions on time, within scope, and within budget.

### **PROFESSIONAL EXPERIENCE**

#### **PERATON**

**8/2015 – 9/2025**

**10/2023 – 9/2025**

#### **Sr. Manager / Project Manager (State of Florida LAS/PBS)**

- Assembled and managed 22+ virtual diverse team (developers, system analysts, DBA's, automation testers, and subcontractors) to modernize legacy Legislative Appropriations System/Planning and Budgeting Subsystem from the current custom written application in Natural/ADABAS on an IBM mainframe to Microsoft C# language using an Oracle database with the application residing in a hosted cloud environment.
- Facilitated communication among Florida Executive Office of the Governor, Office of Policy and Budget, legislative stakeholders, and executive leadership through project meetings, weekly and monthly status reports.
- Directed full lifecycle project management—planning, analysis, design, development, testing, deployment, and support—ensuring adherence to governance standards.
- Developed complexed project plans
- Responsible for cost and scope management, change control, and maintaining project governance
- Identified and managed project risks and issues, with a proactive approach to solving problems
- Communicated progress, risks, and updates clearly to executives and stakeholders
- Directly responsible for managing application development, quality control testing, and User Acceptance Testing.
- Managed third-party vendors to ensure accountability and delivery
- Successfully managed escalated risks and issues via constant communication with development team and project stakeholders.
- Developed necessary documentation such as Project Management Plan, Strategic Planning, Scope documents, Business and Technical Requirements documents, Project Plans, Risk Management Plan, Communication Plan, Test Methodology and Strategy Plan, and weekly and monthly status reports.
- Mentored and coached junior project managers and team members to elevate delivery standards.
- Championed process improvement initiatives, optimizing Agile delivery and project governance practices.
- Oversaw project budgets, resource allocation, and financial tracking, ensuring delivery within scope and budget constraints.

#### **Sr. Project/Product Manager (Department of Defense / Defense Threat Reduction Agency (EIDSS)) 8/2015 - 10/2023**

- Assembled and managed 25+ virtual project team, which included developers, system analysts, DBA's and subcontractors to redevelop a legacy system to a web based open sources application using Agile development process for deployment in Kazakhstan, Armenia, Republic of Georgia, Thailand, Ukraine, Azerbaijan, and Jordan.

- Responsible for ensuring proper communication and collaboration between Department of Defense, country stakeholders (Ministry of Health, Laboratory of the Ministry of Agriculture) and upper management through project meetings, weekly and monthly status reports, and in-country visits.
- Developed large complex Project Plans for multiple initiatives from inception through deployment to include planning, analysis, design, development, testing and implementation.
- Responsible for \$40 million budget, cost and scope management, change control, and maintaining project governance
- Directly responsible for managing all aspects of development (requirements gathering, user interface design, application development, quality control testing, Government Acceptance Testing (GAT), and User Acceptance Testing (UAT).
- Ensured design to build met user requirements by routinely meeting with end-user community providing presentations at key points of the projects: Requirements approval, Prototype approval, Development approval, UAT and Training Planning.
- Successfully managed escalated risks and issues via constant communication with development team and project stakeholders.
- Cost and scope management, change control, and maintaining project governance
- Developed necessary documentation such as Project Management Plan, Strategic Planning, Scope documents, Business and Technical Requirements documents, Project Plans, Risk Management Plan, Communication Plan, Test Methodology and Strategy Plan, and weekly and monthly status reports.
- Oversaw project budgets, resource allocation, and financial tracking, ensuring delivery within scope and budget constraints.

#### **Insight Global**

**8/2011 - 8/2015**

##### **Sr. Project Manager (Product Owner)**

- Consultant to NASCO managing business products utilized by Blue Cross Blue Shield, Horizon, CareFirst, and Anthem
- Created complex Project Plans for multiple initiatives, Risk Management Plan, Resource Plans, status reports and project estimate
- Responsible for ensuring proper communication between stakeholders and upper management through project meetings and status reports.
- Successfully managed offshore development and quality assurance teams
- Managed all aspects of SDLC

#### **Northrop Grumman**

**8/2007 - 8/2011**

##### **Sr. Project Manager (Center for Disease Control and Prevention (EHARS))**

- Managed project using Agile mythology utilizing RUP and ELPC (Enterprise Performance Life Cycle).
- Managed all aspects of project development and sub projects from concept through implementation, support and retirement.
- Created complex project plans for multiple initiatives.
- Provided IT direction and assistance to CDC including identification of problems and possible solutions.
- Managed schedules, risk management, test management, resource plans, status reports and project estimates.
- Responsible for ensuring proper communication with stakeholders and leadership team through project meetings, and weekly and monthly status reports.
- Implemented rigorous quality assurance processes.
- Worked with subject matter experts and external user community for system enhancements.
- Managed second-tier production support staff.
- Managed User Acceptance Testing with CDC, State Health Departments, and Community Based Organizations

#### **AT&T / Paragon Solution, Inc**

**11/1996 - 8/2007**

##### **Project Lead**

- Acted as Project Lead/System Analyst to reengineer and convert a COBOL mainframe legacy accounting system to a Client/Server platform.
- Created requirements documentation, Use Cases, and Supplementary Specification.
- Duties included data conversion and data mapping from DB2 to Oracle Database.
- Created data models, database design, and process models based on use cases to reengineer a mainframe legacy system to a client server system.

- Consulted with end-users to determine business requirements and project scope.
- Developed prototype of new system for end-user acceptance.
- Designed and developed programs, created function and stored procedures using SQL and PL/SQL.
- Facilitated testing of accounting system that allowed users to input adjustments, post payments, offset accounts, and post transaction to AT&T corporate sub-ledger

**EDUCATION**

Bachelor of Science; Computer Information Systems; DeVry University
