PROFESSIONAL SUMMARY

- Identity & Access Management Engineer with 4+ years of combined experience in IAM, cybersecurity, and cloud security across financial, insurance, healthcare, education, and nonprofit sectors.
- Skilled in leading IAM tools like Okta, SailPoint, CyberArk, and Azure AD (Entra ID) to automate provisioning, access reviews, and privileged access management.
- Proficient in SSO, MFA, RBAC, and Zero Trust models, ensuring secure and seamless access across hybrid and multi-cloud environments.
- Experienced in integrating identity platforms with ServiceNow, IIR systems, and cloud infrastructure, improving access accuracy and reducing manual effort.
- Strong understanding of security standards and compliance frameworks including ISO 27001, NIST 800-53, HIPAA, and SOC 2 and certified in CompTIA Security+
- Hands-on with Python, PowerShell, and Terraform for automating IAM workflows, policy enforcement, and reporting.

TECHNICAL SKILLS

IAM Platforms: Okta (SSO/MFA, SCIM), SailPoint IdentityNow, CyberArk PAM, Azure AD / Entra ID, AWS IAM, Active Directory, Ping Identity Suite

Authentication & Federation: SAML, OAuth 2.0, OpenID Connect, SCIM, LDAP, Kerberos, FIDO2

Access Models: SSO, MFA, RBAC, ABAC, Conditional Access, Zero Trust

Automation & Development: Python, PowerShell, REST APIs, JSON, YAML, Git, CI/CD Pipelines

Cloud Platforms: Azure, AWS, GCP (IAM Policies, Terraform, CloudFormation)

Security & Compliance: NIST 800-53, ISO 27001, HIPAA, SOC 2, GDPR

Monitoring & Tools: Splunk, ServiceNow, Qualys, Tenable, CrowdStrike Falcon

Databases & Reporting: SQL Server, PostgreSQL, Excel Automation, Power BI, Tableau

WORK EXPERIENCE

IAM Engineer

CNA Financial

07/2025 – Present | Chicago, IL, USA

Summary

Working on CNA's companywide identity modernization initiative to automate how user access is created, updated, and removed. Helped build workflows in SailPoint IdentityNow that connect with Azure AD, Okta, and CyberArk, making account management faster and more secure. My work helped improve compliance tracking and made audit reporting more reliable.

Responsibilities

- Deployed SailPoint IdentityNow joiner-mover-leaver workflows to automate provisioning across hybrid user populations.
- Integrated Azure AD Conditional Access and Okta MFA policies, lowering unauthorized access attempts by 34%.
- Built Python-based certification reminders and SailPoint dashboards, improving review completion from 71% to 95%.
- Linked CyberArk privileged-account data with SailPoint for unified access governance and credential rotation visibility.
- Partnered with compliance teams to map access policies to NIST 800-53 and ISO 27001 controls, reducing audit exceptions by 29%.

Graduate Consultant

ELC (Northern Illinois University)

01/2025 – 05/2025 | Dekalb, IL, USA

Summary

Consulted for a nonprofit client to strengthen login security and simplify user management. Helped implement Okta SSO for everyday tools and set up CyberArk vaults for admin accounts. These upgrades reduced password-related issues and improved how volunteers accessed shared systems.

Responsibilities

- Implemented CyberArk PAM vaults to secure administrator credentials for finance, website, and cloud resources.
- Configured Okta SSO for G Suite & QuickBooks, decreasing password resets by 28%.
- Designed a role-based access matrix and onboarding checklist following Zero Trust principles.
- Integrated AWS IAM roles with CloudTrail logging and Splunk dashboards for audit traceability.
- Authored lightweight IAM policy guides to train non-technical staff on access hygiene.

IAM Security Engineer (Intern)
Health Care Service Corporation (HCSC)

03/2024 – 08/2024 | Chicago, IL, USA

Summary
During HCSC's cloud-migration project, I supported the IAM team in automating access control and improving HIPAA compliance. I helped configure AWS IAM policies and Okta SSO for internal healthcare applications, ensuring users received the right access automatically. I also created templates and reports that reduced manual provisioning work and shortened audit preparation time

Responsibilities

- Created Terraform templates for IAM roles and group policies, reducing misconfigurations by 46%.
- Linked Okta SSO with AWS Management Console for secure federated logins.
- Developed Python scripts to analyze CloudTrail logs and detect privilege escalation attempts.
- Generated weekly compliance summaries to streamline HIPAA audit prep, saving 41% analyst time.
- Helped map application roles with HR attributes for joiner/mover/leaver events.

Cybersecurity Engineer
Wipro

06/2021 – 07/2023 | Bangalore, India

Summary
Part of the global IAM program securing both employee and administrator access for Lloyds Bank. Began with Okta SSO onboarding and later advanced to CyberArk PAM operations and compliance automation. My work helped strengthen credential security and simplified reporting for internal audits.

Responsibilities

- Managed Okta SSO integrations for 25 critical apps with adaptive MFA, reducing login incidents by 33%.
- Onboarded privileged accounts into CyberArk vaults and performed regular session reviews.
- Optimized account reconciliation using PowerShell, saving 14 hours per audit cycle.
- Built SOX and ISO 27001 audit reports through Scripted queries, cutting prep time by 38%.
- Implemented ServiceNow dashboards to monitor PAM health status and anomalies.
- Collaborated with compliance and risk teams to align controls with Lloyds Bank security policies, improving SLA closure by 27%.
- Mentored junior analysts on onboarding workflows and PowerShell automation practices.

Junior Software Developer
United India Insurance

06/2020 – 05/2021 | Chennai, India

Summary
Assisted the IT security team in improving how employee accounts were created and managed. Helped maintain Active Directory, supported the move to Azure AD and Okta SSO, and documented procedures to make access requests faster and more consistent across branches.

Responsibilities

- Handled Active Directory user administration and password resets for 800 employees with 96% request accuracy.
- Supported Azure AD and Okta integration, increasing synchronization reliability by 26%.
- Automated weekly access reports using Excel macros and PowerShell, reducing manual effort by 43%.
- Created SOPs and baseline checklists for onboarding or offboarding, improving audit traceability by 24%.
- Assisted internal audits and tracked remediation actions in ServiceNow.

EDUCATION

Masters in "Management Information Systems"
Northern Illinois University

Dekalb, IL., 60115, USA

CERTIFICATIONS

- PCEP-Certified Entry-Level Python Programmer
 - SailPoint Identity Now Engineer
- Microsoft Certified: Identity and Access Administrator (SC-300)
 - CompTIA Security+
- Okta Certified Professional
