

SAI DIVYA G

+1 (901) 295-8937 | gsaidk2025@gmail.com | Memphis, TN

SUMMARY

- Managed **user provisioning, deprovisioning, and dynamic group configurations** in **Microsoft Entra (Azure AD)**, automating identity workflows for efficiency.
- Designed and enforced **Conditional Access policies** with **MFA, device trust, and network-based restrictions**, reducing unauthorized access by 20%.
- Integrated enterprise applications with **Azure AD SSO**, configuring authentication protocols like **SAML, OAuth, and OpenID Connect** for seamless access.
- Monitored **Azure AD sign-in logs** and security alerts, identifying authentication risks, failed login attempts, and MFA-related issues for quick resolution.
- Assisted in **privileged access reviews**, revoking unnecessary permissions and enforcing the least privilege access for security and compliance.
- Provided first-level support for IAM security incidents, troubleshooting Conditional Access failures, MFA challenges, and SSO authentication errors.
- Managed guest user access through Azure AD B2B, implementing security restrictions, expiration-based access controls, and compliance policies.
- Developed **Power BI dashboards** and IAM security reports, tracking authentication trends, access review completion rates, and Conditional Access effectiveness.
- Documented identity governance workflows, troubleshooting procedures, and security configurations, improving operational efficiency and standardization.
- Implemented Privileged Identity Management (PIM) with Just-In-Time (JIT) access, minimizing standing admin privileges and enforcing access expiration policies.
- Configured **role-based access control (RBAC)** for Entra ID, ensuring users and administrators adhered to the principle of least privilege.
- Led IAM training sessions for IT teams and end-users, educating them on MFA enrollment, **self-service password reset (SSPR)**, and secure authentication practices.
- Assisted in **Azure AD Connect synchronization** troubleshooting, resolving directory sync failures, attribute mismatches, and password hash sync errors.
- Managed **Privilege Access Management (PAM)** onboarding for thousands of servers and critical applications, ensuring 100% compliance with security policies and enforcing automated password rotation.
- Integrated PAM with **AD, SSO, MFA, and ITSM tools**, reducing access-related security incidents by 40% and improving privileged session monitoring.
- Conducted **privileged session audits and access reviews**, mitigating risks and ensuring compliance with **ISO 27001, SOX, and GDPR** standards.
- Developed automated reporting and alerting for privileged access activities, reducing manual oversight efforts by 70% while improving visibility.
- Managed **break-glass access procedures** for emergency access control, ensuring privileged access remained secure, monitored, and time-limited.
- **Led PAM infrastructure upgrades and patch deployments**, ensuring 99.9% uptime while coordinating changes with internal teams and vendors.

- Assisted in **disaster recovery (DR)** planning for IAM & PAM, conducting quarterly **BCP/DR** drills with zero downtime in access management systems.
- Provided L2/L3 support for IAM & PAM incidents, handling service requests for password resets, access issues, and privileged session troubleshooting.
- Collaborated with **SOC & SIEM** teams on threat detection and response, analyzing identity-based threats, Azure AD risk alerts, and privileged access anomalies.
- Created detailed IAM & PAM security documentation, ensuring future-proof operational processes and streamlined onboarding for new engineers.

SKILLS

- **Identity & Access Management (IAM)**
 - **Microsoft Entra ID (Azure AD)** – User lifecycle, Conditional Access, MFA, RBAC, PBAC
 - **Privileged Identity Management (PIM)** – Enforced JIT access, least privilege, access reviews
 - **Single Sign-On (SSO) & Authentication** – Integrated applications via SAML, OAuth, OpenID Connect
 - **Guest & External Identity Management** – Managed B2B collaboration, access restrictions
- **Privileged Access Management (PAM)**
 - **PAM Administration** – Onboarded servers, enforced session monitoring, password vaulting
 - **Privileged Access Reviews & Compliance** – Conducted audit reviews, break-glass access control
 - **Threat Analysis & Risk Mitigation** – Monitored privileged activities, detected anomalies
- **Security & Compliance**
 - **Identity Protection & Threat Response** – Managed Azure AD risk alerts, suspicious login activities
 - **Regulatory Compliance** – Ensured IAM & PAM security aligned with ISO 27001, SOX, GDPR
- **Tools & Technologies**
 - **IAM & PAM Solutions** – Microsoft Entra (Azure AD), Arcos PAM, SailPoint (learning in progress)
 - **Monitoring & Reporting** – Power BI, Azure AD Logs, Security Insights, SolarWinds
 - **ITSM & Ticketing** – ServiceNow, JIRA
- **Process Improvement & Collaboration**
 - **Troubleshooting & Support** – Resolved IAM & PAM incidents, MFA, SSO authentication failures
 - **Documentation & Knowledge Sharing** – Created SOPs, security guidelines, training materials
 - **Training & Awareness** – Conducted IAM security workshops for IT teams & end-users

