

Summary

Salesforce Developer with extensive experience in configuring and customizing Salesforce components, including Apex programming, Visualforce pages, and Lightning components. Proficient in integrating Salesforce with external systems, ensuring data accuracy, and optimizing workflows. Strong background in designing and developing solutions to meet business requirements, with a focus on enhancing user interfaces and automating processes. Skilled in conducting various types of testing to ensure high-quality deliverables and minimizing defects.

TECHNICAL SKILLS

Programming Languages & Tools: Apex, C, HTML

Database Management: MySQL

Salesforce Skills: Configurations (Flows, reports and dashboards, Email templates, user management), Apex Programming, Lightning Web Components, Workbench, Sales Cloud, Service Cloud, Change Sets, Data Loader, Integrations, Velocity

Methodologies: Agile.

RELEVANT COURSEWORK

Information Systems Principles | Research Project Seminar | Information Systems Design & Development | Introduction to Coding | Information Security and Controls | Database Management Systems

PROFESSIONAL EXPERIENCE:

Salesforce Developer

Cloudsquare | Los Angeles, CA

Apr 2024 to Present

- Developed and customized Salesforce applications using Apex, Visualforce, and Lightning Web Components to meet specific business requirements.
- Implemented Salesforce configurations and integrations with third-party systems, enhancing functionality and improving user experience.
- Designed and optimized Salesforce data models, including objects, fields, relationships, and validation rules to ensure data integrity and performance.
- Developed and deployed custom workflows, process automation, and approval processes to streamline business operations and increase efficiency.
- Created and maintained detailed technical documentation, including design specifications, test plans, and user guides for Salesforce solutions.
- Conducted code reviews and provided mentorship to junior developers, ensuring best practices and coding standards are followed.
- Collaborated with cross-functional teams, including business analysts, project managers, and end-users, to gather requirements and deliver tailored Salesforce solutions.
- Managed Salesforce security, including roles, profiles, permission sets, and sharing rules to ensure data confidentiality and compliance.

Salesforce Vlocity Developer

Verizon | Irving, TX

Dec 2023 to Mar 2024

- Configured Vlocity features and customized Salesforce components, including objects, fields, and page layouts, to meet specific business requirements.
- Conducted unit testing, system integration testing, and user acceptance testing (UAT) for Vlocity components, ensuring high-quality deliverables and minimizing defects.
- Created and optimized DataRaptor Extracts, Transforms, and Loads (ETLs) to facilitate seamless data integration between Salesforce Vlocity and backend systems.
- Customized Salesforce applications using Apex programming language, Visualforce pages, Lightning components, and other Salesforce technologies.
- Design and develop solutions on the Salesforce platform to meet business requirements.

- Configure Salesforce objects, fields, workflows, validation rules, and process builder flows.
- Customize Salesforce user interface using page layouts, record types, and Salesforce Lightning App Builder.
- Integrated Salesforce with external systems using SOAP/REST web services, Salesforce Connect, or other integration tools.
- Implemented data migration and data synchronization processes between Salesforce and other systems.

Salesforce Developer

July 2023 to Nov 2023

Key Bank | NYC, NY

- Customized Salesforce using Apex, Visualforce, and Lightning components to meet business requirements.
- Managed integrations with third-party systems via REST and SOAP APIs.
- Ensured data accuracy and consistency with data migration tools.
- Designed workflows and automation processes for business process optimization using Salesforce tools.
- Improved user interfaces using Salesforce technologies.
- Proficient in troubleshooting and efficient issue resolution, utilizing debugging and monitoring tools.
- Maintained detailed documentation of custom code and configurations.

Associate Software Engineer, Salesforce

Dec 2020 to Nov 2021

Cyntexa | India

Customer Service Application (Salesforce Service Cloud):

- Created Email-to-case email services to automate the case creation from the customer support emails.
 - Created Lightning flows to automate the support processes to increase the efficiency of customer support agents and created validation rules to improve the case data quality.
 - Worked on apex triggers and apex classes to track case response time and case field configuration from multiple email-to-case email addresses.
 - Created reports and dashboards for the agent supervisors to monitor the case volume by channels and case load every day.
 - Developed complex SOQL queries for data retrieval by external systems for data analysis to determine the case resolution time and improve the customer experience.
 - Used change sets to deploy the code to other environments.
- ##### Sales Application (Salesforce Sales Cloud):
- Worked on creation of Accounts and Contacts from external systems using REST services.
 - Implemented products sync to Salesforce using batch apex.
 - Worked on apex to automate the creation and sync of opportunity line items from quotes.
 - Automated the creation of Purchase Orders using asynchronous apex after the opportunity closure.
 - Configured component visibility, dynamic field configuration in Lightning records pages for different user profiles.
 - Created basic Lightning Web component to display the account team on opportunity page.
 - Utilized GitHub (CI/CD pipeline) for code deployments.

ACADEMIC PROJECTS

- **Jackson Park Hospital:** Create product roadmap and business strategy by analyzing business and customer pain points. Designed solutions using digital transformation concepts. Jan 2023 – May 2023
- **Mayo Clinic:** Leveraged the power of advanced analytics to improve speed and accuracy of the diagnosis to build a roadmap for business expansion. Sep 2022 – Dec 2022
- **Salesforce Consultant:** Centralized customer data into a single platform providing a 360-degree view of each customer for the customer service agents to reduce the case resolution times. Jan 2022– May 2022

CERTIFICATIONS

- Salesforce Certified Administrator
- Salesforce Certified Platform Developer-1
- Salesforce Certified Sales Cloud Consultant
- Salesforce Certified Service Cloud Consultant
- Google Ads Certification

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems

Master of Science (MS) in Information Systems

2023

New York, USA

GPA: 3.7, May

Kakatiya University

Bachelors in Biotechnology

Warangal, India

CGPA:6.95 , Nov 2020
