

Az Zak

Los Angeles, CA

Cell: (424) 394-0939

Email: azatsdet@gmail.com

Sr. Software Development Engineer in Test (SDET)

SUMMARY:

- 11+ years of experience in QA/SDET roles with ISTQB Certification.
- Founder of the largest QA/SDET Meetup community in Los Angeles, CA.
- YouTuber with 30,000+ subscribers, creating QA/SDET-related video content.
- Solid experience in Test Automation, creating and executing automated tests for web application testing in Selenium WebDriver using C#(MSTest), Python(Pytest, Robot Framework), Java(TestNG, JUnit) and others .
- Hands-on experience in Mobile Automation(Android, IOS) using Appium, XCUITest, Espresso.
- Extensive experience working with CRM systems, including Salesforce and HubSpot.
- Knowledge of performance and stress testing using JMeter, Blazemeter.
- Proficient in development of QA documentation: Test Plans, Test Cases, Check Lists, Bug reports.
- Passionate about testing. Excellent problem solving skills.
- US Citizen.

SKILLS:

Automation tools: Selenium WebDriver, MSTest XCUITest, Espresso Appium, Pytest, Unittest, Selenium Grid, Sauce Labs, RobotFramework, Codeception, TestNG, JUnit, Capybara, Cucumber, AWS Device Farm

CRM Tools: Salesforce, HubSpot

Performance testing tools: JMeter, Blazemeter, HP LoadRunner..

Languages: Python, C#, PHP, Java, Swift, Kotlin, Ruby, HTML, SQL, XML

Mobile devices OS: Android, IOS, Windows Phone

Web Testing Tools: Firebug, XPather, Charles HTTP Proxy

Virtualization : Docker, Vagrant, VMWare, Oracle VM VirtualBox

Databases: MySQL, Oracle, MongoDB

CI servers: Jenkins, Bamboo

IDE: PyCharm, IntelliJ IDEA, PhpStorm IDE, Eclipse, NINJA-IDE

EXPERIENCE:

04/21 – Present SR. SDET, TEST PRO, Los Angeles, CA

- Engineered a scalable Python and Selenium automation framework, reducing regression testing time by 40% and enhancing CI/CD integration.
- Crafted and sustained an iOS mobile automation framework, utilizing XCUITest and Swift for enhanced application testing.

- Established and managed an Android mobile automation framework, employing Espresso and Kotlin to streamline testing processes.
- Integrated Selenium-based tests into Jenkins CI/CD pipelines, speeding up software release cycles and ensuring high-quality deployments.
- Maintained over 500+ automated test cases for functional and regression testing, identifying critical pre-production bugs.
- Implemented Page Object Model (POM) and Data-Driven Testing to streamline test maintenance and data management.
- Customized Selenium Grid for parallel test executions, ensuring application compatibility and responsiveness across browsers and platforms.
- Conducted code reviews and enforced best practices in automation code, resulting in a 30% increase in framework performance and stability.
- Provided automation strategy training to junior SDETs and QA analysts, boosting team capabilities in Java programming and Selenium.
- Utilized JIRA for defect tracking and reporting, contributing to a 25% year-over-year decrease in critical bugs.
- Continuously evaluated and integrated new testing tools, maintaining the framework's effectiveness against evolving software testing requirements.

02/20 – 04/21 SR. SDET, Beachbody, Santa Monica, CA

- Maintained behavior-driven Test Automation framework and created new automation scripts for UI testing using Python, pytest, Selenium WebDriver, Jenkins, Sauce Labs (for cloud testing), Selenium Grid (for distributed network testing)
- Design and build automation solutions for CI/CD process via Jenkins (support existing jobs, creating new jobs)
- Interaction with remote members of QA and development teams
- Leading junior members of QA team, making assignments, keeping track on results/deadlines
- Developed and maintained automation script for Smoke/Regression testing for all supported breakpoints
- Performed Load/Performance testing with JMeter for entire application during user acceptance test (UAT)

