Profile

Highly experienced and results-driven **Software Engineer** with a strong focus on modern Angular and UI development, specializing in creating dynamic, highly responsive web applications. Proven ability to architect and optimize application performance, streamline development processes, and enhance user engagement. Adept at collaborating with cross-functional teams in Agile environments to deliver high-quality, scalable solutions.

- Expertise in Angular (versions 10-19+), specializing in performance optimization and maintainable, scalable architecture.
- Successfully modernized legacy frameworks like AngularJS to contemporary Angular versions, resulting in improved scalability and user experience.
- Strong background in RESTful API integration, reusable component design, and building responsive UI development with cloud platforms like AWS and Azure.
- Adept in the full software development lifecycle, including CI/CD and deployment best practices.

Technical Skills

Languages: Python, JavaScript, TypeScript, HTML, CSS, SQL, C#

Frameworks & Libraries: Angular (10-19), Vue.js, Svelte, Tailwind, Flask, Bootstrap, React.js, Node.js

Databases: MySQL, MongoDB

Cloud Platforms: Azure, AWS

Methodologies: SDLC, Agile, Waterfall

Tools & Software: Git, GitHub, Sketch, UML, MS Vision, MS Office, Figma, Adobe XD, Adobe Photoshop, Firebase, Docker, RESTful APIs, JIRA, Jenkins, Redux, Kubernetes, Azure DevOps, AWS Lambda, Supabase, ClickUp, PowerBI

Work Experience

UPMC, PA

Nov 2024 – Oct 2025

Front End / UI Engineer

- Identified, isolated, and resolved over 100 security vulnerabilities across major production applications, strengthening system reliability and protecting sensitive data.
- Developed a centralized UI hub to streamline company workflows, integrating key tools and features that enhance operational efficiency and reduce manual processes for employees.
- Utilized Azure DevOps for version control, CI/CD pipelines, and project collaboration, ensuring smooth deployments and efficient code management across multiple development teams.
- Enhanced and optimized UI components across multiple Angular applications (v8, v14, v18) to improve usability and application performance.
- Contributed to the design and implementation of new user-facing features following modern software development practices.
- Collaborated closely with backend engineers and UX designers to translate wireframes into high-fidelity user interfaces.

govWorks, LLC, FL

Apr 2023 – Jun 2024

Front End / Angular Developer

- Enhanced the main CRM's functionality by developing and integrating critical components, which successfully optimized code for performance and resolved key business issues.
- Translated complex designs from Sketch into responsive front-end code, ensuring pixel-perfect implementation and visually appealing interfaces across all devices.
- Leveraged JavaScript, TypeScript, and Angular to implement dynamic features, seamless routing, and efficient API integrations, resulting in a more robust application and improved user experience.
- Led the integration of AI technologies, significantly improving application performance and expanding the customer base through advanced features.
- Migrated legacy software from AngularJS to Angular 17+, enhancing application speed, security, and scalability.
- Increased client web traffic through effective design strategies, SEO optimization, and performance enhancements across the platform.

Verizon, NY

Jun 2022 – Mar 2023

Software Engineer

- Developed and maintained dynamic, responsive web applications using Angular, improving the user interface and overall user experience across internal platforms.
- Collaborated with design teams to translate UI/UX wireframes into high-quality front-end code, utilizing HTML5, CSS3, and JavaScript.
- Implemented reusable Angular components to streamline development and ensure a consistent look and feel across web applications.
- Integrated RESTful APIs into Angular applications, ensuring efficient data flow and enhancing application functionality.
- Contributed to CI/CD pipeline improvements, reducing manual effort in deployment and ensuring high code quality through continuous testing.

- Conducted code reviews and mentored junior developers on best practices for Angular development, clean code, and security compliance.

The START Center for Cancer Care, TX

Dec 2021 – May 2022

Full – Stack Developer

- Led the complete rebuild of the cancer facility's website, tailoring features for patients and medical professionals, enhancing user experience, and increasing engagement by 20%.
- Led the complete architectural rebuild of the cancer facility's public-facing website, tailoring features for both patients and medical professionals.
- Managed project workflows and robust version control using Microsoft Azure DevOps, ensuring continuous team alignment and seamless integration across development cycles.
- Integrated various RESTful APIs into the Angular front-end to enable real-time, secure data retrieval and system interactions for patient records and doctor portals.
- Designed and implemented structured databases using SQL to efficiently manage data for patients and doctors, ensuring seamless integration with existing and new applications.
- Developed highly performant, clean, and maintainable TypeScript/JavaScript code to enhance user experience and optimize application responsiveness across all devices.
- Engineered and deployed dynamic Angular components to effectively handle complex data transactions via API calls, significantly improving core application functionality.

Education & Certifications

Full-Stack Web Development

Sep 2021

CodeUp - Certification

Associates in International Business Studies

Jan 2021

San Antonio College, TX