EXPERIENCE

IAM Engineer | Solstice Solutions Inc, Hartford, CT| Oct'23 to present

- Managed **user provisioning, dynamic group configurations, and password policies** in **Microsoft Entra (Azure AD)**, automating onboarding and access assignments.
- Designed and optimized **Conditional Access policies**, enforcing **MFA**, device trust, and **network location-based restrictions**, reducing unauthorized access by 20%.
- Integrated enterprise applications with Azure AD for **Single Sign-On (SSO)**, assisting in configuring **SAML, OAuth, and OpenID Connect** authentication methods.
- Monitored and analyzed **Azure AD sign-in logs** and security alerts, identifying failed login attempts, MFA challenges, and suspicious authentication patterns.
- Performed **access reviews** for privileged roles and security groups, revoking unnecessary permissions and enforcing the least privileged access across multiple teams.
- Assisted in **guest user access management** for external collaboration, applying **B2B security policies** and expiration-based access controls for vendors and partners.
- Developed security and identity governance reports, using **Power BI** dashboards to track authentication trends, access review results, and Conditional Access effectiveness.
- Documented troubleshooting procedures for authentication failures, creating internal knowledge base articles and support workflows for common Azure AD login issues.
- Supported complex authentication issue resolution, including troubleshooting Conditional Access failures, MFA resets, and SSO misconfigurations.
- Implemented and monitored password policies, ensuring compliance with organizational security guidelines while reducing account lockouts.
- Conducted IAM training sessions for IT teams and end-users, **educating employees on MFA registration, SSPR**, and secure authentication best practices.
- Reviewed and updated IAM security policies, ensuring they align with compliance standards such as **ISO 27001 and NIST** guidelines.
- Worked with security teams to analyze identity threats, identifying users flagged under Azure AD Identity Protection and assisting in remediation actions.

IAM Engineer | Devoir Software Solutions, Denver, CO| Jan'23 to Sep'23

- Assisted in user lifecycle management, provisioning, modifying, and deprovisioning accounts in Azure AD and on-prem Active Directory, ensuring accurate access control.
- Monitored Azure AD Connect synchronization, identifying sync failures, attribute mismatches, and password hash errors, escalating critical issues to senior IAM engineers.
- Provided first-level support for Conditional Access policy enforcement, assisting users with MFA challenges, location-based sign-in restrictions, and blocked access issues.
- Reviewed Azure AD sign-in logs and security alerts, documenting failed login attempts, risky sign-ins, and frequent authentication failures for investigation.
- Helped document IAM processes, creating guides for password resets, MFA troubleshooting, and Conditional Access-related authentication issues.
- Assisted in managing guest user access via Azure AD B2B, enforcing predefined policies for external user permissions and access expirations.

- Supported training sessions for IT helpdesk and end-users, covering basic Entra functionalities, MFA enrollment, and self-service password reset (SSPR) procedures.
- **Tested IAM policies in a non-production environment**, validating access control settings before deployment.
- Participated in access review activities, identifying inactive users or overprivileged accounts under supervision of senior engineers.
- Responded to service tickets for user access issues, handling password resets, group membership changes, and account unlock requests.

