

Rory Taca

Staff Full Stack Engineer

Results-driven .NET Engineer with 12 years of experience in designing, developing, and deploying enterprise applications using **.NET, C#, ASP.NET Core, AWS, Azure, and SQL Server**. Proven expertise in building scalable microservices, **REST APIs**, cloud solutions, and messaging systems (**Kafka, NATS.io, RabbitMQ**). Adept at optimizing performance, reducing costs, and ensuring high availability. Strong background in **Agile** methodologies and **DevOps** practices, including **CI/CD, Docker, Kubernetes**, and automated testing.

Work Experience

Senior Software Engineer at Jack Henry & Associates

June 2021 - Present | Remote

Jack Henry & Associates is a leading provider of fintech solutions for banks and credit unions across the U.S.

- Developed a **.NET 6** warehouse service with **Kafka** and REST APIs, achieving ~99% item collection success and optimizing real-time processing.
- Designed and implemented three **AWS Lambda** functions as part of a cloud migration, reducing infrastructure costs by 10%.
- Built a logging microservice using **ASP.NET Core** and MongoDB, ensuring 100% of system requests were tracked for compliance and auditing.
- Led an event-driven system migration using **NATS.io**, successfully integrating 12 legacy services into a message-streaming architecture.
- Developed a **React** and **Angular** frontend monitoring system, improving real-time system observability by 15%.
- Spearheaded **ASP.NET Core** backend implementation to validate business hypotheses, contributing to a successful fundraising round.
- Designed a multi-tenant API gateway using **.NET Core** and **Azure API Management**, securing system access while enabling scalability for 100+ clients.
- Mentored junior developers, enhancing team-wide expertise in **.NET** and cloud-native solutions.

Senior .NET Engineer at Meditech

May 2016 - June 2021 | Remote

Meditech is a healthcare software company providing electronic health records (EHR) solutions to hospitals and medical practices.

- Developed a plugin library for a **.NET 4.5.1 WPF Point of Sale (POS)** system, enabling seamless integration with three **.NET Core** extensions.
- Designed a Chromium-based **WPF .NET 4.5.1** integration module, enabling two healthcare teams to launch next-gen web services.
- Built and deployed secure **RESTful APIs** in **ASP.NET Core** for patient data management, ensuring **HIPAA** compliance.
- Implemented **CDC** (Change Data Capture) testing, automating test cases per version and improving data consistency by 100%.
- Developed a contest website for the company's mobile **EHR** system, leveraging **AWS Cognito, S3, MySQL**, and **Docker** (Fargate).

Skills

Languages

- JavaScript
- TypeScript
- C#

Frontend

- React
- Angular
- Next.js

Backend

- Express
- Nest
- .NET Core
- .NET API

Database

- MySQL
- PostgreSQL
- MongoDB
- Oracle RDB
- Dynamo DB

CSS Frameworks

- Tailwind CSS
- Material UI
- Chakra UI
- SCSS/SASS
- Bootstrap

Libraries

- Redux
- GraphQL
- React-Query
- Chart.js
- D3.js
- Highcharts

Cloud Technology

- Amazon Web Service
- Azure App Service

- Enhanced logging mechanisms and exception handling across multiple microservices, reducing incident resolution time by 40%.
- Led **Azure DevOps CI/CD** automation, ensuring seamless deployment across test and production environments.
- Migrated legacy **ASP.NET** applications to **.NET Core**, improving performance, maintainability, and security.

.NET Developer at Paycor

February 2013 - May 2016 | Remote

Paycor provides payroll and HR solutions to small and mid-sized businesses across the U.S.

- Developed **ASP.NET MVC 4** features, including tax calculators and report handlers using **TDD** (NUnit) and **T-SQL**, benefiting ~8% of customers.
- Built a **React** frontend for targeted features, reducing the time-to-market by 50% without external assistance.
- Designed and implemented database solutions in **SQL Server**, writing stored procedures, views, and triggers to enforce entity relationships.
- Developed and consumed **ASP.NET Web API** services and **GraphQL** endpoints, increasing data exchange efficiency by 40%.
- Created SSIS packages for **ETL** operations, ensuring seamless payroll data migration across multiple environments.
- Led Unit Testing & Code Reviews, ensuring adherence to best practices and maintaining high-quality code standards.
- Built a dynamic HR dashboard using **Angular** and **.NET**, enabling real-time workforce analytics.

Tools/Software

- GitHub/GitLab
- Slack/Teams
- Jira/Trello
- Figma

CI/CD & Testing

- Docker
- Kubernetes
- Jenkins
- GitHub Actions
- NUnit
- xUnit
- Selenium

Educational Background

Bachelor of Science in Computer Science

Boston College

2009 - 2012
