

SUMMARY

- Full-Stack Developer with around 4 years of experience in designing, developing, and deploying scalable web applications.
- Proven track record in enhancing performance, security, and user experience through innovative solutions.
- Skilled in leading cross-functional teams, conducting code reviews, and optimizing cloud infrastructure.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, Go

Frontend Frameworks: React.js, Redux.js, Next.js, HTML, CSS, Bootstrap, Tailwind CSS

Backend Frameworks: Node.js, Express.js, Django, FastAPI, Flask, Spring Boot, TypeORM, Sequelize, Mongoose, RESTful APIs

AI & LLM: OpenAI, LangChain, RAG, Cursor, Hugging Face, finBERT, Numpy, Pandas, Scikit-learn, OpenCV

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, SQS), Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions)

Database: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis, Firebase

Testing & Tools: Jest, Cypress, Pytest, Postman, Mocha, GitHub, JIRA, VS Code, Swagger

PROFESSIONAL EXPERIENCE

AT&T, USA

May 2025 – Present

Full-Stack Developer

- Spearheaded the development of scalable web applications using React.js, Node.js, and AWS cloud services, implementing server-side caching, API optimizations, and auto-scaling, enhancing system performance and user experience.
- Collaborated with cross-functional teams to design and optimize RESTful APIs and a microservices architecture, implementing load balancing and fault tolerance, leading to a 25% increase in system reliability.
- Implemented CI/CD pipelines with Jenkins, Docker, and GitHub Actions, reducing deployment time by 40%.
- Conducted code reviews and mentored junior developers, improving code quality and team productivity.
- Revamped backend architecture with MVC structure and introduced two-token authentication using Node.js, Express.js, JWT, and TypeORM for MySQL, enhancing security and decreasing API response time by 30%.
- Automated marketing campaigns using AWS SQS, Lambda, SendGrid, and Twilio, increasing customer retention by 30%.
- Streamlined campaign data processing by integrating OpenAI's LLM API into our Node.js backend and ETL pipelines, transforming unstructured emails and SMS into structured data, reducing processing time and accelerating campaign launches.
- Built event insights dashboard using Next.js, Chart.js, and Tailwind CSS, improving decision-making efficiency.
- Implemented Redis caching, reducing database load by 40% and improving API response speed.
- Developed unit and integration tests using Jest and Cypress, achieving 90% test coverage.

ISparrow, India

Aug 2021 – Jun 2023

Full-Stack Developer

- Designed and developed a social community platform connecting 200 artists with potential buyers using Python, Django RESTful APIs, PostgreSQL, and JavaScript, featuring dynamic and responsive layouts to enhance engagement.
- Led the development of a scalable B2B e-commerce web application using the MERN Stack, integrating product nesting, real-time inventory tracking, and user authentication, resulting in a 40% increase in requests for quotes.
- Deployed a scalable microservices-based infrastructure with Kubernetes and Docker, reducing maintenance costs.

PROJECTS

DollarDashboard: Expense Tracking Web Application

- Built a robust expense tracking platform using React.js, Node.js, and MySQL, implementing expense categorization, real-time data visualization, and SSO authentication, streamlining expense logging and boosting user engagement.
- Designed an admin panel, performed functional testing with Postman, leading to a 25% reduction in post-release defects.

CloudSync: Cloud-Based Microservices Management Platform

- Developed a scalable platform with AWS Lambda, S3, and Docker to manage cloud resources and optimize deployment.
- Implemented Kubernetes-based orchestration, achieving a 30% reduction in server downtime and cost efficiency.

Jinn: AI-Powered Desktop Assistant

- Created an AI desktop assistant with speech recognition to automate daily tasks, boosting user productivity.
- Leveraged Python, OpenAI API, and SpeechRecognition, added features to debug code, write email, and provide real-time updates.

EDUCATION

Florida Atlantic University Boca Raton, FL

Masters in Computer and Information Sciences

Aug 2023 – May 2025

Prasad V. Potluri Siddhartha Institute of Technology Vijayawada, India

Bachelors in Computer Science and Engineering

Jul 2017 – Jul 2021