System Engineer | Wipro Limited, Bangalore, KA | Dec'19 to May'21

- Led a team in configuring, maintaining, and optimizing **Privileged Access Management (PAM)** solutions, ensuring secure and seamless project execution.
- Onboarded thousands of servers and critical applications into PAM, ensuring 100% compliance with security policies, validating agent installations, and troubleshooting connectivity issues.
- Integrated PAM with **Active Directory (AD), Single Sign-On (SSO), Multi-Factor Authentication (MFA), ticketing systems**, and **physical security access control**, reducing access-related security incidents by 40%.
- Designed and enforced **role-based access controls (RBAC), Just-In-Time (JIT) access**, and automated password rotation policies, eliminating standing privileges and reducing privileged access risk by 60%.
- Configured and optimized **Microsoft Entra (Azure AD) policies**, including **Conditional Access, Identity Protection**, and **user lifecycle management**, securing access for multiple users.
- Spearheaded **privileged session monitoring** and logging, ensuring 100% audit coverage and compliance with **ISO 27001, SOX, and GDPR**.
- Developed automated password vaulting strategies, reducing manual password management efforts by 80% for Windows, Unix/Linux, databases, and network devices.
- Conducted **privileged access reviews (PARs)**, identifying and remediating the stale accounts, mitigating access risks and ensuring compliance.
- Designed and managed break-glass access procedures, ensuring emergency access to critical systems remained secure and traceable.
- Led PAM system upgrades, patches, and hotfix deployments, coordinating with vendors and internal teams while ensuring 99.9% uptime.
- Conducted system reconciliations and provided audit support, preparing compliance reports and addressing security gaps to maintain 100% uptime.
- Established a **Disaster Recovery (DR)** strategy for PAM infrastructure, conducting quarterly BCP/DR drills with zero downtime in critical operations.
- Collaborated with SOC teams on threat detection and response, analyzing PAM logs and mitigating multiple high-risk security threats.
- Automated custom reporting and alerting mechanisms, reducing manual reporting efforts by 70%, ensuring real-time privileged access visibility.
- Provided knowledge transfer sessions, leading to a 30% reduction in PAM-related support tickets.
- Managed PAM deployments and integrations during the pandemic, ensuring 100% business continuity.

System Administrator | Tata Consultancy Services, Mumbai, MH | Dec'12 to Jan'17

- Served as the **Privileged Identity Management (PAM) and Application Performance Management (APM) SPOC**, leading secure implementation and administration across enterprise clients.
- Designed and deployed PAM solutions for clients such as **99Cents, ALDO, Ginger, Tata Motors, Voltas** and others, improving access control and security posture.
- Onboarded critical infrastructure (Windows, Unix/Linux, network devices, and databases) into PAM, securing thousands of privileged assets.
- **Automated password rotation** for privileged accounts, eliminating manual resets and reducing password reset requests by 90%.
- Configured **privileged session recording and monitoring**, strengthening audit trails and reducing unauthorized access attempts.
- Conducted **privileged account reconciliations**, decommissioning multiple stale accounts, ensuring compliance with **least privilege policies**.
- Integrated PAM with ITSM tools such as ServiceNow and CA Service Desk, streamlining access request approvals and reducing response times.
- Implemented break-glass access workflows, ensuring emergency privileged access remained secure and logged.
- Led **Root Cause Analysis (RCA)** for PAM outages, implementing preventive measures that reduced recurrence by 40%.
- Monitored and validated backups for critical PAM databases, ensuring secure recovery strategies.
- Automated compliance reporting, cutting audit preparation time by 50%, enabling faster regulatory responses.
- Provided L2/L3 support for PAM-related incidents and change requests, ensuring SLA adherence and a 25% improvement in resolution time.
- Collaborated with SOC teams, analyzing PAM logs to detect and contain multiple insider threat attempts.
- Maintained technical documentation for PAM deployments, configurations, and troubleshooting, ensuring knowledge continuity and ease of future upgrades.

EDUCATION

Bachelor of Science

Computer Science | PBR Visvodaya Institute of Science and Technology | Kavali, AP, India | May 2012

Master of Science

Computer Information Systems | Christian Brothers University | Memphis, TN, USA | Dec 2022

CERTIFICATIONS

- ISC2 CC – In progress
- AWS Cloud Practitioner

AWARDS

- Received **On-the-Spot award and TCS Gems** for contributions at **Tata Consultancy Services**.
- Awarded **Best Employee** for **continual support during the pandemic** period at **Wipro**.