02/17 – 09/19 Lead Mobile SDET, Thrive Market, Los Angeles, CA

- Led Mobile QA Automation team with 3 people
- Built from scratch IOS Mobile testing framework using Appium + Pytest
- Design and build automation solutions for CI/CD process via Jenkins (support existing jobs, creating new jobs)
- Interaction with AWS Device Farm
- Created Web and API automation tests using Ruby + Cucumber
- Developed test plans, test suites
- Analyzed manual test cases and technical requirements to convert them into automation tests
- Participated in regular project team meetings to discuss testing procedure and assignments

08/16 – 02/17 SR. QA Automation Engineer, Beachbody, Santa Monica, CA

Worked on Beachbody Live - web application for helping Beachbody customers to find offline workout classes and become Beachbody certified instructors

- Maintained behavior-driven Test Automation framework and created new automation scripts for UI testing using PHP, Codeception, Selenium WebDriver, Jenkins, Sauce Labs (for cloud testing), Selenium Grid (for distributed network testing)
- Developed data-driven Test Automation framework for RESTful API service testing from scratch using PHP and Codeception framework
- Design and build automation solutions for CI/CD process via Jenkins (support existing jobs, creating new jobs)
- Interaction with remote members of QA and development teams
- Leading junior members of QA team, making assignments, keeping track on results/deadlines
- Developed and maintained automation script for Smoke/Regression testing for all supported breakpoints
- Performed Load/Performance testing with JMeter for entire application during user acceptance test (UAT)

09/15 – 08/16 SR. QA Automation Engineer, Touchcommerce, Agoura Hills, CA

- Created and executed functional automation scripts using Python, Selenium WebDriver and Robot Framework
- Automating mobile(iOS, Android) application using Appium and Robot Framework.
- Debugging web pages on desktop and on mobile devices to look into a code and define the issues
- Analyzed manual test cases and technical requirements to convert them into automation tests
- Automated Rest API testing using Python
- Integrated automated tests with Bamboo for continuous multithreaded execution of regression tests on multiple OS, browsers, and browser versions simultaneously
- Integrated automated test framework with SauceLabs for cloud-based multithreaded cross-browser and cross-platform execution
- Used Unix system for analyzing server logs and run Shell scripts
- Analyzed software failures, made them reproducible, reported bugs via Jira
- Participation on daily basis in Agile/Scrum team meetings throughout short-time release cycle

04/15 – 07/15 Software Development Engineer in Test, Startpack, Kazan, Tatarstan

- Performed Load and Stress testing of Web Services in JMeter
- Collaboration with development, product management and sales teams to ensure end-to-end quality of company products
- Developed Data Driven Test Automation for RESTful Web APIs and Web Services in JMeter
- Created and maintained Automation test cases in Selenium WebDriver from scratch
- Integrated Selenium Server tests with Hudson CI/Jenkins for Continuous Integration
- Performed Database testing and data validation using SQL in MySQL database
- Performed GUI, Functionality, Regression Testing, Boundary, Cross-Browser (MSIE, Firefox, Chrome, Safari) and Cross-Platform (Windows 7, MacOS) Testing in virtual machine environment

- Working in Agile/Scrum environment with 2 weeks sprint planning and implementation, participating in sprint retrospectives

07/13 – 04/15 Mobile QA Engineer, Soft-Artel, Kazan, Tatarstan

- Tested manually mobile application in various IOS, Android, Windows Phone, BlackBerry devices
- Wrote and executed detailed Test Cases including prerequisites, detailed instructions, and anticipated results
- Designed and developed automated Test Plans and Test Cases for regression testing using Selenium IDE web browser automation tool
- Developed and maintained Test documentations such as Test Cases, check list, test summary reports

EDUCATION:

State University of Architecture and Engineering, Kazan, Tatarstan

ISTQB Certification
