SUMMARY

Master's student in Computer Engineering, looking for full time employment & also MS CRM developer with 5 years of experience specializing in software design and development with focus on **Microsoft dynamics CRM, Power Apps**.

CERTIFICATION

Microsoft Certified: Power Platform Developer Associate

PROJECT WORKEXPERIENCE

MS Power App Developer - University of south florida, Tampa FL.

Jan2024 - Present

- Created USF -Campus Event Management App
- Analysis, design documentation, requirement gathering and development
- Customized MS Dynamics CRM application based on the business requirement.
- Customized Entities with PCF controls.
- Customize Microsoft Dynamics CRM Entities, create multiple forms (security based) on entities, add Custom JavaScript on form events and add web resources, navigation links to achieve the business requirements.
- Created workflows, BPFs, Business rules to automate the processes.
- Imported contacts from existing application into MS Dynamics CRM using the CSV file format.
- Created several client-side extensions using JavaScript, CSS and HTML5.
- Created Event management canvas Application to register events.
- Customized Client-side validations and accessed data within the HTML controls using JavaScript.
- Migration of data from Excel source to CRM using SSIS.
- Created and developed Microsoft Dynamics CRM Custom Web Pages to plug into out-of- the box MS CRM Solution using HTML.
- Developed SQL scripts to insert, update and delete data in MS SQL database tables in OLTP environment.
- Worked on power automate flows to automate many business cases.
- Worked on setting up relationship between System & Custom entities.
- Created Plugins for different operations and business requirements.
- Customized Workflows and Plug-in for automated processes, based on requirement from sales and marketing department to increase visibility and efficiency.
- Customized Service module and contract templates, entitlement templates, Service Level Agreements and product catalogue according to the business process.
- Created Organization, Business Units, and Teams and formed their relationships.
- Involved in security model of the Business units and teams between different departments,
- Using Cascading Style Sheets (CSS) for styling web form UI controls.
- Used ASP. Net validation controls for validating user input in the web forms.
- Created SSIS packages for different data loading operations for many applications.
- Integrated Custom WCF Service with other applications.

PROFESSIONALWORKEXPERIENCE

MS Power Apps Developer - Cognizant Technology Solutions, India

Jan 2021-Aug 2023

- Designed and developed custom business applications using Power Apps (Canvas & Model-Driven) for process automation.
- Integrated Power Automate workflows to automate business processes and improve efficiency.
- Worked with Microsoft Dataverse, SharePoint, and SQL Server for backend data integration.
- Developed custom connectors and APIs to enhance functionality within Power Platform applications.
- Built interactive Power BI dashboards to provide data insights and reporting.
- Implemented Power FX and JavaScript for custom business logic and UI customization.
- Created security-based entity forms and configured role-based access within Power Apps and MS Dynamics CRM.
- Developed Business Process Flows (BPFs), workflows, and business rules for process automation.
- Migrated and integrated data from Excel and other sources using SSIS and Power Platform tools.
- Created Event Management Canvas Application for event registration and tracking.
- Optimized performance, usability, and security of Power Platform applications.
- Configured Service modules, SLA templates, entitlements, and product catalogs to align with business needs.
- Managed organization-level security models, including Business Units, Teams, and User Role configurations.
- Integrated Custom WCF Services and Power Automate flows to streamline operations.
- Developed Plugins and Custom Workflows to meet unique business requirements.
- Utilized Azure services for cloud-based integration and automation.
- Stayed up-to-date with Microsoft Power Platform trends, incorporating AI Builder and RPA for intelligent automation.

