

SUSHMITHA GUNDLAPALLY

sushmitha.unf92@gmail.com | 919-971-0999

Professional Summary

Experienced Data Analyst with a proven track record in designing and optimizing end-to-end data pipelines for seamless data extraction, transformation, and loading across complex environments. Expertise in leveraging SQL and Python to extract, manipulate, and transform large datasets, ensuring high-quality data for analysis and reporting. Skilled in applying advanced data manipulation techniques and creating efficient data collection methods, with a focus on maintaining data integrity throughout the pipeline. Adept at using Tableau to create impactful data visualizations and reports, uncovering key insights and trends. Adept at applying advanced statistical techniques like regression analysis to uncover key insights and develop performance baselines. Collaborative team player with the ability to drive process improvements, optimize data workflows, and deliver impactful business solutions in fast-paced, ever-evolving settings.

Skills

Languages and Databases:	Python, Java, R, C, SQL, MySQL, PostgreSQL, Oracle PL/SQL
Web Technologies :	HTML5, CSS, JavaScript, React, XML
ETL Tools & Data Visualization:	Informatica PowerCenter, Tableau, Python(NumPy, Matplotlib, Pandas), Power BI
Microsoft Tools:	Word, Excel, PowerPoint, Outlook
Agile and DevOps :	Jenkins, Jira, Agile methodologies

Experience

Graduate Assistant, NCAT, Greensboro

Aug 2023 – Dec 2024

- Delivered comprehensive instruction in operating systems to undergraduates, earning the Outstanding Teaching Assistant Award for exceptional contributions to student learning and development.
- Monitored student progress, updated course assessments, and managed the distribution of assignments, ensuring timely and accurate submission while tracking academic performance.
- Coordinated data collection for assignments and projects, providing timely reminders and ensuring consistent engagement and progress tracking to support student learning outcomes.

Data Analyst, Cognizant Technology Solutions Corp

Mar 2021 – Apr 2023

- Performed the extraction, transformation, and loading of large-scale datasets using advanced SQL techniques, optimizing query performance and ensuring timely data delivery across multiple systems.
- Developed and fine-tuned SQL scripts using data manipulation techniques, for aggregating, joining, and filtering data, to enhance the performance and quality of ETL workflows by ensuring data accuracy and efficiency throughout the ETL process.
- Implemented data visualization strategies in Tableau to present performance metrics, trends, and insights, enabling stakeholders to make informed business decisions based on real-time data analysis.
- Applied statistical methods to assess and visualize data performance by utilizing SQL to create graphs, charts, and sheets for delivering actionable insights that improved business processes and decision-making accuracy.
- Collaborated with cross-functional teams, including business analysts, data engineers, and IT, to ensure seamless data integration and alignment with organizational goals.
- Drove improvements in business efficiency by utilizing data-driven insights to enhance data models and streamline workflows, contributing to a 15% increase in overall productivity.

Data Analyst, CSS Corp Pvt Ltd

Jun 2019 – Feb 2021

- Developed and optimized complex SQL queries for data extraction, transformation, and loading enabling seamless integration of large datasets from conventional database to the centralized database.
- Developed SQL-based transformations and filters to preprocess data, ensuring that raw data was accurately cleaned, validated, and structured for analysis.
- Employed statistical analysis techniques within SQL to generate insights on data trends and performance, contributing to the optimization of data pipelines and business intelligence processes.
- Enhanced ETL mappings through the application of filtering techniques, improving the overall data processing quality and efficiency of the transformation pipelines.
- Applied SQL to perform data validation and integrity checks, ensuring that all datasets met high-quality standards before being moved to production environments.
- Optimized ETL processes by applying best practices for data transformation and ensuring data integrity through systematic validations, contributing to better data management and decision-making capabilities.

Education

M.S., Computer Science/ North Carolina A&T State University, NC, United States

Dec 2024 / GPA- 3.84

B.S., Computer Science / Jawaharlal Nehru Technological University, India

May 2019/ GPA- 3.55

Academic Projects

Technologies: Python, Machine Learning, Data Analytics, Data Visualization

Sports Analytics Platform

- Designed a scalable platform to analyze IPL cricket data, integrating raw datasets into structured formats for predictive modeling and actionable insights.
- Built machine learning models, including regression and decision trees, to forecast player and team performance, aiding strategic decision-making.
- Automated data validation and preprocessing pipelines using Python to ensure the accuracy and quality of analytics.
- Delivered dynamic visualizations to represent complex data trends, enhancing understanding for coaches, teams, and analysts.

Boosting the Virginia Workforce with Data-Driven Insights

- Conducted comprehensive workforce analysis using Python to uncover skill gaps and align workforce capabilities with dynamic market demands.
- Applied advanced data preprocessing techniques, including missing value imputation, normalization, and feature engineering, to ensure data quality and reliability.
- Leveraged regression models such as Linear Regression, Random Forest, and Support Vector Regression (SVR) to accurately forecast employment trends and workforce dynamics.
- Delivered actionable insights and strategic recommendations to stakeholders, driving targeted workforce development initiatives and bridging identified skill gaps.
