

SAEED LOTFI

sa.lotfi@outlook.com | (641) 233-9099 | Denton, TX | linkedin.com/in/salotfi

Summary

Senior Front-End engineer (10+ years) building high-traffic modern SPAs and design systems with **React**, **Next.js**, **Angular**, **TypeScript**, and **JavaScript**. Ships accessible (WCAG 2.2/ARIA) UIs, SSR/SSG apps, and measurable performance wins (**LCP/CLS/TTI**). Led component libraries, testing (**Jest/RTL/Cypress**), and CI/CD in finance/logistics/insurance; comfortable with **GraphQL/REST** and **AWS** (S3, CloudFront, Lambda). Skilled in collaborating with cross-functional teams in Agile environments.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Angular (+RxJS), Next.js, Redux, Tailwind CSS, React Query, GraphQL

Testing: Jest, React Testing Library (RTL), Cypress, Playwright

Architecture: Component-Driven Development, Micro-Frontends (Module Federation), Design Systems, Performance Optimization, Clean Architecture

Tools: Git, VSCode, Webpack, Vite, Figma, CI/CD (GitHub Actions), Storybook

Cloud/Backend: Node.js, MongoDB, Redis, DynamoDB, Docker, AWS (S3, Lambda, CloudFront)

Practices: Accessibility (WCAG, ARIA), Responsive Design, SPA, Functional Programming, Scrum

Work Experience

MOFID SECURITIES - Senior Front-End Engineer

Tehran, Iran · Oct 2022 – Aug 2024

- Built a React/Next.js/Tailwind design system and replaced ad-hoc UI, cutting bundle size 32% and improving LCP 1.9s to 1.1s on key flows.
- Delivered data-heavy dashboards combining visx/regl and AG Grid; added server-side sorting/filtering and virtualized views to maintain smooth UX on large datasets.
- Raised test coverage of legacy UI from 18% to 55% (Jest/RTL/Cypress), reducing post-release defects.
- Shipped fund dashboards (20+ data sources) with virtualized tables/charts; increased fund page monthly views 5x and time-on-page 2.1x.
- Moved heavy compute to client with memoization and caching; reduced API CPU and infra cost.
- **Stack:** React, Angular, Next.js, TypeScript, Jest, RTL, Cypress

SIMYA TECH - Senior Front-End Engineer

Tehran, Iran · Apr 2019 – Sep 2022

- Optimized React bundles with lazy loading and code splitting; tuned components (memoization/effect hygiene) and enforced secure coding guidelines, increasing audit scores.
- Optimized high-traffic HRM pages (query batching, virtualization, memoization), reducing load times by 50%, increasing user engagement, and lowering bounce rates.
- Expanded test coverage from 12% to 45% using Jest and RTL, improving release stability.
- Built a dynamic form builder (Angular/RxJS), enabling data collection and data-driven decision-making.
- **Stack:** Angular, React, RxJS, Redux, Jest, RTL

QUANTUMIT - Full-Stack Developer

Melbourne, Australia · Sep 2018 – Mar 2019

- Standardized UI design across multiple applications by implementing a consistent design system and shared Angular components, reducing development time.

- Increased test coverage to over 80% using Jasmine, enhancing release stability, and reducing production bugs.
- Improved UI responsiveness by optimizing data handling and queries, reducing load times for end users.
- **Stack:** Angular, TypeScript, RxJS, Jasmine, C#, .NET Core, SQL

SPEEDDELIV - Full-Stack Developer

Tehran, Iran · Jan 2017 – Aug 2018

- Developed a scalable B2B platform with Angular, improving user workflows and driving adoption that contributed to 90% of company revenue.
- Developed reusable TypeScript and Angular libraries, improving scalability and reducing maintenance costs.
- Modernized a legacy system by migrating to Angular and TypeScript, improving application performance and scalability, resulting in higher customer satisfaction scores and a more responsive interface.
- **Stack:** Angular, TypeScript, RxJS, Lodash, C#, .NET Core, EF Core, SQL

HIHOLIDAY - Full-Stack Developer

Tehran, Iran · Jul 2013 – Dec 2016

- Improved booking platform responsiveness by optimizing query efficiency and reducing data retrieval time.
- Developed and integrated a pre-filling mechanism with JavaScript, Mustache, and Handlebars, improving form usability and boosting booking conversions.
- Added real-time UI updates in the booking system, ensuring near-instant user feedback.
- **Stack:** JavaScript, jQuery, Mustache, Handlebars, C#, .NET MVC, SQL Server

Education

Maharishi International University - M.S., Computer Science, Fairfield, IA (Expected Aug 2026)

Key Courses: Enterprise Architecture, Advanced Algorithms, Web Application Architecture

Kashan University - B.S., Computer Science, Kashan, Iran (Sep 2013)

Certifications

Automation with Ansible — Iran Linux House (Feb 2021)

DevOps Engineer — Docker, Iran Linux House (Aug 2020)

Linux Network Professional (LPIC-2) — Iran Linux House (Jan 2020)

Linux Server Professional (LPIC-1) — Iran Linux House (Sep 2019)