PROJECT INTERN

Pantech Solutions, India

Jan 2020 -Aug 2020

- Analysis, design documentation, requirement gathering and development.
- Customized MS Dynamics CRM application based on the business requirement.
- Customize Microsoft Dynamics CRM Entities, create multiple forms (security based) on entities, add Custom JavaScript on form events and add web resources, navigation links to achieve the business requirements.
- Created workflows, BPFs, Business rules to automate the processes.
- Imported contacts from existing application into MS Dynamics CRM using the CSV file format.
- Created several client-side extensions using JavaScript, CSS and HTML5.
- Created Event management canvas Application to register events.
- Customized Client-side validations and accessed data within the HTML controls using JavaScript.
- Migration of data from Excel source to CRM using SSIS.

EDUCATION

University Of South Florida

Aug 2023-May 2025

Master of Science, Computer Engineering - CGPA 3.6/4

Madanapalle institute of Technology and Science, India

June 2017-July 2021

Bachelor of Technology, Electronics and Communication Engineering - CGPA 8.62/10

RELEVANTCOURSEWORK

Graduate: Introduction to Theory of Algorithms, Computer Architecture, Hardware Accelerators On Machine Learning, Human Computer Interaction, Smart and Health IOT, Embedded Cryptography , Emerging Networks and Security.

Under Graduate: Embedded Systems, Computer Networks and Internet Protocol, Digital Signal Processing, Electro field Magnetic Theory, Wireless Communication Protocols.

CERTIFICATIONS AND UDEMYCOURSES

- **POWER PLATFORM DEVELOPER ASSOCIATE -Certified by MICROSOFT**
- **Microsoft Dynamics 365 (CRM) &Power Platform Training**
- **Appium -Mobile Testing (Android/IOS) from Scratch with Frameworks**
- **Certified Courses(NPTEL): Analog communications, Computer networks and Internet protocol.**

TECHNICAL SKILLS

- **Primary Languages** : C#, HTML, CSS, JavaScript, Liquid.
- **Database** : MySQL, Oracle 11g
- **Development** : Dynamics CRM, PowerApps, MS Visual Studio, VS Code.
- **Web Technologies** : HTML, CSS, Java Script, JQuery.
- **Operating systems** : Windows, Linux.

ACADEMICPROJECT EXPERIENCE

Designed Event Ease- Campus Event Management App

Aug 2024-Dec 2024

- Built a Canvas App using Power Apps, integrating SharePoint for event and RSVP management.
- Automated event notifications via Power Automate for real-time updates.
- Designed role-based dashboards for attendees & organizers with event tracking and feedback features.
- Improved UX/UI with placeholder guidance, intuitive navigation, and split-page design.
- Enhanced campus engagement by centralizing event discovery and registration.
- Upcoming features: Push notifications & image support for better usability.

Analysis of Accuracy and Speed for Image Classification using CNN Across CPU,GPU

Jan 2024-Apr 2024

- Compared CNN performance on CPU and GPU, achieving significant speedups in image classification with GPU acceleration.
- Benchmarked model accuracy on CPU and GPU, ensuring consistent and reliable image classification results.
- Implemented and fine-tuned CNNs using TensorFlow and PyTorch, demonstrating proficiency in deploying models on diverse computing platforms.

MAJOR PROJECT – MITs “Air pollution monitoring system using PIC Micro Controller”

Jan2021- July 2021

- This project focuses on the development of an embedded system-based air pollution monitoring solution. The system utilizes a PIC microcontroller integrated with sensors such as MQ-2, MQ-6, and LM35 for real-time monitoring of harmful gases like CO₂, NO₂, SO₂, LPG, and methane.
- The system includes a GSM module for remote data transmission, LCD display for real-time data visualization, and ADC for converting sensor outputs into digital signals.
- This project also covers the use of voltage regulators, rectifiers, transformers, and capacitors to stabilize power supply for the system.
- The device offers a low-cost, portable, and user-friendly air quality detection system with high precision and remote monitoring capability, designed for applications like indoor air quality assessment, weather monitoring, and pollution detection.

EXTRAMURAL

- Organized a national level technical Symposium Eclectica-2019 (MITS).
- Coordinated and served as a NSS volunteer, MITS.
